FOR

YOU

YOUR FUTURE

1988

INVESTING VS. SAVING

OUR MISSION IS YOUR FUTURE

BlackRock invests for you

BlackRock's business is to invest your assets to help you achieve *your* financial goals. Our leading principle is that we are a fiduciary to our clients—put simply, your goals are our goals.

Whether you are a couple looking to retire with dignity; a parent planning to send your child to college; a government looking to build better cities for your citizens—BlackRock invests for you.

We do our jobs each day with the greater purpose of helping more and more individuals achieve well-being through the creation of wealth.

We stay ahead of market dynamics, changes in the regulatory environment, geopolitical issues and advancements in technology; we study and manage risk; and we build new innovative strategies—all so that we can help you achieve your long-term investment goals.

We invest in BlackRock with that same focus on the future: we invest in our platform, our people and our technology so that we can continue to deliver long-term value for our clients and our shareholders.

YOUR PLATFORM

Delivering a new dimension of solutions

As an investor, you're focused on an outcome. You want to invest, but you also want to manage the amount of risk you take. You need the right mix of investment strategies to achieve your goals.

BlackRock offers a full spectrum of investment strategies—diverse across investment styles, asset classes and regions—which allows us to focus on you: what you need, when you need it.

BlackRock's combination of global expertise, robust research and *Aladdin*® technology gives us a unique capability to understand, analyze and address our clients' most complex issues in a whole-portfolio context. We use this integrated investment and technology platform to build the right solutions for you.

Our diversified platform also translates into more consistent results for BlackRock across market cycles, enabling us to continuously invest in our business for the future. We invest for the future so that we can continue providing customized solutions for clients and delivering consistent earnings growth and capital return for shareholders over time.

Aladdin:

Asset Liability And Debt and Derivative Investment Network. BlackRock's unified scaled investment and risk management system that enables us to better manage clients' assets and scale our operations

Scale:

One of BlackRock's differentiators that enables us to create and deliver solutions more efficiently to clients and optimize growth for shareholders

Technology to manage your risks and drive your returns

BlackRock embraces the power of technology to invest and generate more durable alpha for you; to manage risk across your portfolios; to help our intermediary partners manage risk, construct portfolios and scale their distribution efforts; and finally, to operate our own business more efficiently.

We invested in technology from the very beginning, building *Aladdin*, BlackRock's unifying investment and risk management platform, and continue to improve it every day. The analytical capabilities of *Aladdin* enable us to see risk clearer, construct sophisticated outcome-oriented portfolios for clients in an even more complex world and run BlackRock's diverse, global business model on a unifying platform.

In addition to investing in technology to use as we invest, manage risk and operate, we have a range of technology offerings for our clients to use:

- We offer *Aladdin* to asset managers, insurers and other institutions to help them invest and manage risk in their portfolios
- We offer technology to intermediary distribution partners to help them manage risk
- We offer technology to financial advisors to help them build better portfolios and spend more time with more clients
- We offer technology to our custodial bank partners to increase their efficiency and minimize risk
- We offer technology to banks to help them provide their corporate treasurer clients an easier way to manage cash

Whether you are an individual, an intermediary or a sophisticated institution, BlackRock invests in technology for *you*.

YOUR TECHNOLOGY

YOUR SOLUTIONS

Your goals are our goals

BlackRock's combination of investment strategies and technology capabilities uniquely position us to help you attain your financial goals. We help institutions like pension funds and insurance companies close their asset-liability gaps; we help countries manage their wealth and build infrastructure for their citizens; and we help individuals save for retirement.

Two-thirds of our assets are managed on behalf of people saving for retirement. With individuals living longer than ever before, we recognize the responsibility we have in helping them save for a dignified retirement. We are focused on leveraging our product breadth, technology tools and global insight to help people make their savings last for the duration of their retirement.

We built *LifePath*®, the industry's first target date funds, to make investing for retirement easier by creating a fund that adjusts allocations to lower risk investments as retirement nears. *LifePath* is designed to help you close the

gap between your current savings and the annual income you'll need to achieve the standard of living you want in retirement.

We are creating digital tools to help financial advisors better serve their clients. *iRetire*®, for example, leverages BlackRock's Cost of Retirement Index ("CoRI") to help you illustrate retirement income and develop a plan for closing the income gap. *Aladdin Risk for Wealth Management* helps financial advisors manage risk across their clients' portfolios and access multi-asset portfolio analytics.

BlackRock's global thought leadership platform, BlackRock Retirement Institute ("BRI"), enables our clients and broader community to make better decisions about retirement and longevity.

Target Date:

Making investing for retirement easier by automatically adjusting allocations from maximizing growth potential to managing against downside risk as retirement nears

At BlackRock, with 2/3 of the assets we manage related to retirement, it is our responsibility to assist people all over the world to live out their later years with dignity and security.

One BlackRock for you

Our global investment and technology platform is powered and used by our employees, who work tirelessly each day to serve you.

Since our founding, we have sought to attract talent from all around the world because we recognize the importance of having employees who reflect the clients we serve. Inclusion and diversity are key to our success and we believe the best solutions for clients and outcomes for people come from fully leveraging our diverse experiences, backgrounds and insights.

Our 14,000 employees work as One BlackRock to better serve you.

- *Aladdin*, our technology platform, enables all of us to speak one common language
- The BlackRock Investment Institute (“BII”) harnesses the power of collective intelligence across the firm to build a global knowledge-sharing platform for ourselves, clients and the broader public
- In 2017, we launched a series of “Knowing BlackRock” academies for employees to ensure that the firm’s principles and culture are institutionalized for the next generation

14,000

fiduciaries to clients

14,000

One BlackRock

working together to fulfill our principles each day

To deliver the best outcomes for clients and shareholders, we must focus on the long term

Our responsibility is to help you achieve your goals. And that means we are committed to a long-term approach at the companies we invest in on your behalf and at BlackRock itself.

We advocate on your behalf for companies to adopt robust business practices to ensure sustainable long-term performance.

And we operate and invest in BlackRock with that same focus on the future.

Global Public Policy Group:

BlackRock advocates for public policies that increase financial market transparency, protect investors and drive confidence in capital markets

BlackRock Investment Institute:

BII provides connectivity between our portfolio managers and insights to clients, policymakers and the public to keep you informed on macroeconomic, geopolitical and market events

2017 Corporate Responsibility Highlights

Human Capital

45% of new hires and **36%** of senior leader new hires were female in 2017

Launched **FTO**, our flexible time off program, so employees are no longer held to a fixed number of days off per year

Governance and Board

5 female Directors

17 / 20 Directors are independent

Environmental Sustainability

We will be using **100%** renewable energy in the US by the end of 2018 and globally by 2020

Total kWh (electricity) consumed globally has decreased by **12%** since 2014 and has decreased by **26%** per employee over the same period

Public Policy

Published **10** viewpoints on public policy issues and the implications for investors

Submitted nearly **50** comment letters in 2017 to policy makers

Risk Management

Augmented resourcing and oversight of **Cyber Risk** and **Technology Risk** as well as **Third Party Risk**

OUR RESPONSIBILITY

**TO OUR
SHAREHOLDERS**

My earliest lessons on the importance of investing came from my parents. My father owned a small business—a shoe store—and my mother taught English at a local university. They earned a solid income and their hard work created many opportunities for us, but we certainly weren't rich. I remember all the times my brother and sister and I would ask our parents whether we were saving for a bigger house or a new car. My father would just tell us we didn't need those things. Instead, my mother and father worked hard to save money—and to *consistently invest for our future*.

When I was younger, I didn't get it—or at least I didn't feel like I did. But without even knowing it, I was quietly absorbing these lessons from my parents on a daily basis. I started saving at a young age, earning money helping my father out at the shoe store. I bought my first stock, DuPont, when I was 13 years old. I continued to work, save and invest all throughout high school, college and grad school. And with each year, I grew to understand the power of investing in the markets. Looking back, the lessons are as powerful as ever. If my father had put \$1,000 in a bank account in 1952, the year I was born, it would be worth around \$20,000 today. But he knew there was a better way to build for the future. Like millions of other working Americans, he became an investor. That same \$1,000, invested instead in the S&P 500, would be worth about \$800,000 today.

By the time I moved to New York to work in finance, I realized how

grateful I was to my father—and how lucky I was that he taught me such vital lessons about the importance of investing and about preparing for the future. He taught me that investing isn't just about tomorrow—it's about decades of tomorrows.

Reflecting on 2017, it is easy to get wrapped up in the remarkable performance of markets. A lot of people made a lot of money. But much more importantly: a lot of people *didn't*. And that's not because they weren't savvy enough to invest in the "right things"—it's because they were not invested at all.

Around the world, savers are struggling with low interest rates as well as obstacles to better investing behaviors. A culture of short-term focus in markets and the media—an obsession with second-by-second movements and prices—drives fear and discourages smart investing. Talking heads may sweat with excitement at each record market close, but **one day or even one**

year of growth doesn't build a future. And so even as equity indices tick higher, too many individuals aren't enjoying the benefits. And that disconnect is driving significant anger, frustration and fear around the world.

BlackRock has a tremendous responsibility to help solve this challenge. We need to use our role as a fiduciary, our expertise in investing, markets and technology, our knowledge of and ability to empathize with investors' needs—to drive action. And one of those ways is to fulfill our purpose: to help more and more people experience well-being through the creation of wealth—to promote a system that helps more people participate in financial markets and build more secure futures. We are in a position to achieve these goals by using technology to drive better investing behaviors; by developing new investment solutions, and by advocating for better, stronger retirement systems. As an investor,

advisor, and innovator, I believe we have a vital role to play in society.

We constantly strive to put ourselves in the shoes of our diverse group of clients—to understand their priorities so that we can serve them more effectively. Clients with different backgrounds, levels of wealth, time horizons, life goals. We have to empathize with clients—no matter who or where they are.

We must be Japanese in Japan, Mexican in Mexico, and American in the US, because if we are going to fulfill our social purpose around the world, we must respond to the unique needs and objectives of each client in their home market.

Wherever we operate, we must deliver performance for our clients. That's why in 2017—and over the past 30 years—we have constantly evolved our platform and approach to deliver on our commitment to our clients—to achieve the expectations they have of us. Today we are better prepared to meet our clients' needs than ever before: The incredible cross-fertilization of investment ideas led by the BlackRock Investment Institute. The deeper integration of data science and artificial intelligence across investment processes. And strategies that help investors achieve their objectives in a low-return world, such as infrastructure investments or the new long-term private capital vehicle we are developing. We work every day to bring clients the performance they demand and deserve.

Our capacity to deliver this performance—to embrace technological change, constantly improve our organization, and deepen our relationships with our clients—is rooted in our deep commitment to our principles as a firm. As BlackRock celebrates its 30th anniversary, we've all had a chance to reflect on what has driven our success—and what will continue to play a role over the next year, the next five years, and the next 30 years.

I believe that the single most important driver of BlackRock's success has been our unwavering commitment to our principles:

our fiduciary commitment to our clients, our commitment to performance and innovation, and our One BlackRock approach to everything we do.

Through the acquisitions we have made, BlackRock has absorbed a number of great heritages while staying firmly committed to our principles and firm culture. Each addition enhanced our culture and made it stronger.

Our commitment to these principles—to living them every day—is the brick and mortar of BlackRock's culture. Culture isn't an accident. It's an action. It has to be lived, and it has to be constantly renewed.

Culture is what unifies us. Culture reinforces ethical behavior and our fiduciary commitment to our clients, and it inhibits the improper behavior that would undermine our mission as a firm. Culture inspires employees to go above and beyond their responsibilities every day, to solve the most difficult problems, and to join together as One BlackRock to help people invest for retirement and achieve their most important financial goals.

Our culture has helped us make sure we never forget who we are, even as the markets, our industry, and even our firm have experienced constant and sometimes dramatic change.

We were able to learn from different individuals and different experiences, while never forgetting who we are and what we stand for—and that has been vital to our success.

Throughout it all, our commitment to serving our clients and to staying ahead of their needs has never wavered. BlackRock has always worked to anticipate and embrace the changes affecting our clients, the markets, and the financial services industry itself. And I have never felt better about our culture than I do today. It is stronger today than it has ever been—and I am confident that it will drive the next 30 years of success for BlackRock.

30 YEARS OF RESULTS

Since BlackRock's founding in 1988, the assets we manage for clients have grown from less than \$1 billion to more than \$6 trillion; our employees have grown from 8 to 14,000; we went from serving a handful of clients in one country to thousands of clients in more than 100 countries. We operate in 71 cities around the world and most recently opened offices in Budapest and Palo Alto. Since our IPO in 1999, our stock price has increased by forty times, delivering a 24% compounded annual growth rate, versus about 6% for the S&P 500.

We are able to create value for our shareholders because of our commitment to being a responsible fiduciary for our clients. It's our clients' trust in BlackRock and our partnership with them that is the foundation of our 2017 results.

- We generated record revenue, driven by 7% organic base fee growth, strong performance fees and 14% technology and risk management revenue growth.
- We expanded our operating margin by 40 basis points to 44.1%, as adjusted, while simultaneously investing back into our business for future growth.
- We returned \$2.8 billion to shareholders through a combination of dividends and share repurchases.

- All of which drove a 38% total return for our shareholders in 2017.

BlackRock generated \$367 billion of total net inflows, diversified across client types, asset classes, regions and investment styles. And we continued to see momentum across our platform.

We generated more than \$1 billion of net inflows in 13 individual countries and 68 funds, reflecting the breadth and diversification of our global investment platform and client relationships.

We increased our market share with key intermediary partners.

We generated strong investment performance for clients: 73%, 72% and 87% of our taxable fixed income, fundamental active equity and systematic active equity assets, respectively, have performed above their benchmarks or peer medians for the three-year period.

In *iShares*, we maintained our #1 market share of 2017 ETF inflows globally, in the US and in Europe, as well as within equities, fixed income, core exposures and smart beta. And we expect continued growth in *iShares* to be driven by the continued adoption of ETFs both by new users and for new uses.

We are continuing to make strategic investments to serve our clients' diverse needs, while positioning BlackRock for future growth.

% of Assets Performing Above Benchmark or Peer Median

Taxable Fixed Income

Tax-exempt Fixed Income

Fundamental Active Equity

Systematic Active Equity

And we are using our scale to drive better outcomes for our clients and results for our shareholders.

- We seeded or co-invested \$1.1 billion into products as we built new and innovative investment capabilities, including alternative, ESG-related, and self-indexed offerings. We launched our first-ever self-indexed, smart beta fixed income funds in 2017, which deliver a strategy to clients that wasn't currently available in the form of an index before.
- We are using the powerful combination of human insights, technology and scale to position our equity investment platform for the future of alpha generation. We unified our active equity team so that both fundamental and systematic active equity investors could share learnings from their unique research techniques.
- We launched the Advantage Series to offer clients a lower risk, lower cost systematically managed alpha-seeking strategy, which has already seen momentum in net inflows since its launch in 2017. These funds are another example of BlackRock using the benefits of our scale to deliver sustainable alpha to our clients; another step in the buildout of our spectrum of investment strategies; and our first quantitative offering for the wealth market.
- We bought Cachematrix to enhance our scale in the cash management industry and build on our digital distribution offerings. We now manage \$450 billion in cash management strategies and see future growth opportunities in the current environment.
- We acquired First Reserve's Energy Infrastructure funds

to offer clients additional outcome-based infrastructure solutions.

- We expanded and unified our portfolio construction capabilities to ensure that we are the leader in delivering more rigorous portfolio- and outcome-oriented advice and investment solutions for clients.
- We continue to invest in ways to reach clients in fast growing areas. We reaffirmed our belief in the long-term growth potential of the Mexican market through our agreement to acquire Citibanamex's asset management business. The combined firm will broaden BlackRock's access to Mexico's wealth management market, provide clients access to BlackRock's international products, and build a partnership to create innovative multi-asset solutions.
- We also obtained our private fund management registration in China, which enables us to manufacture and privately distribute onshore funds in China to qualified institutional and high-net-worth Chinese investors.

LONG-TERM STRATEGY

Just as we advocate for the importance and benefits of clients consistently investing to create better financial futures, we also believe in investing in BlackRock with that same long-term approach. The first 30 years of our history were about building a unique and powerful combination of components to meet and anticipate our clients' needs. The next 30 will be about bringing those components ever closer together and integrating ourselves more deeply into our clients' ecosystems.

The steps we took in 2017 are consistent with our firm's long-term strategy, which we reviewed with our Board at the start of 2017. At the beginning of this year, we again reviewed our long-term strategy with our Board, including a discussion of the evolving landscape in which we are operating.

There are a variety of trends reshaping the asset management industry, including: rapid advancements in technology, heightened regulatory scrutiny, and changing priorities of investors, who are demanding better performance and value for the fees they pay. BlackRock is uniquely positioned to respond to these challenges and transform them into opportunities by creating solutions that meet our clients' needs. **That focus on clients forms the foundation of our two-pronged strategy to drive the future growth of the business.**

First, we are focused on being a market leader in the areas of greatest client demand—those markets and investment opportunities that will generate the highest growth in the future. Some of these areas of growth are those in which we are already a market leader and will need to continue executing with our current business, like ETFs and factor investing, while others are areas in which we have lower market share today, but see tremendous growth opportunities in the future, such as illiquid alternatives.

Second, we seek to leverage the full capabilities of our platform with broader participation across the investment ecosystem—embedding ourselves more deeply at different steps of the value chain. In doing so, we will strengthen our competitive advantages and further differentiate BlackRock in the eyes of our clients and shareholders. This includes continuing to invest in enhancing efficiency between custodians and asset managers, growing our digital wealth presence, and

reaching more individual investors through tech-enabled intermediary relationships.

And as we execute against this two-pronged strategy for growth, we are also keenly focused on several large-scale longer-term ambitions that have the potential to dramatically reshape our firm and our industry over time: Retirement, Technology and high-growth markets such as China.

GLOBAL RETIREMENT CHALLENGE

Despite having a long and clear line of sight into the escalating global retirement crisis, governments, employers, insurance companies, and wealth and asset managers have failed to widely implement solutions that ensure access to a safe and secure retirement for everyone. While the challenges vary around the globe, there are a few key areas that impact a great number of investors: insufficient savings, lack of access, improper investing, lack of guaranteed income, and pension shortfalls.

Some individuals are partially invested but hold too much cash. Others aren't invested at all—even if they earn sufficient income—out of fear, or because they lack the tools or the advice to invest effectively. And then there are those workers who have no retirement savings or have no access to retirement plans at all—individuals who are excluded from building a secure retirement through investing. For these individuals, national pensions yielding 3%—such as Social Security—simply will never be sufficient to provide for retirement. Even the strongest systems, such as Australia's, face challenges around helping workers manage their cash flows in retirement.

Demographically, we are at the beginning of a seismic shift. Between 2017 and 2030, the

world's population aged 60 years or older is projected to grow by 46%, to 1.4 billion. As people live longer and longer, the world's retirement systems come under more and more pressure. And the longer we wait, the deeper and more complicated the problem becomes. We are already at an inflection point: the deep populist sentiment around the world is driven by frustration and fear about the future—including the prospects for a secure retirement. We must find a solution. We cannot accept a system that excludes so many individuals from the benefits of investing, and political lethargy is not an acceptable excuse for leaving billions of human beings unprepared for retirement.

Though the specifics of each market are different, the combination of increased longevity, weak retirement systems, and an underappreciation of the benefits of investing demands action.

We must continue to improve education and sentiment around investing so that older workers can mitigate the pressures of underinvestment, and so that as younger workers enter the workforce, they understand the importance of compounding returns and investing early in order to prepare for retirement. At the same time, we have to rebuild public and private retirement systems so that they cover more individuals and maximize returns more effectively. We should more broadly incorporate behavioral tools such as auto-enrollment,

which automatically enrolls individuals in workplace retirement plans, and auto-escalation, which can help individuals enhance their savings by periodically increasing contribution levels.

A key goal is to help more people begin investing—for example, by building technology that makes it easier for them learn about and understand the virtues of investing. We are also committed to innovation in areas that span both the accumulation and decumulation components of investing for the future, by building more transparent and flexible guaranteed-income products. And we are focused on partnering with companies and governments to improve existing retirement systems and, in particular, help build solutions for workers without access to retirement plans. Technology will play a significant role in those solutions.

TECHNOLOGY EVOLUTION

Rapid changes in technology—including the exponential growth of data collection, the rise of artificial intelligence, advances in computing power and consumers' greater interaction with technology for daily tasks—have the potential to transform the asset management industry. In pursuit of technology-enabled growth, BlackRock continues to focus on opportunities to accelerate internal innovations and adopt external technologies.

BlackRock is committed to being part of the solution.

As part of our tech2020 transformation, we are opening the *Aladdin* platform to drive further development and engagement, and we are simultaneously going beyond *Aladdin* to leverage data science, machine learning and artificial intelligence to find new sources of alpha for investments, leverage BlackRock's scale in our operations, and build a more data-driven feedback loop in the sales and product development process.

In the near-term, our ambition is to bring the tremendous capabilities of *Aladdin* to more investors and clients.

To enable this transformation, we are systematically investing in resources commensurate with our ambitions—including growing our population of technologists by attracting, developing and retaining top talent across the organization.

In early 2018, we also established the BlackRock Lab for Artificial Intelligence in Palo Alto. The Lab will advance how BlackRock uses artificial intelligence and associated disciplines—machine learning, data science, natural language processing—to improve outcomes and drive progress for investors, clients, and the firm. We also established Data Science Core—a central hub to formalize data science efforts already under way and leverage artificial intelligence to solve high priority problems across the firm while driving consistent standards, best practices, and expanding BlackRock's data science community.

In recent years, BlackRock has taken important strides to build our digital wealth business—connecting to distribution partners and ultimately end investors through technology that drives better investing behaviors and outcomes. Our digital products—*iRetire*, *FutureAdvisor*, *Aladdin Risk for Wealth Management*, and our

partners, *iCapital* and *Scalable Capital*—have reached tens of thousands of financial advisors and millions of end investors. In 2017, we established a Digital Wealth group to build on this progress and deepen our relationships with wealth management partners through technology, as well as drive internal product development and explore investment opportunities.

OPPORTUNITIES IN HIGH-GROWTH MARKETS, INCLUDING CHINA

One of the most critical priorities for BlackRock today and into the future is increasing our presence and penetration in high-growth markets around the world, particularly in Asia and especially China. Demographic, economic, and regulatory shifts—including high savings rates and rapid growth in household financial assets in these markets—will create significant opportunities for BlackRock over time.

Our current presence in China has historically been restricted. However, recent developments—especially in the regulatory environment—present significant opportunities for future growth. In November 2017, the

Chinese government announced that foreign asset managers can own up to 51% of a domestic Fund Management Company, with the option of 100% ownership after three years (previously capped at 49%). This latest regulatory opening, together with other recent market developments, could significantly expand the prospect to grow our footprint in the market.

BlackRock also obtained our Private Fund Management registration in 2017, which allows us to both manufacture and privately distribute investment products in China to qualified onshore institutions and high net worth individuals.

While we believe China is a significant long-term opportunity for BlackRock, it will require time and patience as we continue to watch this market evolve. In the meantime, we are preparing to bring our expertise in investing, risk management and technology, as well as our ability to understand the needs of local clients, to bear if and when the market opens further.

Consistent with our approach to date, we aim to have a truly local presence and respond to the unique needs, objectives, and cultures of investors in each market. By executing on our strategy in high growth markets, continuing to embed ourselves in the investment ecosystem,

pressing our competitive advantages and relentlessly challenging ourselves to realize our longer-term ambitions, we are positioning ourselves to do more for our clients than ever before. We remain conscious that our ecosystem will continue to evolve and at times that will require us to pivot, but we will remain true to our mission to optimize the solutions we can deliver to our clients and position our business for long-term growth.

In order to deliver on our firm strategy for our clients, shareholders and employees, we are committed to operating BlackRock for the long term, including maintaining a strong corporate governance framework, advocating for our clients' long-term interests, and constantly improving the development of our employees and our operations.

OPERATING BLACKROCK FOR THE LONG-TERM

STRONG GOVERNANCE

One of the key pillars of our long-term strategy is a **strong corporate governance framework**, including an effective and accountable Board of Directors. BlackRock is very fortunate to have such a passionate and dynamic Board of Directors – a group of Directors with true independence of mind.

Much of BlackRock's success can be attributed to the Board's robust engagement with our management team, our employees and our clients. Between Board meetings,

BlackRock's Directors remain in close contact with me, our President Rob Kapito, and other senior leaders, offering guidance and feedback throughout the year. Each member of the Board is involved in mentoring a member of senior management. Additionally, each member of BlackRock's Board has an employee keycard, with full access to every location and every BlackRock employee around the world. This seemingly small detail represents something much greater: our belief that an engaged, informed, and involved Board is an essential component of our success.

The **diverse backgrounds of our Directors** also play a significant role in their ability as a whole to evaluate BlackRock's management

and operations, assess risk and opportunities for our business and challenge our management team. We make diversity in gender, ethnicity, age, career experience, and geographic location, as well as diversity of mind, a priority when considering Director candidates. As of March 2018, BlackRock has five female Directors, and our Directors come from seven different countries. This diversity has enhanced our Board's involvement in our company's long-term strategy and inspired deeper engagement with management, employees and clients around the world.

This year, Abdlatif Al-Hamad and James Grosfeld will both be leaving our Board. Abdlatif has given the Board and BlackRock invaluable wisdom and guidance as we have grown in the Gulf region and as a firm globally. Jimmy is someone I first knew as a client, before we even founded BlackRock. He was involved from the day we started the firm, and I have been learning from him for close to 40 years. His advice has always meant and continues to mean a great deal to me. Both Abdlatif and Jimmy have been instrumental in guiding the Board's oversight, and I want to sincerely thank them for their passion and dedication to BlackRock during their tenures.

Last month, we appointed three new Directors to our Board: Bill Ford, Peggy Johnson and Mark Wilson, and we will benefit greatly from their guidance and advice. Peggy's perspective on

technology and the innovation economy, Bill's understanding of the changing financial services landscape, particularly as it relates to fin-tech and China, and Mark's deep experience in Europe and Asia-Pacific will be a tremendous benefit to BlackRock's management, shareholders and clients, as they reflect BlackRock's current and future priorities.

ADVOCATING AS A FIDUCIARY FOR OUR CLIENTS' LONG-TERM INTERESTS

With BlackRock's growth, especially in our index business, comes an evolving responsibility. A crucial part of that responsibility is advocating on behalf of our clients for practices that we believe enhance long-term returns. As index investing continues to grow, so does the importance of this type of engagement. Since we cannot sell the shares of companies that our index clients are invested in—even if we disagree with management—our engagement and proxy voting practices are an essential component of how we serve our clients.

Our Investment Stewardship group engages extensively with companies around the world on issues that are material to companies' long-term financial sustainability. Over the past several years, we have written letters to company CEOs emphasizing the importance of a long-term approach. We've asked them to articulate their long-term growth strategies; to ensure proper governance; and to address other material social and environmental issues relevant to their business models—all steps that we believe indicate the good management that drives long-term growth. The team's 2018 priorities include: corporate strategy, governance (including Board diversity), climate risk disclosure, compensation, and human capital management policies.

We also announced in early 2018 that Barbara Novick, Vice Chairman of the firm and one of my fellow

Another pillar of our long-term strategy is to operate the firm itself in a sustainable manner—so that we can continue to deliver value to clients, shareholders, employees and the communities in which we operate.

co-founders, would oversee our Investment Stewardship group. We will double the size of our team in order to drive deeper and more productive conversations with companies, which will help drive the long-term value of our clients' investments. We continue to learn from our clients, company management teams and the industry, as we work towards leading best practices in stewardship activities and promoting strong corporate governance.

The issues that our investment stewardship team focuses on can provide valuable insight for investors on the quality of corporate management. In our investment processes, we examine business-relevant sustainability issues that can contribute to a company's long-term financial performance. For all of our investment professionals, this means we are expanding access to data, insights and learnings on sustainability-related risks and opportunities to keep them well-informed in their decision-making process.

We also manage a broad suite of dedicated sustainable investment solutions to meet increasing client demand. We do not view sustainable investment solutions as an exercise in trading return for social outcomes. Instead, by identifying scalable, sustainable investment solutions that can enhance long-term returns,

we can improve financial outcomes for our clients and accelerate the adoption of sustainable business practices globally.

OUR PEOPLE AND OUR OPERATIONS

BlackRock's business model is not carbon intensive, but we are committed to **managing our impact on the environment**, pursuing a sustainability strategy that decouples our growth from environmental impact. Throughout our offices, we focus on reducing carbon emissions by decreasing energy consumption through demand reduction and infrastructure investments, and by diverting waste from landfills. We prioritize high utilization rates of our offices; we invest in LED technology and green buildings; and our consolidated data centers are among the most energy efficient, in addition to being hydro-powered. We also continue to expand our use of renewable energy. I am proud to report that by the end of 2018, in the US, we will be at 100% renewable energy and by 2020, we will achieve that globally through working with our local utilities and entering into power purchase agreements to cover the areas for which we do not have operational control.

As a human capital intensive business, **our long-term sustainability depends on our people**. And as BlackRock grows, the importance of our

talent strategy has only intensified. We operate as a global firm, with 14,000 employees in 30 different countries who speak more than 100 languages. We also serve millions of clients from different cultures around the world. **We are committed to cultivating and advancing diversity and inclusion in all forms across our organization** because we believe a wide range of perspectives and talent is crucial to creating a richer culture for our employees and a better experience for our clients.

We hired 390 talented new individuals into our analyst class of 2017, 53% of whom are women. These individuals are also our most ethnically diverse class yet. We are extremely focused on increasing both the percentages of female and ethnically diverse senior leaders at the firm. To foster an environment that attracts and retains top talent, providing employees with robust development opportunities is of the utmost importance, including extensive opportunities for financial and technology training and exposure to new roles across the firm.

In keeping with BlackRock's role in society, **we're dedicated to helping our employees build sound financial futures for themselves and their families.** We provide our employees access to a variety of resources, learning opportunities and expert guidance to help them prepare for and achieve their financial goals at each stage of their lives, including retirement.

We also support our employees **in giving back and volunteering in their local communities** and globally for environmental and social efforts that move them. The focus of our philanthropic initiatives—which we align with BlackRock's purpose as a company—is to create financial security and opportunity through better jobs and building savings for people most in need.

FOUNDATION FOR THE NEXT 30 YEARS

Six years ago, just before my father passed away at the age of 87, he and I discussed for the first time the outcome of all of those years he spent putting away money and investing for the future. The power of time, conviction, confidence and compounding had left him with roughly 70 times what he and my mother would have earned on a gross basis in an average year. 70 times. I'm still shocked to this day. I have always focused on the long-term benefits of investing, but this was the most real, close-to-home example of what patient, long-term investing could yield.

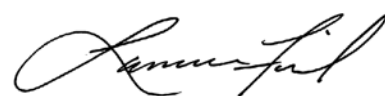

Just as I learned from my father to invest each day towards a long-term goal, that has been, and will remain, our approach both within BlackRock and in the way we strive to serve our full set of stakeholders: our clients, our shareholders, our employees and savers and investors around the world.

We achieve that by living our principles every day. We achieve it by embracing our social purpose and contributing to the world in which we operate: The environment and communities that we call our home. The people who we serve and the people who work to serve them.

When I walk through the halls of BlackRock, when I meet with employees, I see how deeply each individual at the firm lives our culture. That commitment is what gives me the confidence in our future as a firm and our ability to make a positive impact on the world.

The strength of our culture is what makes our platform more capable and better positioned for the future than it has been at any time in our history. It's what drives performance. It's what drives us to relentlessly innovate and stay ahead of our clients' needs. As I think about the next year, the next five years and even the next 30 years, it is that unwavering focus on our principles and embodiment of our culture by our people that will propel BlackRock and its clients forward for years to come.

Sincerely,
Larry Fink

Important Notes

OPINIONS

Opinions expressed through page 25 are those of BlackRock, Inc. as of March 2018 and are subject to change.

BLACKROCK DATA POINTS

All data through page 25 reflects as-adjusted full-year 2017 results or as of December 31, 2017, unless otherwise noted. 2017 organic growth is defined as full-year 2017 net flows divided by assets under management (AUM) for the entire firm, a particular segment or particular product as of December 31, 2016.

Long-term product offerings include active and passive strategies across equity, fixed income, multi-asset and alternatives, and exclude AUM and flows from the cash management and advisory businesses.

GAAP AND AS-ADJUSTED RESULTS

See pages 37-38 of the Financial Section of the 10-K for explanation of the use of Non-GAAP Financial Measures.

PERFORMANCE NOTES

Past performance is not indicative of future results. Except as specified, the performance information shown is as of December 31, 2017 and is based on preliminary data available at that time. The performance data shown reflects information for all actively and passively managed equity and fixed income accounts, including US registered investment companies, European-domiciled retail funds and separate accounts for which performance data is available, including performance data for high net worth accounts available as of November 30, 2017. The performance data does not include accounts terminated prior to December 31, 2017 and accounts for which data has not yet been verified. If such accounts had been included, the performance data provided may have substantially differed from that shown.

Performance comparisons shown are gross-of-fees for institutional and high net worth separate

accounts, and net-of-fees for retail funds. The performance tracking shown for index accounts is based on gross-of-fees performance and includes all institutional accounts and all *iShares* funds globally using an index strategy. AUM information is based on AUM available as of December 31, 2017 for each account or fund in the asset class shown without adjustment for overlapping management of the same account or fund. Fund performance reflects the reinvestment of dividends and distributions.

Performance shown is derived from applicable benchmarks or peer median information, as selected by BlackRock, Inc. Peer medians are based in part on data either from Lipper Inc. or Morningstar, Inc. for each included product.

Item 1. Business

OVERVIEW

BlackRock, Inc. (together, with its subsidiaries, unless the context otherwise indicates, “BlackRock” or the “Company”) is a leading publicly traded investment management firm with \$6.288 trillion of assets under management (“AUM”) at December 31, 2017. With approximately 13,900 employees in more than 30 countries who serve clients in over 100 countries across the globe, BlackRock provides a broad range of investment, risk management and technology services to institutional and retail clients worldwide.

Our diverse platform of alpha-seeking active, index and cash management investment strategies across asset classes enables the Company to tailor investment outcomes and asset allocation solutions for clients. We offer single- and multi-asset class portfolios investing in equities, fixed income, alternatives and money market instruments. Products are offered directly and through intermediaries in a variety of vehicles, including open-end and closed-end mutual funds, *iShares*® exchange-traded funds (“ETFs”), separate accounts, collective investment trusts and other pooled investment vehicles. BlackRock also offers the investment and risk management technology platform, *Aladdin*®, risk analytics, advisory and technology services and solutions to a broad base of institutional and wealth management clients. The Company is highly regulated and manages its clients’ assets as a fiduciary. We do not engage in proprietary trading activities that could conflict with the interests of our clients.

BlackRock serves a diverse mix of institutional and retail clients across the globe. Clients include tax-exempt institutions, such as defined benefit and defined contribution pension plans, charities, foundations and endowments; official institutions, such as central banks, sovereign wealth funds, supnationals and other government entities; taxable institutions, including insurance companies, financial institutions, corporations and third-party fund sponsors, and retail investors.

BlackRock maintains a significant global sales and marketing presence that is focused on establishing and maintaining retail and institutional investment management and technology service relationships by marketing its services to investors directly and through third-party distribution relationships, including financial professionals and pension consultants.

BlackRock is an independent, publicly traded company, with no single majority shareholder and over two-thirds of its Board of Directors consisting of independent directors. At December 31, 2017, The PNC Financial Services Group, Inc. (“PNC”) held 21.2% of BlackRock’s voting common stock and 21.7% of BlackRock’s capital stock, which includes outstanding common and nonvoting preferred stock.

Management seeks to deliver value for stockholders over time by, among other things, capitalizing on BlackRock’s differentiated competitive position, including:

- the Company’s focus on strong performance providing alpha for active products and limited or no tracking error for index products;
- the Company’s global reach and commitment to best practices around the world, with approximately 49% of employees outside the United States serving clients locally and supporting local investment capabilities. Approximately 40% of total AUM is managed for clients domiciled outside the United States;
- the Company’s breadth of investment strategies, including market-cap weighted index, smart beta and factor-based, high conviction alpha and liquid and illiquid alternative product offerings, which enhance its ability to tailor single- and multi-asset investment solutions to address specific client needs;
- the Company’s differentiated client relationships and fiduciary focus, which enable effective positioning toward changing client needs and macro trends including the secular shift to index investing and ETFs, a focus on income and retirement, and barbell of risk using index and active products, including alternatives; and
- the Company’s longstanding commitment to innovation, technology and risk management and the continued development of, and increased interest in, BlackRock technology products and solutions, including *Aladdin*, *Aladdin Risk for Wealth Management*, *Cachematrix*, and *FutureAdvisor*, as well as *Scalable Capital* and *iCapital*, in which BlackRock has made minority investments.

BlackRock operates in a global marketplace impacted by changing market dynamics and economic uncertainty, factors that can significantly affect earnings and stockholder returns in any given period.

The Company’s ability to increase revenue, earnings and stockholder value over time is predicated on its ability to generate new business, including business in *Aladdin* and other technology products and services. New business efforts depend on BlackRock’s ability to achieve clients’ investment objectives in a manner consistent with their risk preferences and to deliver excellent client service. All of these efforts require the commitment and contributions of BlackRock employees. Accordingly, the ability to attract, develop and retain talented professionals is critical to the Company’s long-term success.

N/A — not applicable

(1) Net of net income (loss) attributable to noncontrolling interests ("NCI") (redeemable and nonredeemable).

(2) BlackRock reports its financial results in accordance with accounting principles generally accepted in the United States ("GAAP"); however, management believes evaluating the Company's ongoing operating results may be enhanced if investors have additional non-GAAP financial measures.

See "Item 7 — Management's Discussion and Analysis of Financial Condition and Results of Operations — Non-GAAP Financial Measures", for further information on non-GAAP financial measures and for as adjusted items for 2017, 2016, and 2015.

In 2014, general and administration expense relating to the reduction of an indemnification asset has been excluded since it is directly offset by a tax benefit of the same amount and, consequently, did not impact BlackRock's book value. In 2013, the Company made a charitable contribution of the Company's investment in PennyMac Financial Services, Inc. ("PennyMac") to a donor advised fund. The expense related to the charitable contribution was excluded from operating income, as adjusted, due to its nonrecurring nature and because the noncash, nonoperating pre-tax gain directly related to the contributed PennyMac investment was reported in nonoperating income (expense). In 2014 and 2013, the portion of compensation expense associated with certain long-term incentive plans ("LTIP") funded, or to be funded, through share distributions to participants of BlackRock stock held by PNC has been excluded because it ultimately did not impact BlackRock's book value. Compensation expense associated with appreciation (depreciation) on investments related to certain BlackRock deferred compensation plans has been excluded as returns on investments set aside for these plans, which substantially offset this expense, are reported in nonoperating income (expense).

(3) Net income attributable to BlackRock, Inc., as adjusted, and diluted earnings per common share, as adjusted exclude the after-tax impact of the items referred to above and also include the effect on deferred income tax expense resulting from certain income tax matters.

(4) Percentage represents compounded annual growth rate ("CAGR") over a five-year period (2012-2017).

ASSETS UNDER MANAGEMENT

The Company's AUM by product type for the years 2013 through 2017 is presented below.

<i>(in millions)</i>	December 31,					5-Year CAGR ⁽¹⁾
	2017	2016	2015	2014	2013	
Equity	\$ 3,371,641	\$ 2,657,176	\$ 2,423,772	\$ 2,451,111	\$ 2,317,695	13%
Fixed income	1,855,465	1,572,365	1,422,368	1,393,653	1,242,186	8%

Alternatives	109,795	8,634	17,736	(1,718)	(5,100)	129,347	3%
Long-term	3,482,366	961,185	32,416	1,554,352	(193,588)	5,836,731	11%
Cash management	263,743	110,751	80,635	3,045	(8,225)	449,949	11%
Advisory	45,479	(39,090)	—	759	(5,633)	1,515	(49%)
Total	\$ 3,791,588	\$ 1,032,846	\$ 113,051	\$ 1,558,156	\$ (207,446)	\$ 6,288,195	11%

(1) Amounts include AUM acquired from Credit Suisse's ETF franchise ("Credit Suisse ETF Transaction") in July 2013 and MGPA in October 2013. Amounts also include AUM acquired in the acquisition of certain assets of BlackRock Kelso Capital Advisors LLC ("BKCA") in March 2015, AUM acquired from Infraestructura Institucional and FutureAdvisor in October 2015, AUM acquired in the BofA® Global Capital Management transaction in April 2016, and AUM acquired in the acquisition of the equity infrastructure franchise of First Reserve ("First Reserve Transaction") in June 2017. In addition, amounts include other reclassifications to conform to current period combined AUM policy and presentation.

(2) Percentage represents CAGR over a five-year period (2012-2017).

AUM represents the broad range of financial assets we manage for clients on a discretionary basis pursuant to investment management agreements that are expected to continue for at least 12 months. In general, reported AUM reflects the valuation methodology that corresponds to the basis used for determining revenue (for example, net asset value). Reported AUM does not include assets for which we provide risk management or other forms of nondiscretionary advice, or assets that we are retained to manage on a short-term, temporary basis.

Investment management fees are typically earned as a percentage of AUM. We also earn performance fees on certain portfolios relative to an agreed-upon benchmark or return hurdle. On some products, we also may earn securities lending revenue. In addition, BlackRock offers its proprietary *Aladdin* investment system as well as risk management, outsourcing, advisory and other technology

services, to institutional investors and wealth management intermediaries. Revenue for these services may be based on several criteria including value of positions, number of users or accomplishment of specific deliverables.

At December 31, 2017, total AUM was \$6.288 trillion, representing a CAGR of 11% over the last five years. AUM growth during the period was achieved through the combination of net market valuation gains, net inflows and acquisitions, including Credit Suisse and MGPA, which collectively added \$26.9 billion of AUM in 2013, BKCA, Infraestructura Institucional and FutureAdvisor, which collectively added \$2.2 billion of AUM in 2015, BofA Global Capital Management which added \$80.6 billion of AUM in 2016 and First Reserve which added \$3.3 billion of AUM in 2017. Our AUM mix encompasses a broadly diversified product range, as described below.

The Company considers the categorization of its AUM by client type, product type, investment style, and client region useful to understanding its business. The following discussion of the Company's AUM will be organized as follows:

Client Type	Product Type	Investment Style	Client Region
<input type="checkbox"/> Retail	<input type="checkbox"/> Equity	<input type="checkbox"/> Active	<input type="checkbox"/> Americas
<input type="checkbox"/> <i>iShares</i> ETFs	<input type="checkbox"/> Fixed Income	<input type="checkbox"/> Index and <i>iShares</i> ETFs	<input type="checkbox"/> Europe, the Middle East and Africa ("EMEA")
<input type="checkbox"/> Institutional	<input type="checkbox"/> Multi-asset		<input type="checkbox"/> Asia-Pacific
	<input type="checkbox"/> Alternatives		
	<input type="checkbox"/> Cash Management		

CLIENT TYPE

BlackRock serves a diverse mix of institutional and retail clients across the globe, with a regionally focused business model. BlackRock leverages the benefits of scale across global investment, risk and technology platforms while at the same time using local distribution presence to deliver solutions for clients. Furthermore, our structure facilitates strong teamwork globally across both functions and regions in order to enhance our ability to leverage best practices to serve our clients and continue to develop our talent.

Clients include tax-exempt institutions, such as defined benefit and defined contribution pension plans, charities, foundations and endowments; official institutions, such as

central banks, sovereign wealth funds, supranationals and other government entities; taxable institutions, including insurance companies, financial institutions, corporations and third-party fund sponsors, and retail investors.

iShares ETFs are a growing component of both institutional and retail client portfolios. However, as *iShares* ETFs are traded on exchanges, complete transparency on the ultimate end-client is unavailable. Therefore, *iShares* ETFs are presented as a separate client type below, with investments in *iShares* ETFs by institutions and retail clients excluded from figures and discussions in their respective sections.

AUM by investment style and client type at December 31, 2017 is presented below.

(in millions)	Retail	iShares ETFs	Institutional	Total
Active	\$ 556,697	\$ —	\$ 1,139,308	\$ 1,696,005
Non-ETF Index	71,680	—	2,316,807	2,388,487
iShares ETFs	—	1,752,239	—	1,752,239
Long-term	628,377	1,752,239	3,456,115	5,836,731
Cash management	24,354	—	425,595	449,949
Advisory	—	—	1,515	1,515
Total	\$ 652,731	\$ 1,752,239	\$ 3,883,225	\$ 6,288,195

Retail

BlackRock serves retail investors globally through a wide array of vehicles across the investment spectrum, including separate accounts, open-end and closed-end funds, unit trusts and private investment funds. Retail investors are served principally through intermediaries, including broker-dealers, banks, trust companies, insurance companies and independent financial advisors. Technology solutions and digital distribution tools are increasing the number of financial advisors and end-retail clients using BlackRock products. Retail represented 11% of long-term AUM at December 31, 2017 and 32% of long-term base fees for 2017.

iShares ETFs have a significant retail component, but is shown separately below. With the exclusion of iShares ETFs, retail AUM is predominantly comprised of active mutual funds. Mutual funds totaled \$519.4 billion, or 83%, of retail long-term AUM at year-end, with the remainder invested in private investment funds and separately managed accounts (“SMAs”). 89% of retail long-term AUM is invested in active products.

Component changes in retail long-term AUM for 2017 are presented below.

(in millions)	December 31, 2016	Net inflows (outflows)	Market change	FX impact	December 31, 2017
Equity	\$ 196,221	\$ 4,145	\$ 26,598	\$ 6,254	\$ 233,218
Fixed income	222,256	24,503	6,655	4,157	257,571
Multi-asset	107,997	1,143	10,687	1,028	120,855
Alternatives	15,478	101	708	446	16,733
Total	\$ 541,952	\$ 29,892	\$ 44,648	\$ 11,885	\$ 628,377

The retail client base is diversified geographically, with 68% of long-term AUM managed for investors based in the Americas, 26% in EMEA and 6% in Asia-Pacific at year-end 2017.

- *U.S. retail* long-term net inflows of \$13.7 billion were led by fixed income inflows of \$13.1 billion. Fixed income net inflows were diversified across exposures and products, with strong flows into our municipal, unconstrained and total return bond offerings. Equity net inflows of \$1.3 billion were driven by flows into our index mutual funds, and we continued to make progress

on the repositioning of our active equity platform. Multi-asset net outflows of \$0.9 billion were primarily due to outflows from world allocation strategies.

- *International retail* long-term net inflows of \$16.2 billion were positive across major regions and diversified across asset classes. Fixed income products generated net inflows of \$11.4 billion, led by emerging markets debt, unconstrained and short duration strategies. Equity net inflows of \$2.8 billion reflected strong flows into international equities. Multi-asset net inflows of \$2.0 billion were driven by flows into the cross-border version of our Multi-Asset Income fund.

iShares ETFs

iShares is the leading ETF provider in the world, with \$1.8 trillion of AUM at December 31, 2017 and was the top asset gatherer globally in 2017¹ with record net inflows of \$245.3 billion resulting in an organic growth rate of 19%. Equity net inflows of \$174.4 billion were driven by flows into Core funds and into products with U.S. and broad developed market equity exposures. Record fixed income net inflows of \$67.5 billion were diversified across exposures and product lines, led by flows into Core, corporate and treasury bond funds. iShares ETF multi-asset and alternative funds contributed a combined \$3.5 billion of net inflows, primarily into commodities funds. iShares ETFs represented 30% of long-term AUM at December 31, 2017 and 40% of long-term base fees for 2017.

Component changes in iShares ETFs AUM for 2017 are presented below.

(in millions)	December 31, 2016	Net inflows	Market change	FX impact	December 31, 2017
Equity	\$ 951,252	\$ 174,377	\$ 189,472	\$ 14,509	\$ 1,329,610
Fixed income	314,707	67,451	4,497	8,597	395,252
Multi-asset	3,149	322	280	10	3,761
Alternatives ⁽¹⁾	18,771	3,192	1,478	175	23,616
Total	\$ 1,287,879	\$ 245,342	\$ 195,727	\$ 23,291	\$ 1,752,239

(1) Amounts include commodity iShares ETFs.

Our broad iShares ETF product range offers investors a precise, transparent and efficient way to gain exposure to a full range of asset classes and global markets that have been difficult for many investors to access, as well as the liquidity required to make adjustments to their exposures quickly and cost-efficiently.

- U.S. iShares ETF AUM ended 2017 at \$1.3 trillion with \$201.3 billion of net inflows driven by strong demand for Core funds and U.S. and broad developed market

equities as well as a diverse range of fixed income products.²

- International iShares ETF AUM ended 2017 at \$424.7 billion with net inflows of \$44.1 billion led by equity net inflows of \$29.0 billion, which reflected strong flows into our international Core funds in Canada and Europe.

Institutional

BlackRock serves institutional investors on six continents in sub-categories including: pensions, endowments and foundations, official institutions, and financial institutions; institutional AUM is diversified across product and region.

Component changes in institutional long-term AUM for 2017 are presented below.

(in millions)	December 31, 2016	Net inflows (outflows)	Acquisition ⁽¹⁾	Market change	FX impact	December 31, 2017

Institutional active AUM ended 2017 at \$1.1 trillion, reflecting \$5.9 billion of net inflows. Institutional active represented 19% of long-term AUM and 18% of long-term base fees. Growth in AUM reflected continued strength in multi-asset products with net inflows of \$19.6 billion reflecting ongoing demand for solutions offerings and the *LifePath*[®] target-date suite. Alternatives net inflows of \$0.6 billion were led by inflows into infrastructure, hedge fund solutions and alternatives solutions offerings. Excluding return of capital and investment of \$6.0 billion, alternatives net inflows were \$6.6 billion. In addition, 2017 was another strong fundraising year for illiquid alternatives, and we raised approximately \$11 billion in new commitments, which will be a source of future net inflows. Equity and fixed income net outflows were \$13.6 billion and \$0.7 billion, respectively.

Institutional index AUM totaled \$2.3 trillion at December 31, 2017, reflecting net inflows of \$49.1 billion. Fixed income net inflows of \$87.5 billion were driven by demand for liability-driven investment solutions, particularly in Europe. Equity net outflows of \$34.8 billion were primarily due to low-fee regional index equity outflows as clients looked to re-allocate, re-balance or meet their cash needs. Alternatives net outflows of \$2.9 billion reflected outflows from passive currency overlays. Institutional index represented 40% of long-term AUM at December 31, 2017 and accounted for 10% of long-term base fees for 2017.

The Company's institutional clients consist of the following:

- Pensions, Foundations and Endowments. BlackRock is among the world's largest managers of pension plan assets with \$2.403 trillion, or 69%, of long-term institutional AUM managed for defined benefit, defined

contribution and other pension plans for corporations, governments and unions at December 31, 2017. The market landscape continues to shift from defined benefit to defined contribution, driving strong flows in our defined contribution channel, which had \$46.5 billion of long-term net inflows for the year, driven by continued demand for our *LifePath* target-date suite. Defined contribution represented \$887.1 billion of total pension AUM, and we remain well positioned to capitalize on the on-going evolution of the defined contribution market and demand for outcome-oriented investments. An additional \$76.4 billion, or 2%, of long-term institutional AUM was managed for other tax-exempt investors, including charities, foundations and endowments.

- Official Institutions. BlackRock managed \$195.3 billion, or 6%, of long-term institutional AUM for official institutions, including central banks, sovereign wealth funds, supranationals, multilateral entities and government ministries and agencies at year-end 2017. These clients often require specialized investment advice, the use of customized benchmarks and training support.
- Financial and Other Institutions. BlackRock is a top independent manager of assets for insurance companies, which accounted for \$274.3 billion, or 8%, of institutional long-term AUM at year-end 2017. Assets managed for other taxable institutions, including corporations, banks and third-party fund sponsors for which we provide sub-advisory services, totaled \$506.9 billion, or 15%, of long-term institutional AUM at year-end.

PRODUCT TYPE AND INVESTMENT STYLE

Component changes in AUM by product type and investment style for 2017 are presented below.

(1) Amount represents AUM acquired in the First Reserve Transaction.

Long-term product offerings include alpha-seeking active and index strategies. Our alpha-seeking active strategies seek to earn attractive returns in excess of a market benchmark or performance hurdle while maintaining an appropriate risk profile, and leverage fundamental research and quantitative models to drive portfolio construction. In contrast, index strategies seek to closely track the returns of a corresponding index, generally by investing in substantially the same underlying securities within the index or in a subset of those securities selected to approximate a similar risk and return profile of the index. Index strategies include both our non-ETF index products and *iShares* ETFs.

Although many clients use both alpha-seeking active and index strategies, the application of these strategies may differ. For example, clients may use index products to gain exposure to a market or asset class, or may use a combination of index strategies to target active returns. In addition, institutional non-ETF index assignments tend to be very large (multi-billion dollars) and typically reflect low fee rates. Net flows in institutional index products generally have a small impact on BlackRock's revenues and earnings.

Equity

Year-end 2017 equity AUM totaled \$3.372 trillion, reflecting net inflows of \$130.1 billion. Net inflows included \$174.4 billion into *iShares* ETFs, driven by net inflows into Core funds and broad developed and emerging market equities, partially offset by non-ETF index and active net outflows of \$25.7 billion and \$18.5 billion, respectively.

Component changes in multi-asset AUM for 2017 are presented below.

<i>(in millions)</i>	December 31, 2016	Net inflows (outflows)	Market change	FX impact	December 31, 2017
Asset allocation and balanced	\$ 176,675	\$ (2,502)	\$ 17,387	\$ 4,985	\$ 196,545

Total	\$ 395,007	\$ 20,330	\$ 49,560	\$ 15,381	\$ 480,278

(1) FutureAdvisor amounts do not include AUM held in *iShares* ETFs.

Multi-asset net inflows reflected ongoing institutional demand for our solutions-based advice with \$18.9 billion of net inflows coming from institutional clients. Defined contribution plans of institutional clients remained a significant driver of flows, and contributed \$20.8 billion to institutional multi-asset net inflows in 2017, primarily into target date and target risk product offerings. Retail net inflows of \$1.1 billion reflected demand for our Multi-Asset Income fund family, which raised \$5.8 billion in 2017.

The Company's multi-asset strategies include the following:

- *Asset allocation and balanced products* represented 41% of multi-asset AUM at year-end. These strategies combine equity, fixed income and alternative components for investors seeking a tailored solution relative to a specific benchmark and within a risk budget. In certain cases, these strategies seek to minimize downside risk through diversification, derivatives strategies and tactical asset allocation decisions. Flagship products in this category include our Global Allocation and Multi-Asset Income fund families.

BlackRock's effective fee rates fluctuate due to changes in AUM mix. Approximately half of BlackRock's equity AUM is tied to international markets, including emerging markets, which tend to have higher fee rates than U.S. equity strategies. Accordingly, fluctuations in international equity markets, which may not consistently move in tandem with U.S. markets, have a greater impact on BlackRock's equity revenues and effective fee rate.

Fixed Income

Fixed income AUM ended 2017 at \$1.855 trillion, reflecting net inflows of \$178.8 billion. In 2017, active net inflows of \$21.5 billion were diversified across fixed income offerings, and included strong inflows into municipal, unconstrained and total return bond funds. *iShares* ETFs net inflows of \$67.5 billion were led by flows into Core, corporate and treasury bond funds. Non-ETF index net inflows of \$89.8 billion were driven by demand for liability-driven investment solutions.

Multi-Asset

BlackRock's multi-asset team manages a variety of balanced funds and bespoke mandates for a diversified client base that leverages our broad investment expertise in global equities, bonds, currencies and commodities, and our extensive risk management capabilities. Investment solutions might include a combination of long-only portfolios and alternative investments as well as tactical asset allocation overlays.

- *Target date and target risk products* grew 16% organically in 2017, with net inflows of \$23.9 billion. Institutional investors represented 93% of target date and target risk AUM, with defined contribution plans accounting for 87% of AUM. Flows were driven by defined contribution investments in our *LifePath* offerings. *LifePath* products utilize a proprietary active asset allocation overlay model that seeks to balance risk and return over an investment horizon based on the investor's expected retirement timing. Underlying investments are primarily index products.
- *Fiduciary management services* are complex mandates in which pension plan sponsors or endowments and foundations retain BlackRock to assume responsibility for some or all aspects of investment management. These customized services require strong partnership with the clients' investment staff and trustees in order to tailor investment strategies to meet client-specific risk budgets and return objectives.

- FutureAdvisor is a digital wealth management platform, acquired by BlackRock in October 2015. FutureAdvisor provides financial institutions with technology-enabled investment advisory capabilities to manage their clients' investments. As consumers increasingly engage with technology to invest, BlackRock and FutureAdvisor are positioned to empower distribution partners to better serve their clients by combining FutureAdvisor's technology-enabled advice with BlackRock's multi-asset investment capabilities, proprietary technology and risk analytics. FutureAdvisor AUM does not include underlying *iShares* ETF investments.

Alternatives

BlackRock alternatives focus on sourcing and managing high-alpha investments with lower correlation to public markets and developing a holistic approach to address client needs in alternatives investing. Our alternatives products fall into two main categories — 1) core alternatives, and 2) currency and commodities. Core includes liquid alternatives offerings in direct hedge funds and hedge fund solutions (funds of funds), as well as illiquid offerings in alternative solutions, private equity solutions (funds of funds),

opportunistic private equity and credit, real estate and infrastructure. BlackRock alternatives products are described below.

In 2017, alternatives generated \$1.0 billion of net inflows, or \$7.8 billion excluding return of capital/investment of \$6.8 billion. The largest contributors to return of capital were real estate and private equity solutions. Net inflows were driven by infrastructure, alternative solutions and hedge fund solutions. In addition, we raised approximately \$11 billion of new commitments in 2017 across a variety of strategies, led by infrastructure and private equity solutions. At year-end, we had approximately \$17 billion of non-fee paying, unfunded, uninvested commitments, which are expected to be deployed in future years; these commitments are not included in AUM or flows until they are fee-paying.

We believe that as alternatives become more conventional and investors adapt their asset allocation strategies, investors will further increase their use of alternative investments to complement core holdings. As a top ten alternatives provider³ our highly diversified \$129.3 billion alternatives franchise is well positioned to meet growing demand from both institutional and retail investors.

Component changes in alternatives AUM for 2017 are presented in the table below.

(2) Return of capital is included in outflows.

Core

The Company's core alternatives strategies include the following:

- Alternative Solutions represents highly customized portfolios of alternative investments. In 2017, alternative solutions portfolios had \$0.5 billion of net inflows.

- Hedge Funds net outflows of \$0.7 billion were due to net outflows of \$1.0 billion from direct hedge funds, partially offset by \$0.3 billion of net inflows in hedge fund solutions. Direct hedge fund AUM includes a variety of single- and multi-strategy offerings.
- Illiquid and Opportunistic AUM included \$11.8 billion in private equity solutions and \$2.0 billion in opportunistic

3 Source: Towers Watson, July 2017

private equity and credit offerings. Net outflows of \$0.3 billion were primarily from opportunistic credit.

- **Real Assets** AUM, which includes infrastructure and real estate, totaled \$30.3 billion, reflecting net inflows of \$1.3 billion and \$3.3 billion of AUM acquired in the First Reserve Transaction.

Currency and Commodities

The Company's currency and commodities products include a range of active and passive products.

Currency and commodities products had \$0.2 billion of net inflows, primarily driven by *iShares* ETFs. Our *iShares* ETFs commodities products represented \$23.6 billion of AUM and are not eligible for performance fees.

CLIENT REGION

Our footprints in the Americas, EMEA and Asia-Pacific regions reflect strong relationships with intermediaries and an established ability to deliver our global investment expertise in funds and other products tailored to local regulations and requirements.

AUM by product type and client region at December 31, 2017 is presented below.

(in millions)	Americas	EMEA	Asia-Pacific	Total
Equity	\$2,318,852	\$ 801,625	\$251,164	\$3,371,641

Americas.

Net inflows of \$299.9 billion were driven by net inflows into equity, fixed income and cash management of \$139.6 billion, \$91.1 billion and \$50.4 billion, respectively. During the year, we served clients through offices in 31 states in the United States as well as Canada, Mexico, Brazil, Chile, Colombia and Spain.

EMEA.

Net inflows of \$36.7 billion included net inflows from investors in 27 countries across the region. EMEA net inflows were led by fixed income net inflows of \$60.9 billion, reflecting strong flows into *iShares* ETFs and liability-driven investment solutions. Our offerings include fund families in the United Kingdom, the Netherlands, Luxembourg and Dublin and *iShares* ETFs listed on stock exchanges throughout Europe as well as separate accounts and pooled investment products.

Cash Management

Cash management AUM totaled \$449.9 billion at December 31, 2017. Cash management products include taxable and tax-exempt money market funds and customized separate accounts. Portfolios are denominated in U.S. dollars, Canadian dollars, Australian dollars, Euros, Swiss Francs, New Taiwan Dollars or British pounds. BlackRock generated net inflows of \$38.3 billion during 2017, reflecting continued market share gains and several large client wins. Strong growth in cash management also reflects successful integration of acquisitions to strengthen our platform and leverage our scale, including the 2017 acquisition of Cachematrix, a distribution technology portal enabling corporate treasurers to allocate among cash management products, and the 2016 transaction with BoA Global Capital Management.

Asia-Pacific.

Net inflows of \$30.7 billion were positive across asset classes, and were driven by fixed income net inflows of \$26.8 billion across a variety of exposures. Clients in the Asia-Pacific region are served through offices in Japan, Australia, Hong Kong, Malaysia, Singapore, Taiwan, Korea, China, and India.

INVESTMENT PERFORMANCE

Investment performance across active and passive products as of December 31, 2017 was as follows:

	One-year period	Three-year period	Five-year period
Fixed Income:			
<i>Actively managed AUM above benchmark or peer median</i>			
Taxable	81%	73%	90%
Tax-exempt	52%	68%	72%
<i>Index AUM within or above applicable tolerance</i>			
	96%	93%	99%
Equity:			
<i>Actively managed AUM above benchmark or peer median</i>			
Fundamental	70%	72%	73%
Systematic	83%	87%	90%
<i>Index AUM within or above applicable tolerance</i>			
	96%	99%	98%

Performance Notes. Past performance is not indicative of future results. Except as specified, the performance information shown is as of December 31, 2017 and is based on preliminary data available at that time. The performance data shown reflects information for all actively and passively managed equity and fixed income accounts, including U.S. registered investment companies, European-domiciled retail funds and separate accounts for which performance data is available, including performance data for high net worth accounts available as of November 30, 2017. The performance data does not include accounts terminated prior to December 31, 2017 and accounts for which data has not yet been verified. If such accounts had been included, the performance data provided may have substantially differed from that shown.

Performance comparisons shown are gross-of-fees for institutional and high net worth separate accounts, and net-of-fees for retail funds. The performance tracking shown for index accounts is based on gross-of-fees performance and includes all institutional accounts and all *iShares* funds globally using an index strategy. AUM information is based on AUM available as of December 31, 2017 for each account or fund in the asset class shown without adjustment for overlapping management of the same account or fund. Fund performance reflects the reinvestment of dividends and distributions.

Performance shown is derived from applicable benchmarks or peer median information, as selected by BlackRock, Inc. Peer medians are based in part on data either from Lipper, Inc. or Morningstar, Inc. for each included product.

TECHNOLOGY AND RISK MANAGEMENT

BlackRock offers investment management technology systems, risk management services, wealth management and digital distribution tools on a fee basis. *Aladdin* is our proprietary technology platform, which serves as the investment and risk management system for both BlackRock and a growing number of institutional investors around the world. BlackRock offers risk reporting capabilities via the *Aladdin Risk* offering; middle and back office outsourcing services; and investment accounting. Provider *Aladdin* is a tool used by BlackRock's custodial partners, connecting

them to the platform to add operational efficiency. BlackRock also offers a number of wealth management technology tools offering digital advice, portfolio construction capabilities and risk analytics for retail distributors. These tools include *FutureAdvisor*, a digital wealth management platform that provides financial institutions with technology-enabled investment advisory capabilities to manage their clients' investments, *Aladdin Portfolio Builder*, which provides financial advisors with portfolio construction tools, and *Aladdin Risk for Wealth Management*, which provides wealth management institutions and their advisors with institutional-quality portfolio construction, modeling and risk analytics capabilities. Additionally, in July 2017, BlackRock acquired *Cachematrix*, a leading provider of financial technology which simplifies the cash management process for banks and their corporate clients in a streamlined, open-architecture platform. In 2017, BlackRock also made minority investments in the digital distribution companies *Scalable Capital* and *iCapital*.

Technology and risk management revenue of \$677 million was up 14% year-over-year. *Aladdin*, which represented the majority of technology and risk management revenue for the year, continues to benefit from trends favoring global investment platform consolidation and multi-asset risk solutions. *Aladdin* assignments are typically long-term contracts that provide recurring revenue.

At year-end, BlackRock technology and risk management clients included banks, insurance companies, official institutions, pension funds, asset managers, asset servicers, retail distributors and other investors across North America, South America, Europe, Asia and Australia.

SECURITIES LENDING

Securities lending is managed by a dedicated team, supported by quantitative analysis, proprietary technology and disciplined risk management. BlackRock receives both cash (primarily for U.S. domiciled portfolios) and noncash collateral under securities lending arrangements. The cash management team invests the cash we receive as collateral for securities on loan in other portfolios. Fees for securities lending for U.S. domiciled portfolios can be structured as a share of earnings, or as a management fee based on a percentage of the value of the cash collateral or both. The value of the securities on loan and the revenue earned are captured in the corresponding asset class being managed. The value of the collateral is not included in AUM.

Outstanding loan balances ended the year at approximately \$262 billion, up from \$222 billion at year-end 2016. On average, relative to 2016, asset and liability spreads were slightly lower. However, strong market performance and asset gathering resulted in increased balances compared to 2016.

BlackRock employs a conservative investment style for cash and securities lending collateral that emphasizes quality, liquidity and interest rate risk management. Disciplined risk management, including a rigorous credit surveillance process, is an integral part of the investment process. BlackRock's Cash Management Credit Committee has established risk limits, such as aggregate issuer exposure limits and maturity limits, across many of the products BlackRock manages, including over all of its cash management products. In the ordinary course of our

business, there may be instances when a portfolio may exceed an internal risk limit or when an internal risk limit may be changed. No such instances, individually or in the aggregate, have been material to the Company. To the extent that daily evaluation and reporting of the profile of the portfolios identify that a limit has been exceeded, the relevant portfolio will be adjusted. To the extent a portfolio manager would like to obtain a temporary waiver of a risk limit, the portfolio manager must obtain approval from the credit research team, which is independent from the cash management portfolio managers. While a risk limit may be waived temporarily, such waivers are infrequent.

RISK & QUANTITATIVE ANALYSIS

Across all asset classes, in addition to the efforts of the portfolio management teams, the Risk & Quantitative Analysis (“RQA”) group at BlackRock draws on extensive analytical systems and proprietary and third-party data to identify, measure and manage a wide range of risks. RQA provides risk management advice and independent risk oversight of the investment management processes, identifies and helps manage counterparty and enterprise risks, coordinates standards for firm wide investment performance measurement and determines risk management-related analytical and information requirements. Where appropriate, RQA will work with portfolio managers and developers to facilitate the development or improvement of risk models and analytics.

COMPETITION

BlackRock competes with investment management firms, mutual fund complexes, insurance companies, banks, brokerage firms and other financial institutions that offer products that are similar to, or alternatives to, those offered by BlackRock. In order to grow its business, BlackRock must be able to compete effectively for AUM. Key competitive factors include investment performance track records, the efficient delivery of beta for index products, investment style and discipline, price, client service and brand name recognition. Historically, the Company has competed principally on the basis of its long-term investment performance track record, its investment process, its risk management and analytic capabilities and the quality of its client service.

GEOGRAPHIC INFORMATION

At December 31, 2017, BlackRock served clients in more than 100 countries across the globe, including the United States, the United Kingdom and Japan. See Note 23, *Segment Information*, contained in Part II, Item 8 of this filing for more information.

EMPLOYEES

At December 31, 2017, BlackRock had a total of approximately 13,900 employees, including approximately 6,800 located in offices outside the United States.

REGULATION

Virtually all aspects of BlackRock’s business are subject to various laws and regulations around the world, some of

which are summarized below. These laws and regulations are primarily intended to protect investment advisory clients, investors in registered and unregistered investment companies, trust and other fiduciary clients of BlackRock Institutional Trust Company, N.A. (“BTC”), PNC and its bank subsidiaries and their customers and the financial system. Under these laws and regulations, agencies that regulate investment advisers, investment funds, trust banks and bank holding companies and other individuals and entities have broad administrative powers, including the power to limit, restrict or prohibit the regulated entity or person from carrying on business if it fails to comply with such laws and regulations. Possible sanctions for significant compliance failures include the suspension of individual employees, limitations on engaging in certain lines of business for specified periods of time, revocation of investment adviser and other registrations or bank charters, censures and fines both for individuals and BlackRock.

The rules governing the regulation of financial institutions and their holding companies and subsidiaries are very detailed and technical. Accordingly, the discussion below is general in nature, does not purport to be complete and is current only as of the date of this report.

GLOBAL REGULATORY REFORM

BlackRock is subject to numerous regulatory reform initiatives around the world. Any such initiative, or any new laws or regulations or changes to, or in the enforcement of, existing laws or regulations, could materially and adversely impact the scope or profitability of BlackRock’s business activities, lead to business disruptions, require BlackRock to alter its business or operating activities and expose BlackRock to additional costs (including compliance and legal costs) as well as reputational harm. BlackRock’s profitability also could be materially and adversely affected by modification of the rules and regulations that impact the business and financial communities in general, including changes to the laws governing banking, taxation, antitrust regulation and electronic commerce.

Dodd-Frank Wall Street Reform and Consumer Protection Act

In July 2010, the Dodd-Frank Wall Street Reform and Consumer Protection Act (“Dodd-Frank”) was signed into law in the United States. Dodd-Frank is expansive in scope and requires the adoption of extensive regulations and numerous regulatory decisions, many of which have been adopted. BlackRock has implemented a conformance program to address certain regulations adopted under Dodd-Frank, as well as financial reforms that have been introduced as part of the Securities and Exchange Commission’s (“SEC”) investment company modernization initiatives. The cost of these conformance activities has been substantially absorbed by BlackRock; however, as certain limited aspects of Dodd-Frank and other rules are still being adopted, it is not yet possible to predict the ultimate effects that any implementation of these rules and regulations will have upon BlackRock’s business, financial condition, and operating activities.

Systemically Important Financial Institution (“SIFI”) Review

The Financial Stability Board (“FSB”) working with the International Organization of Securities Commissions (“IOSCO”) is considering potential systemic risk related to asset management; statements made by these

organizations have generally indicated that they are, at this time, focused on a products and activities, rather than designation, approach in their review of asset managers. The FSB has indicated that it may develop criteria for designation of nonbank non-insurers in the future to address “residual risks”. Any measures applied in relation to a global systemically important financial institution (“G-SIFI”) designation from the FSB would need to be implemented through existing regulatory processes and procedures by relevant national authorities.

In the United States, the Financial Stability Oversight Council (“FSOC”) has the authority to designate nonbank financial institutions as SIFIs. The FSOC’s most recent statements generally indicate that it is focused on products and activities, rather than designation, in its review of asset managers. The U.S. Department of the Treasury (“Treasury”) report on asset management, issued in October 2017 pursuant to the Executive Order (as defined below), also expressed this view. In addition, in November 2017, Treasury made recommendations concerning the process by which the FSOC designates nonbanks as SIFIs, further supporting a products and activities approach to addressing risks in asset management. In the event that BlackRock is designated as a SIFI, under Dodd-Frank, the Board of Governors of the Federal Reserve System (the “Federal Reserve”) is charged with establishing enhanced regulatory requirements for nonbank financial institutions and BlackRock could become subject to direct supervision by the Federal Reserve.

Taxation

BlackRock’s businesses may be directly or indirectly affected by tax legislation and regulation, or the modification of existing tax laws, by U.S. or non-U.S. authorities. On December 22, 2017, the Tax Cuts and Jobs Act (the “2017 Tax Act”) was enacted. Over the next few months, as the Company finalizes the impact of tax reform and clarifies the potential for future investment opportunities, BlackRock intends to reassess its capital management plans for the balance of 2018.

In addition, certain EU Member States, such as France and Italy, have enacted financial transaction taxes (“FTTs”) which impose taxation on a broad range of financial instruments and derivatives transactions, and the European Commission has proposed legislation to harmonize these taxes and provide for the adoption of EU-level legislation applicable to some (but not all) EU Member States. In general, any tax on securities and derivatives transactions would impact investors and would likely have a negative impact on the liquidity of the securities and derivatives markets, could diminish the attractiveness of certain types of products that BlackRock manages in those countries and could cause clients to shift assets away from such products. An FTT could significantly increase the operational costs of BlackRock entering into, on behalf of its clients, securities and derivatives transactions that would be subjected to an FTT, which could adversely impact BlackRock’s financial results and clients’ performance results.

The application of tax regulations involves numerous uncertainties and, in the normal course of business, U.S. and non-U.S. tax authorities may review and challenge tax positions adopted by BlackRock. These challenges may result in adjustments to, or impact the timing or amount of

taxable income, deductions or other tax allocations, which may adversely affect BlackRock’s effective tax rate and overall financial condition.

Regulation of Swaps and Derivatives

The SEC, Federal Reserve, the Internal Revenue Service (“IRS”) and the Commodity Futures Trading Commission each continue to review practices and regulations relating to the use of futures, swaps and other derivatives. Such reviews could result in regulations that restrict or limit the use of such products by funds or accounts. If adopted, these limitations could require BlackRock to change certain business practices or implement new compliance processes, which could result in additional costs and/or restrictions. In December 2015, the SEC proposed a new rule governing the use of derivatives and other financial commitment transactions by investment companies that, if enacted, would represent a fundamental change in the nature of the SEC’s regulations governing the use of derivatives and other financial commitment transactions by investment companies. While not on the SEC’s current agenda for finalization, this proposal has the potential to require BlackRock to change or restrict certain investment strategies or practices for some investment companies and incur additional costs.

Jurisdictions outside the U.S. in which BlackRock operates have adopted and implemented, or are in the process of considering, adopting or implementing more pervasive regulation of many elements of the financial services industry, which could further impact BlackRock and the broader markets. For example, various global rules and regulations applicable to the use of financial products by funds, accounts and counterparties that have been adopted or proposed will require BlackRock to build and implement new compliance monitoring procedures to address the enhanced level of oversight to which it and its clients will be subject. These rules introduce new requirements such as mandatory central clearing of certain swaps transactions, requiring execution of certain swaps transactions on or through registered electronic trading venues (as opposed to over the phone or other execution methods), reporting transactions to central data repositories, mandating certain documentation standards, requiring the posting and collection of initial and/or variation margin for bilateral swap transactions and subjecting certain types of listed and/or over-the-counter transactions to position limit or position reporting requirements.

In the United States, certain interest rate swaps and certain index credit default swaps are subject to Dodd-Frank central clearing and electronic trading venue requirements, with additional products and asset classes potentially becoming subject to these requirements in the future. In the European Union (“EU”), central clearing requirements for certain swap transactions have become effective for certain types of BlackRock funds and accounts and will continue to be phased in for other types of BlackRock funds and accounts over time. On March 1, 2017 most derivatives transactions that are not centrally cleared, including non-deliverable foreign exchange forward transactions and currency option transactions, became subject to requirements in the United States, EU and numerous other jurisdictions to post or collect mark-to-market margin payments. These rules have the potential to increase the complexity and cost of trading non-cleared derivatives for BlackRock’s clients. The new

rules and regulations may produce regulatory inconsistencies in global derivatives trading rules and increase BlackRock's operational and legal risks.

Regulation of Exchange-Traded Funds

As part of a focus on financial stability issues and due to the significant growth of this product class over the last few years, regulators globally are examining the potential risks in ETFs, including those related to transparency, liquidity and structural resiliency. BlackRock and other large issuers of ETFs are working with market participants and regulators to address certain of these issues but there can be no assurance that structural or regulatory reforms will be implemented in a manner favorable to BlackRock, or at all. Depending on the outcome of this renewed regulatory analysis, or any associated structural reforms, ETF products may become subject to increased regulatory scrutiny or restrictions, which may require BlackRock to incur additional compliance and reporting expenses and adversely affect the Company's business.

Volcker Rule

Provisions of Dodd-Frank referred to as the "Volcker Rule" created a new section of the Bank Holding Company Act of 1956 (the "Bank Holding Company Act") that places limitations on the ability of banks and their subsidiaries to engage in proprietary trading and to invest in and transact with certain private investment funds, including hedge funds, private equity funds and funds of funds (collectively "covered funds"). The Bank Holding Company Act by its terms does not currently apply to BlackRock. The Federal Reserve currently takes the position that PNC's ownership interest in BlackRock, which is approximately 22%, causes BlackRock to be treated as a nonbank subsidiary of PNC for the purpose of the Bank Holding Company Act and that BlackRock is subject to banking regulation. Based on this interpretation of the Bank Holding Company Act, the Federal Reserve could initiate a process to formally determine that PNC controls BlackRock under the terms of the Bank Holding Company Act. Any such determination, if successful, would subject BlackRock to current and future regulatory requirements under the Bank Holding Company Act, including the Volcker Rule. Conformance with the Volcker Rule may require BlackRock to remove its name from the names of its covered funds, and to sell certain seed and co-investments that it holds in those funds, which may occur at a discount to existing carrying value depending on market conditions.

Revised Department of Labor ("DoL") Fiduciary Rule

In April 2016, the DoL proposed a new regulation defining the term "fiduciary" for purposes of the fiduciary responsibility provisions of Title I of the Employee Retirement Income Security Act of 1974 ("ERISA") and the prohibited transaction excise tax provisions of the Internal Revenue Code. The substantive provisions of the rule began to apply in June 2017. However, the applicability date of many conditions of the prohibited transaction exemptions accompanying the rule has been delayed until July 2019, while the DoL continues its re-examination of the rule and the prohibited transaction exemptions. If the DoL does not repeal or revise the rule or revise the prohibited transaction exemptions, the rule could require BlackRock to revise a number of its distribution relationships, create compliance and operational challenges for BlackRock's distribution partners

and may limit BlackRock's ability to provide certain useful services and education to its clients.

Financial Crimes Enforcement Network Proposed Rulemaking for Registered Investment Advisers

In 2015, the Financial Crime Enforcement Network ("FinCEN") issued a Notice of Proposed Rulemaking ("Proposed Rule") that would extend to a number of BlackRock's subsidiaries, which are registered or required to be registered with the SEC under the Investment Advisers Act of 1940 (the "Advisers Act"), the requirement to establish anti-money laundering programs and report suspicious activity to the FinCEN under the Bank Secrecy Act of 1970 (the "Bank Secrecy Act"). The Proposed Rule would extend to those BlackRock subsidiaries captured within the Bank Secrecy Act's definition of "financial institutions", which would require them to comply with the Bank Secrecy Act reporting and recordkeeping requirements. If adopted in its current form, the Proposed Rule would expose BlackRock to additional compliance costs.

U.S. Executive Order

On February 3, 2017, an executive order (the "Executive Order") was issued articulating certain core principles for regulating the U.S. financial system and directing the Secretary of the U.S. Treasury to report on the extent to which existing laws, treaties, rules, regulations and policies promote, support or inhibit the federal regulation of the U.S. financial system in a manner consistent with the core principles. The Treasury has issued three (of an expected four) reports in response to the Executive Order (the "Treasury Reports"), which include a number of recommendations, the majority of which require further legislative or regulatory action in order to be implemented, that may affect BlackRock's business or operations. BlackRock will continue to monitor the potential impact of the Executive Order, as well as the Treasury Reports and any consequential legislative or regulatory action, on its business.

Securities and Exchange Commission Rulemakings for U.S. Registered Funds and Investment Advisers

BlackRock's business may also be impacted by SEC regulatory initiatives. The SEC and its staff are engaged in various initiatives and reviews that seek to improve and modernize the regulatory structure governing the asset management industry, and registered investment companies in particular. In so doing, it has adopted rules that include (i) new monthly and annual reporting requirements for certain U.S. registered funds; (ii) enhanced reporting regimes for investment advisers; and (iii) implementing liquidity risk management programs for ETFs and open-end funds, other than money market funds. The rules, many of which are currently in an implementation period, will increase BlackRock's public reporting and disclosure requirements, which could be costly and may impede BlackRock's growth.

Certain other rules impacting investment advisers and U.S. registered funds were proposed (or were under discussion for proposal) by the SEC's prior leadership, however the SEC's current leadership has indicated that these efforts are not expected to result in any short-term action. In the event the SEC moves forward with any such proposals, any new rules, guidance or regulatory initiatives could expose

BlackRock to additional compliance costs and may require the Company to change how it operates its business and/or manages its funds.

Money Market Fund Reform

In November 2016, the EU council announced political agreement with the European Parliament on certain money market funds reforms that are intended to reduce perceived risks associated with these products. The final text was published in the Official Journal of the EU in June 2017, starting an 18-month transition period for existing funds to comply. The reforms will limit the use of constant net asset value money market funds to those holding only government debt, and introduce a new category of “low volatility net asset value” money market funds, with both categories of money market funds being subject to reinforced liquidity requirements as well as safeguards such as liquidity fees and redemption gates. They may also reduce the attractiveness of certain money market funds to investors. BlackRock is evaluating the reforms and potential impact to its existing constant net asset value money market funds.

In the United States, there is currently legislation pending in Congress that would repeal the requirement that institutional prime and institutional municipal money market funds float their net asset values. In order to understand the potential impact of this legislation, a review of the impact of the 2014 money market fund reforms on financial stability, short-term funding markets, issuers, and money market fund investors should be undertaken. It is uncertain whether the legislation will pass Congress and become law.

British Exit from the European Union

Following the June 2016 vote to exit the EU, the United Kingdom served notice under Article 50 of the Treaty on European Union on March 29, 2017 to initiate the process of exiting from the EU, commonly referred to as “Brexit”. The outcome of the negotiations between the United Kingdom and the EU in connection with Brexit is highly uncertain and information regarding the long-term consequences is expected to become clearer over time as negotiations progress. The Company continues to prepare for a range of potential outcomes in connection with Brexit.

MiFID II Regime

BlackRock is also subject to numerous regulatory reform initiatives in Europe. For example, in the EU rules and regulations made under the previous Markets in Financial Instruments Directive (“MiFID”) have been revised through implementation of the “MiFID II” package of measures which came into effect in January 2018 and is made up of a new Markets in Financial Instruments Directive, a new Markets in Financial Instruments Regulation and a number of Implementing and Regulatory Technical Standards in the form of Delegated Acts made by the European Commission following advice from the European Securities and Markets Authority (“ESMA”). MiFID II builds upon many of the measures introduced by MiFID, and extends investor protection, trading transparency, clearing and trading venue access and reporting requirements. It is expected that the reforms introduced by MiFID II will have significant and wide-ranging impacts on EU securities and derivatives markets. In particular, MiFID II introduces (i) enhanced governance and investor protection standards, (ii) prescriptive rules on portfolio management firms’ ability to receive and pay for investment research relating to all asset classes, (iii) rules

on the identification and monitoring of target markets for MiFID financial instruments by MiFID investment firms who manufacture and/or distribute such instruments, (iv) enhanced regulation of algorithmic trading, (v) the movement of trading in certain shares and derivatives on to regulated execution venues, (vi) the extension of pre- and post-trade transparency requirements to wider categories of financial instruments, (vii) restrictions on the use of so-called dark pool trading, (viii) the creation of a new type of trading venue called the Organized Trading Facility for non-equity financial instruments, (ix) new commodity derivative position limits and reporting requirements, (x) a move away from vertical silos in execution, clearing and settlement, (xi) an enhanced role for ESMA in supervising EU securities and derivatives markets and (xii) new requirements regarding non-EU investment firms’ access to EU financial markets. Implementation of these measures will have direct and indirect impacts on BlackRock and its subsidiaries and may require significant changes to client servicing models. A significant number of the impacts are yet to be determined because MiFID II contains a wide ranging and complex set of measures. The broad nature of the MiFID II reforms may impact BlackRock’s product development, client servicing and distribution models. In particular, additional disclosures are required in respect of costs and fees BlackRock charges to certain of its clients. MiFID II may also impact the ability of certain of BlackRock’s distribution partners to accept commissions. Further, market structure reforms may impact the way that the Company executes investment decisions for client portfolios and reports on such transactions and could have an impact on general market liquidity.

EU Market Access

The European Commission and certain EU Member States have recently advanced a more restrictive approach to the need for “equivalence”, which is the process by which the legal, regulatory and/or supervisory system in non-EU Member States is recognized by the European Commission as comparably effective to that in the EU, thereby allowing such non-EU Member States access to the EU single market in financial services. Additionally, in September 2017, the European Commission issued a proposal to enhance the European Supervisory Authorities’ powers by requiring that all third country outsourcing, delegation and risk transfer arrangements be assessed by ESMA. If enacted, the proposal would transfer to ESMA the ability of EU Member States to authorize the outsourcing of asset management activities beyond the EU’s borders. The proposal could have a significant impact on asset management firms with operations based outside of the EU, including BlackRock, and it may affect the Company’s ability to delegate fund management and/or costs associated with such delegation.

Undertakings for Collective Investment in Transferable Securities

The EU has also adopted directives on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities (“UCITS”). The latest initiative in this area, UCITS V, seeks to align the UCITS depositary regime, UCITS remuneration rules and regulators’ power to sanction for breaches of the UCITS Directive with the requirements of the Alternative Investment Fund Managers Directive. UCITS V came into effect in March 2016 with further implementing measures commencing in October 2016. Compliance with

the updated UCITS directive subjects BlackRock to additional expenses associated with new depositary oversight and other organizational requirements.

EU Benchmarks Regulation

Political agreement on the EU Benchmarks Regulation was reached at the end of 2015. The Regulation provides the legislative framework to implement the 2013 International Organization of Securities Commissions Principles for Financial Benchmarks. The scope of the Regulation is broad as it includes submission-based benchmarks through to transaction-based market indices. Proportionality is applied to create a stricter framework for the systemically relevant benchmarks such as the London Interbank Offered Rate (LIBOR) and the Euro Interbank Offered Rate (EURIBOR). Although the Regulation creates a number of obligations on administrators of, and submitters to, benchmarks, it is less extensive with respect to obligations on users of benchmarks, such as asset managers. The Regulation formalizes due diligence procedures for users and imposes other additional administrative requirements of users of third-party benchmarks. Managers using third-party and/or bespoke benchmarks to assess fund performance are also subject to the Regulation. The Regulation came into effect in January 2018, imposing additional administrative and due diligence requirements on the Company, the burden of which is likely to increase as BlackRock makes additional enhancements to its indexing business.

Revised EU Capital Requirements

EU regulators are considering how to design an appropriate capital regime for non-systemically important investment firms as the current regime is based upon banking requirements and has not been materially modified for asset managers. In December 2017, the European Commission published a legislative proposal addressed to the European Parliament and Council for a new Directive and new Regulation on prudential requirements for MiFID investment firms. The new legislative package is currently expected to come into effect in 2020 following agreement between the European Council and Parliament. Once implemented, any new requirements could result in significant changes to the methodology used to determine the amount of regulatory capital that BlackRock is required to hold in the EU.

Reform of European Retail Distribution Rules

BlackRock must also comply with retail distribution rules aimed at enhancing consumer protections, overhauling mutual fund fee structures by banning the payment of commissions to distributors and increasing professionalism in the retail investment sector. The rules were originally introduced in the United Kingdom in 2012 and similar rules have since been introduced in other jurisdictions where BlackRock operates such as the Netherlands, and are under discussion elsewhere. Similarly, MiFID II contains a ban on certain types of advisers recovering commissions and other nonmonetary benefits from fund managers. These rules will lead to greater fragmentation of distribution rules and may lead to changes to BlackRock's client servicing and distribution models, in particular affecting the fees BlackRock is able to charge to its clients and the commissions it is able to pay to its distribution partners.

Revised Retail Consumer Disclosure Requirements

EU legislators have introduced a new "Key Information Document" ("KID"), which is applicable where a retail consumer is sold Packaged Retail and Insurance-based Investment Products ("PRIIPs") and which came into effect in January 2018. The KID must include specific information on costs, risks and performance. BlackRock is required to produce a KID for each fund in scope, as well as to make information available to distribution partners who sell these funds in the EU.

Financial Conduct Authority ("FCA") Asset Management Market Survey

The FCA is continuing its assessment of the asset management industry, which is focused on understanding whether competition provides value to institutional and retail investors when purchasing asset management services. In June 2017, the FCA issued a final report to address concerns it had raised in its November 2016 Report about the effectiveness and sufficiency of price competition in driving value for investors within the asset management industry. The final report recommended (i) the adoption of an "all-in" fee structure in the asset management industry in line with MiFID II and PRIIPs requirements; (ii) increasing independence in U.K. fund boards in line with existing Irish and Luxembourg practice; and (iii) imposing a specific value for money assessment on fund boards to challenge fund charging structures with the aim of passing on economies of scale to end investors. If implemented as written, these recommendations could affect pricing and distribution arrangements across the U.K. asset management industry and potentially impact BlackRock's profitability and operating margins. Two further consultations on asset management have been initiated by the FCA in order to set out specific FCA rule changes.

EXISTING U.S. REGULATION — OVERVIEW

BlackRock and certain of its U.S. subsidiaries are currently subject to extensive regulation, primarily at the federal level, by the SEC, the DoL, the Federal Reserve, the Office of the Comptroller of the Currency ("OCC"), the Financial Industry Regulatory Authority ("FINRA"), the National Futures Association ("NFA"), the Commodity Futures Trading Commission and other federal government agencies and regulatory bodies.

Certain of BlackRock's U.S. subsidiaries are also subject to various anti-terrorist financing, privacy, anti-money laundering and economic sanctions laws and regulations established by various agencies. The Investment Advisers Act of 1940 (the "Advisers Act") imposes numerous obligations on registered investment advisers such as BlackRock, including record-keeping, operational and marketing requirements, disclosure obligations and prohibitions on fraudulent activities. State level regulation through Attorneys General, Insurance Commissioners and other state level agencies also applies to certain BlackRock activities.

The Investment Company Act of 1940 (the "Investment Company Act") imposes stringent governance, compliance, operational, disclosure and related obligations on registered investment companies and their investment advisers and distributors, such as BlackRock and its affiliated companies. The SEC is authorized to institute proceedings and impose

sanctions for violations of the Advisers Act and the Investment Company Act, ranging from fines and censure to termination of an investment adviser's registration. Investment advisers also are subject to certain state securities laws and regulations. Non-compliance with the Advisers Act, the Investment Company Act or other federal and state securities laws and regulations could result in investigations, sanctions, disgorgement, fines and reputational damage.

BlackRock's trading and investment activities for client accounts are regulated under the Securities Exchange Act of 1934 (the "Exchange Act"), as well as the rules of various securities exchanges and self-regulatory organizations, including laws governing trading on inside information, market manipulation and a broad number of technical requirements (e.g., short sale limits, volume limitations and reporting obligations) and market regulation policies. Violation of any of these laws and regulations could result in fines or sanctions, as well as restrictions on BlackRock's activities and damage to its reputation. Furthermore, one of BlackRock's subsidiaries, BTC, was required to register as a municipal advisor (as that term is defined in the statute) with the SEC and Municipal Securities Rulemaking Board ("MSRB") as a result of SEC rules giving effect to a section of Dodd-Frank requiring such registration. The rules subject BTC to new and additional regulation by the SEC and Municipal Securities Rulemaking Board.

BlackRock manages a variety of private pools of capital, including hedge funds, funds of hedge funds, private equity funds, collateralized debt obligations, collateralized loan obligations ("CLOs"), real estate funds, collective investment trusts, managed futures funds and hybrid funds. Congress, regulators, tax authorities and others continue to explore, on their own and in response to demands from the investment community and the public, increased regulation related to private pools of capital, including changes with respect to investor eligibility, certain limitations on trading activities, record-keeping and reporting, the scope of anti-fraud protections, safekeeping of client assets and a variety of other matters. BlackRock may be materially and adversely affected by new legislation, rule-making or changes in the interpretation or enforcement of existing rules and regulations imposed by various regulators in this area.

Certain BlackRock subsidiaries are subject to ERISA, and to regulations promulgated thereunder by the DoL, insofar as they act as a "fiduciary" under Title I of ERISA with respect to benefit plan clients. ERISA and applicable provisions of the Internal Revenue Code impose certain duties on persons who are fiduciaries under ERISA, prohibit certain transactions involving ERISA plan clients and impose excise taxes for violations of these prohibitions, mandate certain required periodic reporting and disclosures and require certain BlackRock entities to carry bonds insuring against losses caused by fraud or dishonesty. ERISA also imposes additional compliance, reporting and operational requirements on BlackRock that otherwise are not applicable to non-benefit plan clients.

BlackRock has seven subsidiaries that are registered as commodity pool operators ("CPOs") and/or commodity trading advisors ("CTAs") with the Commodity Futures Trading Commission and are members of the NFA. The Commodity Futures Trading Commission and NFA each administer a comparable regulatory system covering futures contracts and various other financial instruments, including

swaps as a result of Dodd-Frank, in which certain BlackRock clients may invest. Two of BlackRock's other subsidiaries, BlackRock Investments, LLC ("BRIL") and BlackRock Execution Services, are registered with the SEC as broker-dealers and are member-firms of FINRA. Each broker-dealer has a membership agreement with FINRA that limits the scope of such broker-dealer's permitted activities. BRIL is also an approved person with the New York Stock Exchange and a member of the Municipal Securities Rulemaking Board, subject to Municipal Securities Rulemaking Board rules.

U.S. Banking Regulation

One of BlackRock's subsidiaries, BTC, is organized as a nationally-chartered limited purpose trust company that does not accept deposits or make commercial loans. Accordingly, BTC is examined and supervised by the OCC and is subject to various banking laws and regulations enforced by the OCC, such as laws and regulations governing capital adequacy, fiduciary activities, conflicts of interest, self-dealing, and the prevention of financial crime, including money laundering. BTC is also a member of the Federal Reserve System and is subject to various Federal Reserve regulations applicable to member institutions, such as regulations restricting transactions with affiliates. Many of these laws and regulations are meant for the protection of BTC and/or BTC's customers rather than BlackRock and its other affiliates or BlackRock's stockholders.

PNC is a bank holding company and regulated as a "financial holding company" by the Federal Reserve under the Bank Holding Company Act. The supervision and regulation of PNC and its subsidiaries under applicable banking laws are intended primarily for the protection of its banking subsidiaries, its depositors, the Deposit Insurance Fund of the Federal Deposit Insurance Corporation, and the financial system as a whole, rather than for the protection of stockholders, creditors or clients of BlackRock.

As described in "Item 1-Business", as of December 31, 2017 PNC owned approximately 22% of BlackRock's capital stock, which may subject BlackRock to banking regulation as a nonbank subsidiary of PNC. The Bank Holding Company Act by its terms does not currently apply to BlackRock. The Federal Reserve currently takes the position that this ownership interest causes BlackRock to be treated as a nonbank subsidiary of PNC for the purpose of the Bank Holding Company Act and that BlackRock is subject to banking regulation. Based on this interpretation of the Bank Holding Company Act, the Federal Reserve could initiate a process to formally determine that PNC controls BlackRock under the terms of the Bank Holding Company Act. Any such determination, if successful, would subject BlackRock to current and future regulatory requirements under the Bank Holding Company Act, including the Volcker Rule, that are more restrictive than those the Company is subject to under other applicable laws, as well as the enforcement authority of the Federal Reserve, which includes the power to impose substantial fines and other penalties for violations. Any effort by BlackRock to contest a control determination by the Federal Reserve may be costly and complex, and may not result in a reversal of such determination.

Any failure of PNC to maintain its status as a financial holding company could result in substantial limitations on certain BlackRock activities and its growth. Such a change of status could be caused by any failure of PNC or one of PNC's

bank subsidiaries to remain “well capitalized” and “well managed,” by any examination downgrade of one of PNC’s bank subsidiaries, or by any failure of one of PNC’s bank subsidiaries to maintain a satisfactory rating under the Community Reinvestment Act.

Regulation of Securities Financing Transactions

In its 2014 Annual Report, the Financial Stability Oversight Council identified securities lending indemnification by asset managers who act as lending agents as a potential systemic risk that required further review and monitoring. The Federal Reserve is also considering whether to impose specific margin or minimum haircut requirements for securities financing transactions. In addition, in November 2015, the EU introduced a new regulation on the reporting and transparency of securities financing transactions and total return swaps (“SFTR”). The SFTR aims to improve the transparency surrounding securities financing transactions and total return swaps by, among other things, requiring reporting of securities financing transactions and total return swaps to a trade repository and requiring disclosure of the use of securities financing transactions and total return swaps to investors. If the recent scrutiny of securities financing transactions results in further regulatory requirements or reporting obligations, BlackRock may be required to introduce further compliance measures, which will subject BlackRock to additional expenses and could lead to modifications in BlackRock’s securities financing transaction activities, including potential adjustments to its activities as agent lender for its clients.

Regulation of Money Market Funds

In October 2016, new rules were implemented to reform the regulatory structure governing U.S. money market funds to address the perceived systemic risks of money market funds. The new rules require institutional prime and institutional municipal money market funds to employ a floating net asset value per share method of pricing, which allows the daily share prices of these funds to fluctuate along with changes in the market-based value of fund assets. Retail money market funds continue operating with a constant net asset value per share. The rules, however, provide for new tools for institutional and retail money market funds’ boards designed to address market shocks, including the ability to impose liquidity fees and redemption gates under certain circumstances. The new rules led to an approximately \$1 trillion asset transition from the prime money funds industry to the government money funds industry and BlackRock saw a similar dynamic on its platform.

EXISTING INTERNATIONAL REGULATION — OVERVIEW

BlackRock’s international operations are subject to the laws and regulations of a number of international jurisdictions, as well as oversight by numerous regulatory agencies and bodies in those jurisdictions. In some instances, these operations are also affected by U.S. laws and regulations that have extra-territorial application.

Below is a summary of certain international regulatory standards to which BlackRock is subject. It is not meant to be comprehensive as there are parallel legal and regulatory

arrangements in force in many jurisdictions where BlackRock’s subsidiaries conduct business.

Of note among the various other international regulations to which BlackRock is subject, are the extensive and complex regulatory reporting requirements that necessitate the monitoring and reporting of issuer exposure levels (thresholds) across the holdings of managed funds and accounts and those of the Company.

European Regulation

The FCA currently regulates certain BlackRock subsidiaries in the United Kingdom. It also prudentially regulates those U.K. subsidiaries’ branches established in other EU countries and is also responsible for the conduct of business regulation of the U.K. branches of certain of BlackRock’s U.S. subsidiaries. In addition, the Prudential Regulation Authority (“PRA”) regulates one BlackRock U.K. insurance subsidiary. Authorization by the FCA and (where relevant) the PRA is required to conduct certain financial services related business in the United Kingdom under the Financial Services and Markets Act 2000 (the “FSMA”). The FCA’s rules adopted under the FSMA govern the majority of a firm’s capital resources requirements, senior management arrangements, conduct of business, interaction with clients, and systems and controls, whereas the rules of the PRA focus solely on the prudential requirements that apply to BlackRock’s U.K.-regulated insurance subsidiary. The FCA supervises BlackRock’s U.K.-regulated subsidiaries through a combination of proactive engagement, event-driven and reactive supervision and theme based reviews in order to monitor BlackRock’s compliance with regulatory requirements. Breaches of the FCA’s rules may result in a wide range of disciplinary actions against BlackRock’s U.K.-regulated subsidiaries and/or its employees.

In addition, BlackRock’s U.K.-regulated subsidiaries and other European subsidiaries and branches must comply with the pan-European regulatory regime established by MiFID, which regulates the provision of investment services and activities throughout the EU. MiFID, the scope of which is being enhanced through MiFID II (which came into effect in January 2018 and is described more particularly under “— Global Regulatory Reform” above), sets out detailed requirements governing the organization and conduct of business of investment firms and regulated markets. It also includes pre- and post-trade transparency requirements for equity and non-equity markets and extensive transaction reporting requirements. Certain BlackRock European subsidiaries must also comply with the Consolidated Life Directive and Insurance Mediation Directive. In addition, relevant entities must comply with revised obligations on capital resources for banks and certain investment firms (the Capital Requirements Directive and Capital Requirements Regulation). These include requirements on capital, as well as matters of governance and remuneration. Relevant BlackRock entities must also comply with the requirements of the Alternative Investment Fund Managers Directive, which imposes obligations on the authorization and capital, conduct of business, organization, transparency and marketing of alternative investment funds that are sold in, or marketed to, the EU. The obligations introduced through these regulations and directives will have a direct effect on some of BlackRock’s European operations.

BlackRock’s EU-regulated subsidiaries are also subject to an EU regulation on over-the-counter (“OTC”) derivatives,

central counterparties and trade repositories, which requires (i) the central clearing of standardized OTC derivatives, (ii) the application of risk-mitigation techniques to non-centrally cleared OTC derivatives (including since March 2017 the exchange of collateral with certain counterparties) and (iii) since 2014 the reporting of all derivative contracts to an ESMA-registered or recognized derivatives trade repository.

Regulation in the Asia-Pacific Region

In Japan, a BlackRock subsidiary is subject to the Financial Instruments and Exchange Act (“FIEA”) and the Act on Investment Trusts and Investment Corporations. These laws are administered and enforced by the Japanese Financial Services Agency (“JFSA”), which establishes standards for compliance, including capital adequacy and financial soundness requirements, customer protection requirements and conduct of business rules. The JFSA is empowered to conduct administrative proceedings that can result in censure, fines, the issuance of cease and desist orders or the suspension or revocation of registrations and licenses granted under the FIEA. This Japanese subsidiary also holds a license for real estate investment management and brokerage activities which subjects it to the regulations set forth in the Real Estate Brokerage Business Act.

In Australia, BlackRock’s subsidiaries are subject to various Australian federal and state laws, and certain subsidiaries are regulated by the Australian Securities and Investments Commission (“ASIC”). ASIC regulates companies and financial services in Australia and is responsible for promoting investor, creditor and consumer protection. Failure to comply with applicable laws and regulations could result in the cancellation, suspension or variation of the regulated subsidiaries’ licenses in Australia.

The activities of certain BlackRock subsidiaries in Hong Kong are subject to the Securities and Futures Ordinance (“SFO”), which governs the securities and futures markets and regulates, among others, offers of investments to the public and provides for the licensing of intermediaries. The SFO is administered by the Securities and Futures Commission (“SFC”). The SFC is also empowered to establish standards for compliance as well as codes and guidelines. The relevant BlackRock subsidiaries and the employees conducting any of the regulated activities specified in the SFO are required to be licensed with the SFC, and are subject to the rules, codes and guidelines issued by the SFC. Failure to comply with the applicable laws, regulations, codes and guidelines issued by the SFC could result in the suspension or revocations of the licenses granted by the SFC.

BlackRock’s operations in Taiwan are regulated by the Taiwan Financial Supervisory Commission, which is responsible for regulating securities markets (including the Taiwan Stock Exchange and the Taiwan Futures Exchange), the banking industry and the insurance sector. Other financial regulators oversee BlackRock subsidiaries, branches, and representative offices across the Asia-Pacific region, including in Singapore and South Korea. Regulators in these jurisdictions have authority with respect to financial services including, among other things, the authority to grant or cancel required licenses or registrations. In addition, these regulators may subject certain BlackRock subsidiaries to net capital requirements.

AVAILABLE INFORMATION

BlackRock files annual, quarterly and current reports, proxy statements and all amendments to these reports and other information with the SEC. BlackRock makes available free-of-charge, on or through its website at <http://www.blackrock.com>, the Company’s Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, proxy statements and all amendments to those filings, as soon as reasonably practicable after such material is electronically filed with or furnished to the SEC. The Company also makes available on its website the charters for the Audit Committee, Management Development and Compensation Committee, Nominating and Governance Committee and Risk Committee of the Board of Directors, its Code of Business Conduct and Ethics, its Code of Ethics for Chief Executive and Senior Financial Officers and its Corporate Governance Guidelines. Further, BlackRock will provide, without charge, upon written request, a copy of the Company’s Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, proxy statements and all amendments to those filings as well as the committee charters, its Code of Business Conduct and Ethics, its Code of Ethics for Chief Executive and Senior Financial Officers and its Corporate Governance Guidelines. Requests for copies should be addressed to Investor Relations, BlackRock, Inc., 55 East 52nd Street, New York, New York 10055. Investors may read and copy any document BlackRock files at the SEC’s Public Reference Room at 100 F Street N.E., Washington, D.C. 20549. Please call 1-800-SEC-0330 for further information on the operation of the Public Reference Room. Reports, proxy statements and other information regarding issuers that file electronically with the SEC, including BlackRock’s filings, are also available to the public from the SEC’s website at <http://www.sec.gov>.

Item 1A. Risk Factors

As a global investment management firm, risk is an inherent part of BlackRock’s business. Global markets, by their nature, are prone to uncertainty and subject participants to a variety of risks. While BlackRock devotes significant resources across all of its operations to identify, measure, monitor, manage and analyze market, operating, legal, compliance, fiduciary and investment risks, BlackRock’s business, financial condition, operating results and nonoperating results could be materially adversely affected and the Company’s stock price could decline as a result of any of these risks and uncertainties, including the ones discussed below.

MARKET AND COMPETITION RISKS

Changes in the value levels of equity, debt, real assets, commodities, foreign exchange or other asset markets may cause assets under management (“AUM”), revenue and earnings to decline.

BlackRock’s investment management revenue is primarily comprised of fees based on a percentage of the value of AUM and, in some cases, performance fees which are normally expressed as a percentage of returns to the client. Numerous factors, including price movements in the equity,

debt or currency markets, or in the price of real assets, commodities or alternative investments in which BlackRock invests, could cause:

- the value of AUM, or the returns BlackRock realizes on AUM, to decrease;
- the withdrawal of funds from BlackRock's products in favor of products offered by competitors;
- the rebalancing or reallocating of assets into BlackRock products that yield lower fees;
- an impairment to the value of intangible assets and goodwill; or
- a decrease in the value of seed or co-investment capital.

The occurrence of any of these events may cause the Company's AUM, revenue and earnings to decline.

BlackRock's investment advisory contracts may be terminated or may not be renewed by clients or fund boards on favorable terms and the liquidation of certain funds may be accelerated at the option of investors.

BlackRock derives a substantial portion of its revenue from providing investment advisory services. The advisory or management contracts BlackRock has entered into with its clients, including the agreements that govern many of BlackRock's investment funds, provide investors or, in some cases, the independent directors of private investment funds, with significant latitude to terminate such contracts, withdraw funds or liquidate funds by simple majority vote with limited notice or penalty, or to remove BlackRock as a fund's investment advisor (or equivalent). BlackRock also manages its U.S. mutual funds, closed-end and exchange-traded funds under management contracts that must be renewed and approved annually by the funds' respective boards of directors, a majority of whom are independent from the Company. BlackRock's fee arrangements under any of its advisory or management contracts may be reduced (including at the behest of a fund's board of directors). In addition, if a number of BlackRock's clients terminate their contracts, remove BlackRock from advisory roles, liquidate funds or fail to renew management contracts on favorable terms, the fees or carried interest BlackRock earns could be reduced, which may cause BlackRock's AUM, revenue and earnings to decline.

Increased competition may cause BlackRock's AUM, revenue and earnings to decline.

The investment management industry is highly competitive and has relatively low barriers to entry. BlackRock competes based on a number of factors including: investment performance, the level of fees charged, the quality and diversity of services and products provided, name recognition and reputation, and the ability to develop new investment strategies and products to meet the changing needs of investors. In addition, the introduction of new technologies, as well as regulatory changes, have altered the competitive landscape for investment managers, which may lead to fee compression or require BlackRock to spend more to modify or adapt its product offerings to attract and retain customers and remain competitive with products and services offered by other financial institutions, technology companies, trading, advisory or asset management firms. Increased competition on the basis of any of these factors, including competition leading to fee reductions on existing or

new business, may cause the Company's AUM, revenue and earnings to decline.

Failure to maintain Aladdin's competitive position in a dynamic market for risk analytics could lead to a loss of clients and could impede BlackRock's productivity and growth.

The sophisticated risk analytics that BlackRock provides via its technology platform to support investment advisory and Aladdin clients are an important element of BlackRock's competitive success. Aladdin's competitive position is based in part on its ability to combine risk analytics with portfolio management, trading and operations tools on a single platform. Increased competition from risk analytics and investment management technology providers or a shift in client demand away to standalone or internally developed solutions, whether due to price competition, perceived client market share, platform flexibility or market-based or regulatory factors, may weaken Aladdin's competitive position and may cause the Company's revenue and earnings to decline. In addition, there can be no assurance that the Company will be able to effectively protect and enforce its intellectual property rights in Aladdin.

The failure or negative performance of products offered by competitors may cause AUM in similar BlackRock products to decline irrespective of BlackRock's performance.

Many competitors offer similar products to those offered by BlackRock and the failure or negative performance of competitors' products could lead to a loss of confidence in similar BlackRock products, irrespective of the performance of such products. Any loss of confidence in a product type could lead to withdrawals, redemptions and liquidity issues in such products, which may cause the Company's AUM, revenue and earnings to decline.

Changes in the value of seed and co-investments that BlackRock owns could affect its income and could increase the volatility of its earnings.

At December 31, 2017, BlackRock's net economic investment exposure of approximately \$2.1 billion in its investments (see "Item 7 — Management's Discussion and Analysis of Financial Condition and Results of Operations—Investments and Investments of Consolidated VIEs") primarily resulted from co-investments and seed investments in its sponsored investment funds. Movements in the equity, debt or currency markets, or in the price of real assets, commodities or other alternative investments, could lower the value of these investments as well as other minority investments, increase the volatility of BlackRock's earnings and cause earnings to decline.

Operating risks associated with BlackRock's securities lending program may result in client losses.

BlackRock lends securities to banks and broker-dealers on behalf of certain of its clients. In these securities lending transactions, the borrower is required to provide and maintain collateral at or above regulatory minimums. Securities on loan are marked to market daily to determine if the borrower is required to pledge additional collateral. BlackRock must manage this process and is charged with mitigating the associated operational risks. The failure of BlackRock's controls to mitigate such operational risks could result in financial losses for the Company's clients that participate in its securities lending programs (separate from

the risks of collateral investments), and BlackRock may be held liable for any failure to manage any such risks.

BlackRock indemnifies certain securities lending clients for specified losses as a result of a borrower default.

BlackRock provides borrower default indemnification to certain of its securities lending clients. In the event of a borrower default, BlackRock would use the collateral pledged by the borrower to repurchase securities out on loan in order to replace them in a client's account. Borrower default indemnification is limited to the shortfall that occurs in the event the collateral available at the time of the borrower's default is insufficient to repurchase those securities out on loan. BlackRock requires all borrowers to mark to market their pledged collateral daily to levels in excess of the value of the securities on loan to mitigate the likelihood of the indemnity being triggered. Where the collateral is in the form of cash, the indemnities BlackRock provides do not guarantee, assume or otherwise insure the investment performance or return of any cash collateral vehicle into which that cash collateral is invested. The amount of securities on loan as of December 31, 2017 and subject to indemnification was \$200 billion. BlackRock held, as agent, cash and securities totaling \$214 billion as collateral for indemnified securities on loan at December 31, 2017. Significant borrower defaults occurring simultaneously with rapid declines in the value of collateral pledged and/or increases in the value of the securities loaned may create collateral shortfalls, which could result in material liabilities under these indemnities and may cause the Company's revenue and earnings to decline.

BlackRock's decision to provide support to particular products from time to time, or the inability to provide support, may cause AUM, revenue and earnings to decline.

While not legally mandated, BlackRock may, at its option, from time to time choose to support investment products through capital or credit support for commercial or other reasons. Such support may utilize capital and liquidity that would otherwise be available for other corporate purposes. Losses on such support, as well as regulatory restrictions on the Company's ability to provide such support or the failure to have available or devote sufficient capital or liquidity to support products, may cause AUM, revenue and earnings to decline.

Increased geopolitical unrest could adversely affect the global economy or specific international, regional and domestic markets, which may cause BlackRock's AUM, revenue and earnings to decline.

Terrorist activity and the continued threat of terrorism and acts of civil or international hostility, both within the United States and abroad, as well as heightened security measures in response to these types of acts, may cause significant volatility and declines in the global markets, loss of life, property damage, disruptions to commerce and reduced economic activity. Global unrest or conflict or acts of terror, as well as any changes in the current geopolitical environment, may adversely affect the global economy or capital markets and cause BlackRock's AUM, revenue and earnings to decline.

RISKS RELATED TO INVESTMENT PERFORMANCE

Poor investment performance could lead to the loss of clients and may cause AUM, revenue and earnings to decline.

The Company's management believes that investment performance, including the efficient delivery of beta, is one of the most important factors for the growth and retention of AUM. Poor investment performance relative to applicable portfolio benchmarks or to competitors may cause AUM, revenue and earnings to decline as a result of:

- client withdrawals in favor of better performing products;
- client shifts to products that charge lower fees;
- the diminishing ability to attract additional funds from existing and new clients;
- reduced, minimal or no performance fees;
- an impairment to the value of intangible assets and goodwill; or
- a decrease in investment returns on seed and co-investment capital.

Performance fees may increase volatility of both revenue and earnings.

A portion of BlackRock's revenue is derived from performance fees on investment advisory assignments. Performance fees represented \$594 million, or 5%, of total revenue for the year ended December 31, 2017. Generally, the Company is entitled to a performance fee only if the agreement pursuant to which it is managing the assets provides for one and if returns on the related portfolio exceed agreed-upon periodic or cumulative return targets. If these targets are not exceeded, a performance fee for that period will not be earned and, if targets are based on cumulative returns, the Company may not earn performance fees in future periods. The volatility of the Company's future revenue and earnings may also be affected due to illiquid alternatives becoming an increasing component of the overall composition of the Company's performance fee generating assets. In particular, as BlackRock takes on more advisory assignments for illiquid investments, performance fees will generally be recognized over substantially longer multi-year periods than those associated with more liquid products.

Failure to identify errors in the quantitative models BlackRock utilizes to manage its business could adversely impact product performance and client relationships.

BlackRock employs various quantitative models to support its investment decisions and allocations, including those related to risk assessment, portfolio management, trading and hedging activities and product valuations. Any errors in the underlying models or model assumptions could have unanticipated and adverse consequences on BlackRock's business and reputation.

TECHNOLOGY AND OPERATIONAL RISKS

A failure in BlackRock's operational systems or infrastructure, including business continuity plans, could disrupt operations, damage the Company's reputation and cause BlackRock's AUM, revenue and earnings to decline.

BlackRock's infrastructure, including its technological capacity, data centers and office space, is vital to the

competitiveness of its business. Moreover, a significant portion of BlackRock's critical business operations are concentrated in a limited number of geographic areas, including San Francisco, New York, London and Gurgaon. The failure to maintain an infrastructure commensurate with the size and scope of BlackRock's business, or the occurrence of a business outage or event outside BlackRock's control, including a major earthquake, hurricane, fire, terrorist act, pandemic or other catastrophic event in any location at which BlackRock maintains a major presence, could materially impact operations, result in disruption to the business or impede its growth. In addition, despite BlackRock's efforts to ensure business continuity, if it fails to keep business continuity plans up-to-date or if such plans, including secure back-up facilities and systems and the availability of back-up employees, are improperly implemented or deployed during a disruption, the Company's ability to operate could be adversely impacted which may cause AUM, revenue and earnings to decline or impact the Company's ability to comply with regulatory obligations leading to reputational harm, regulatory fines and/or sanctions.

A cyber-attack or a failure to implement effective information and cybersecurity policies, procedures and capabilities could disrupt operations and cause financial losses that may cause BlackRock's AUM, revenue and earnings to decline.

BlackRock is dependent on the effectiveness of the information and cybersecurity policies, procedures and capabilities it maintains to protect its computer and telecommunications systems and the data that resides on or is transmitted through them. An externally caused information security incident, such as a cyber-attack including a phishing scam, virus, or denial-of-service attack, or an internally caused incident, such as failure to control access to sensitive systems, could materially interrupt business operations or cause disclosure or modification of sensitive or confidential client or competitive information. Moreover, BlackRock's increased use of mobile and cloud technologies could heighten these and other operational risks, as certain aspects of the security of such technologies may be complex, unpredictable or beyond BlackRock's control. BlackRock's growing exposure to the public Internet, as well as reliance on mobile or cloud technology or any failure by mobile technology and cloud service providers to adequately safeguard their systems and prevent cyber-attacks, could disrupt BlackRock's operations and result in misappropriation, corruption or loss of personal, confidential or proprietary information. In addition, there is a risk that encryption and other protective measures may be circumvented, particularly to the extent that new computing technologies increase the speed and computing power available.

There have been a number of recent highly publicized cases involving financial services and consumer-based companies reporting the unauthorized disclosure of client or customer information, as well as cyber-attacks involving the dissemination, theft and destruction of corporate information or other assets, as a result of failure to follow procedures by employees or contractors or as a result of actions by third parties, including actions by terrorist organizations and hostile foreign governments. BlackRock has been the target of attempted cyber-attacks, as well as the co-opting of its brand to create fraudulent websites, and must monitor and develop its systems to protect its

technology infrastructure and data from misappropriation or corruption, as the failure to do so could disrupt BlackRock's operations and cause financial losses. Although BlackRock takes protective measures and endeavors to strengthen its computer systems, software, technology assets and networks to prevent and address potential cyber-attacks, there can be no assurance that any of these measures prove effective. Moreover, due to the complexity and interconnectedness of BlackRock's systems, the process of upgrading or patching the Company's protective measures could itself create a risk of security issues or system disruptions for the Company, as well as for clients who rely upon, or have exposure to, BlackRock's systems.

In addition, due to BlackRock's interconnectivity with third-party vendors, advisors, central agents, exchanges, clearing houses and other financial institutions, BlackRock may be adversely affected if any of them are subject to a successful cyber-attack or other information security event, including those arising due to the use of mobile technology or a third-party cloud environment. BlackRock also routinely transmits and receives personal, confidential or proprietary information by email and other electronic means. The Company collaborates with clients, vendors and other third parties to develop secure transmission capabilities and protect against cyber-attacks. However, BlackRock cannot ensure that it or such third parties have all appropriate controls in place to protect the confidentiality of such information.

Any information security incident or cyber-attack against BlackRock or third parties with whom it is connected, including any interception, mishandling or misuse of personal, confidential or proprietary information, could result in material financial loss, loss of competitive position, regulatory fines and/or sanctions, breach of client contracts, reputational harm or legal liability, which, in turn, may cause BlackRock's AUM, revenue and earnings to decline.

Failure or unavailability of third-party dependencies may adversely affect Aladdin operations and could lead to a loss of clients and could impede BlackRock's productivity and growth.

BlackRock relies on its ability to maintain a robust and secure technological framework to maximize the benefit of the *Aladdin* platform. The analytical capabilities of *Aladdin* depend on the ability of a number of third parties to provide data and other information as inputs into *Aladdin* analytical calculations. The failure of these third parties to provide such data or information, or disruption of such information flows, could result in operational difficulties and adversely impact BlackRock's ability to provide services to its investment advisory and *Aladdin* clients.

Continuing enhancements to Aladdin's capabilities, as well as the expansion of BlackRock's Aladdin platform into new markets and geographies, may expose BlackRock to heightened cyber- and information-security, operational and data management risks.

The operation of BlackRock's *Aladdin* platform routinely involves updating existing capabilities, developing new functionalities and expanding coverage into new markets and geographies, including to address client or regulatory requirements. These activities may expose BlackRock to additional cyber- and information-security risks, as well as increased execution, operational and data management risks, particularly in new geographies and markets. In

addition, the highly regulated business activities of many *Aladdin* clients may indirectly expose BlackRock to heightened regulatory scrutiny. For example, the changing political and regulatory environment in certain jurisdictions in which *Aladdin* clients are based has required BlackRock to open new data centers in those jurisdictions in order to host client data in the client's home location. Operating new data centers in foreign jurisdictions may expose BlackRock to increased operational and information security risks, as well as additional regulatory risks associated with the compliance requirements of such jurisdictions. Any failure by BlackRock to manage or mitigate risks related to enhancing or expanding its *Aladdin* platform may lead to client attrition, reduced business, reputational harm or regulatory fines and/or sanctions, which may cause BlackRock's AUM, revenue and earnings to decline.

Failure to maintain adequate corporate and contingent liquidity may cause BlackRock's AUM, liquidity and earnings to decline, as well as harm its prospects for growth.

BlackRock's ability to meet anticipated cash needs depends upon a number of factors, including its ability to maintain and grow its AUM, creditworthiness and operating cash flows. Failure to maintain adequate liquidity could lead to unanticipated costs and force BlackRock to revise existing strategic and business initiatives. BlackRock's access to equity and debt markets and its ability to issue public or private debt, or secure lines of credit or commercial paper back-up lines, on reasonable terms may be limited by adverse market conditions, a reduction in its long- or short-term credit ratings, or changes in government regulations, including tax and interest rates. Failure to obtain funds and/or financing, or any adverse change to the cost of obtaining such funds and/or financing, may cause BlackRock's AUM, liquidity and earnings to decline, curtail its operations and limit or impede its prospects for growth.

BlackRock may be unable to develop new products and services and the development of new products and services may expose BlackRock to additional costs or operational risk.

BlackRock's financial performance depends, in part, on its ability to develop, market and manage new investment products and services. The development and introduction of new products and services require continued innovative efforts on the part of BlackRock and may require significant time and resources as well as ongoing support and investment. Substantial risk and uncertainties are associated with the introduction of new products and services, including the implementation of new and appropriate operational controls and procedures, shifting client and market preferences, the introduction of competing products or services and compliance with regulatory requirements. A failure to successfully manage these risks may have an adverse impact on BlackRock's reputation or cause the Company's costs to fluctuate, which may cause its AUM, revenue and earnings to decline.

Inorganic transactions may harm the Company's competitive or financial position if they are not successful.

BlackRock employs a variety of organic and inorganic strategies intended to enhance earnings, increase product offerings, access new clients, leverage advances in technology and expand into new geographies. Inorganic

strategies have included hiring smaller-sized investment teams, making minority investments in early- to mid-stage technological and other ventures and acquiring investment management businesses and other small and medium-sized companies or divisions of companies. Inorganic transactions involve a number of financial, accounting, tax, regulatory, geographical and operational challenges and uncertainties, including in some cases the assumption of pre-existing liabilities. Any failure to identify and mitigate these risks through due diligence and indemnification provisions could adversely impact BlackRock's reputation, may cause its AUM, revenue and earnings to decline, and may harm the Company's competitive position in the investment management industry. Moreover, there can be no assurance that BlackRock will be able to successfully integrate or realize the intended benefits from inorganic transactions.

Investments in real assets such as real estate, infrastructure and energy assets may expose BlackRock and its funds and accounts to new or increased risks and liabilities, as well as reputational harm.

Investments in real assets, including real estate, infrastructure and energy assets, may expose BlackRock and its funds and accounts to increased risks and liabilities that are inherent in the ownership and management of such assets. These may include:

- construction risks, including labor disputes or work stoppages, shortages of material or interruptions to the availability of necessary equipment;
- accidents, adverse weather, force majeure or catastrophic events, such as explosions, fires or terrorist activity beyond BlackRock's control;
- personal injury or property damage;
- failures on the part of third-party managers or sub-contractors appointed in connection with investments or projects to adequately perform their contractual duties or operate in accordance with applicable laws;
- exposure to stringent and complex foreign, federal, state and local laws, ordinances and regulations, including those related to financial crime, permits, government contracting, conservation, exploration and production, tenancy, occupational health and safety, foreign investment and environmental protection;
- environmental hazards, such as natural gas leaks, product and waste spills, pipeline and tank ruptures, and unauthorized discharges of products, wastes and other pollutants;
- changes to the supply and demand for properties and/or tenancies or fluctuations in the price of commodities;
- the financial resources of tenants; and
- contingent liabilities on disposition of assets.

The above risks may expose BlackRock's funds and accounts to additional expenses and liabilities, including costs associated with delays or remediation costs, and increased legal or regulatory costs, all of which could impact the returns earned by BlackRock's clients. These risks could also result in direct liability for BlackRock by exposing BlackRock to regulatory sanction or litigation, including claims for compensatory or punitive damages. Similarly, market conditions may change during the course of developments or projects in which BlackRock invests that make such development or project less attractive than at the time it was

commenced and potentially harm the investment returns of BlackRock's clients. The occurrence of any such events may expose BlackRock to reputational harm, divert management's attention away from BlackRock's other business activities or cause its AUM, revenue and earnings to decline.

Operating in international markets increases BlackRock's operational, political, regulatory and other risks.

As a result of BlackRock's extensive international operations, the Company faces associated operational, regulatory, reputational, political and foreign exchange rate risks, many of which are outside of the Company's control. Operating outside the United States may also expose BlackRock to increased compliance risks, as well as higher compliance costs to comply with U.S. and non-U.S. anti-corruption, anti-money laundering and sanctions laws and regulations. The failure of the Company's systems of internal control to mitigate such risks, or of its operating infrastructure to support its global activities, could result in operational failures and regulatory fines and/or sanctions, which may cause the Company's AUM, revenue and earnings to decline.

RISKS RELATED TO HUMAN CAPITAL

The potential for human error in connection with BlackRock's operational systems could disrupt operations, cause losses, lead to regulatory fines or damage the Company's reputation and may cause BlackRock's AUM, revenue and earnings to decline.

Many of BlackRock's operations are highly complex and are dependent on the Company's ability to process and monitor a large number of transactions, many of which occur across numerous markets and currencies at high volumes and frequencies. Although BlackRock expends considerable resources on systemic controls, supervision, technology and training in an effort to ensure that such transactions do not violate client guidelines and applicable rules and regulations or adversely affect clients, counterparties or the Company, BlackRock's operations are dependent on its employees. From time-to-time, employees make mistakes that are not always immediately detected by policies and procedures intended to prevent and detect such errors. These can include calculation errors, errors in software implementation or development, failure to follow protocols, patch systems, or report issues or errors in judgment. Human errors, even if promptly discovered and remediated, may disrupt operations or result in regulatory fines and/or sanctions, breach of client contracts, reputational harm or legal liability, which, in turn, may cause BlackRock's AUM, revenue and earnings to decline.

Fraud, the circumvention of controls or the violation of risk management and workplace policies could have an adverse effect on BlackRock's reputation, which may cause the Company's AUM, revenue and earnings to decline.

Although BlackRock seeks to foster a positive workplace culture, has adopted a comprehensive risk management process and continues to enhance various controls, procedures, policies and systems to monitor and manage risks, it cannot ensure that its workplace culture or such controls, procedures, policies and systems will successfully identify and manage internal and external risks. BlackRock is subject to the risk that its employees, contractors or other third parties may deliberately or recklessly seek to

circumvent established controls to commit fraud, pay or solicit bribes or otherwise act in ways that are inconsistent with the Company's controls, policies, procedures, workplace culture or principles. Persistent attempts to circumvent policies and controls or repeated incidents involving fraud, conflicts of interests or transgressions of policies and controls could have an adverse effect on BlackRock's reputation, which could cause adverse publicity, costly regulatory inquiries, fines and/or sanctions and may cause the Company's AUM, revenue and earnings to decline.

The failure to recruit and retain employees and develop and implement effective executive succession could lead to the loss of clients and may cause AUM, revenue and earnings to decline.

BlackRock's success is largely dependent on the talents and efforts of its highly skilled workforce and the Company's ability to plan for the future long-term growth of the business by identifying and developing those employees who can ultimately transition into key roles within BlackRock. The global market for qualified fund managers, investment analysts, technology and risk specialists and other professionals is competitive, and factors that affect BlackRock's ability to attract and retain such employees include the Company's reputation and workplace culture, the immigration policies in the jurisdictions in which BlackRock has offices, the compensation and benefits it provides, and its commitment to effectively managing executive succession, including the development and training of qualified individuals.

In addition, a percentage of the deferred compensation that BlackRock pays to its employees is tied to the Company's share price. As such, if BlackRock's share price were to decrease materially, the retention value of such deferred compensation would decrease. There can be no assurance that the Company will continue to be successful in its efforts to recruit and retain employees and effectively manage executive succession. If BlackRock is unable to offer competitive compensation or otherwise attract and retain talented individuals, or if it fails to effectively manage executive succession, the Company's ability to compete effectively and retain its existing clients may be materially impacted.

RISKS RELATED TO KEY THIRD-PARTY RELATIONSHIPS

The impairment or failure of third parties may cause BlackRock's AUM, revenue and earnings to decline.

BlackRock's investment management activities expose the products and accounts it manages to many different industries and counterparties, including distributors, brokers and dealers, commercial and investment banks, clearing organizations, mutual and hedge funds, and other institutional clients. Transactions with counterparties expose the products and accounts BlackRock manages to credit risk in the event the applicable counterparty defaults. Although BlackRock regularly assesses risks posed by its counterparties, such counterparties may be subject to sudden swings in the financial and credit markets that may impair their ability to perform or they may otherwise fail to meet their obligations. Any such impairment or failure could negatively impact the performance of products or accounts managed by BlackRock, which could lead to the loss of clients and may cause BlackRock's AUM, revenue and earnings to decline.

The failure of a key vendor to BlackRock to fulfill its obligations could have a material adverse effect on BlackRock's reputation or business, which may cause the Company's AUM, revenue and earnings to decline.

BlackRock depends on a number of key vendors for various fund administration, accounting, custody, market data, market indices and transfer agent roles and other distribution and operational needs. BlackRock performs focused diligence on its vendors in an effort to ensure they operate in accordance with expectations; however, to the extent any significant deficiencies are uncovered, there may be few, or no, feasible alternative vendors available to BlackRock in certain areas.

In addition, BlackRock may from time to time transfer key contracts from one vendor to another. For example, BlackRock is currently in the process of moving custody services on more than \$1 trillion of client assets from State Street Corp. to JPMorgan Chase & Co., the migration of which is expected to be complete by the end of 2018. Key contract transfers may be costly and complex, and expose BlackRock to heightened operational risks. Any failure to mitigate such risks could result in reputational harm, as well as financial losses to BlackRock and its clients. The failure or inability of BlackRock to diversify its sources for key services or the failure of any key vendor to fulfill its obligations could result in activities inconsistent with clients' investment management agreements, have an adverse financial impact on BlackRock products or lead to operational and regulatory issues for the Company, which could result in reputational harm or legal liability, fines and/or sanctions and may cause BlackRock's AUM, revenue and earnings to decline.

Any disruption to the Company's distribution channels may cause BlackRock's AUM, revenue and earnings to decline.

BlackRock relies on a number of third parties to provide distribution, portfolio administration and servicing for certain BlackRock investment management products and services through their various distribution channels. BlackRock's ability to maintain strong relationships with its distributors may impact the Company's future performance, and its relationships with distributors are subject to periodic renegotiation that may result in increased distribution costs and/or reductions in the amount of BlackRock products and services being marketed or distributed. Moreover, new fiduciary regulations could lead to significant shifts in distributors' business models and more limited product offerings, potentially resulting in reduced distribution and/or marketing of certain of the Company's products and services and fee compression. If BlackRock is unable to distribute its products and services successfully, if it experiences an increase in distribution-related costs, or if it is unable to replace or renew existing distribution arrangements, BlackRock's AUM, revenue and earnings may decline. In addition, improper activities, as well as inadequate anti-money laundering diligence conducted by third-party distributors, could create reputational harm to BlackRock.

Disruption to the operations of third parties whose functions are integral to BlackRock's Exchange-Traded Fund ("ETF") platform may adversely affect the prices at which ETFs trade, particularly during periods of market volatility.

BlackRock is the largest provider of ETFs globally. Shares of ETFs trade on stock exchanges at prices at, above or below the ETF's most recent net asset value. The net asset value of

an ETF is calculated at the end of each business day and fluctuates with changes in the market value of the ETF's holdings. The trading price of the ETF's shares fluctuates continuously throughout trading hours. While an ETF's creation/redemption feature and the arbitrage mechanism are designed to make it more likely that the ETF's shares normally will trade at prices close to the ETF's net asset value, exchange prices may deviate significantly from the ETF's net asset value. ETF market prices are subject to numerous potential risks, including trading halts invoked by a stock exchange, inability or unwillingness of market makers, authorized participants, settlement systems or other market participants to perform functions necessary for an ETF's arbitrage mechanism to function effectively, or significant market volatility. Although BlackRock and other large issuers of ETFs are working with market participants to seek to enhance U.S. equity market resiliency, there can be no assurance that structural reforms will be implemented in a timely or effective fashion, or at all. Moreover, if market events lead to incidences where ETFs trade at prices that deviate significantly from an ETF's net asset value, or trading halts are invoked by the relevant stock exchange or market, investors may lose confidence in ETF products and redeem their holdings, which may cause BlackRock's AUM, revenue and earnings to decline.

LEGAL AND REGULATORY RISKS

BlackRock is subject to extensive regulation around the world.

BlackRock's business is subject to extensive regulation around the world. These regulations subject BlackRock's business activities to an array of increasingly detailed operational requirements, compliance with which is costly and complex. In addition, many of BlackRock's legal entities may be subject to laws and regulations aimed at preventing corruption, money laundering, inappropriate employment practices, illegal payments and engaging in business activities with certain individuals, countries or groups, including but not limited to the U.S. Foreign Corrupt Practices Act, the USA PATRIOT Act, the Bank Secrecy Act and the U.K. Bribery Act. BlackRock is also subject to certain risk retention rules and regulation, as well as regulatory capital requirements, in the United States and abroad, which require the Company to maintain capital to support certain of its businesses. To the extent that these rules and regulations become more stringent, or if BlackRock is required to hold increased levels of capital to support its businesses, the Company's financial performance or plans for growth may be adversely impacted.

BlackRock may also be adversely affected by its failure to comply with current laws and regulations or by changes in the interpretation or enforcement of existing laws and regulations. Challenges associated with interpreting regulations issued in numerous countries in a globally consistent manner may add to such risks, if regulators in different jurisdictions have inconsistent views or provide only limited regulatory guidance. In particular, violation of applicable laws or regulations could result in fines and/or sanctions, temporary or permanent prohibition of certain activities, reputational harm and related client terminations, suspensions of employees or revocation of their licenses, suspension or termination of investment adviser, broker-dealer or other registrations, or suspension or termination of bank charter or other sanctions, which could have a material adverse effect on BlackRock's reputation or business and

may cause the Company's AUM, revenue and earnings to decline. For a more extensive discussion of the laws, regulations and regulators to which BlackRock is subject, see "Item 1 — Business — Regulation."

Regulatory reforms in the United States expose BlackRock to increasing regulatory scrutiny, as well as regulatory uncertainty.

In recent years a number of regulatory reforms have been introduced in the United States, including several that remain proposals or that are at various phases of implementation, and the level of regulatory scrutiny to which BlackRock is subject has increased. In addition, there are numerous potential changes to financial services regulation under current consideration, including reform and repeal initiatives arising out of or in connection with the executive order issued in February 2017 directing the U.S. Department of the Treasury ("Treasury") to identify the extent to which existing laws, treaties, rules, regulations and policies promote, support or inhibit certain core principles for financial regulation set forth in the order (the "Executive Order"), that may directly or indirectly impact BlackRock's business or operating activities. BlackRock, as well as its clients, vendors and distributors, have expended resources and altered certain of their business or operating activities to prepare for, address and meet the requirements that such regulatory reforms impose. While BlackRock is, or may become, subject to numerous reform initiatives in the United States, see "Item 1 — Business — Regulation," key regulatory reforms that may impact the Company include:

- *Designation as a systemically important financial institution ("SIFI")*: The Financial Stability Oversight Council ("FSOC") has the authority to designate nonbank financial institutions as SIFIs. The FSOC's most recent statements generally indicate that it is focused on products and activities, rather than designation, in its review of asset managers. The Treasury report on asset management, issued in October 2017 pursuant to the Executive Order, also expressed this view. In addition, in November 2017, Treasury made recommendations concerning the process by which the FSOC designates nonbanks as SIFIs, further supporting a products and activities approach to addressing risks in asset management. In the event that BlackRock is designated as a SIFI, under Dodd-Frank, the Federal Reserve is charged with establishing enhanced regulatory requirements for nonbank financial institutions and BlackRock could become subject to direct supervision by the Federal Reserve.
- *Securities and Exchange Commission ("SEC") Rulemakings for US Registered Funds and Investment Advisers*: The SEC is engaged in a period of rule-making in an effort to improve and modernize the regulatory structure governing the asset management industry, and registered investment companies in particular. In so doing, it has adopted rules that include (i) new monthly and annual reporting requirements for certain U.S. registered funds; (ii) enhanced reporting regimes for investment advisers; and (iii) implementing liquidity risk management programs for ETFs and open-end funds, other than money market funds. These rules, many of which are currently in an implementation period, will increase BlackRock's public reporting and disclosure requirements, which could be costly and may impede BlackRock's growth. Certain other rules impacting investment advisers and U.S. registered

funds were proposed (or were under discussion for proposal) by the SEC's prior leadership, however the SEC's current leadership has indicated that these efforts are not expected to result in any short-term action. In the event the SEC moves forward with any such proposals, any new rules, guidance or regulatory initiatives could expose BlackRock to additional compliance costs and may require the Company to change how it operates its business and/or manages its funds.

- *The Volcker Rule*: Provisions of Dodd-Frank referred to as the "Volcker Rule" created a new section of the Bank Holding Company Act that places limitations on the ability of banks and their subsidiaries to engage in proprietary trading and to invest in and transact with certain private investment funds, including hedge funds, private equity funds and funds of funds (collectively "covered funds"). The Bank Holding Company Act by its terms does not currently apply to BlackRock. The Federal Reserve currently takes the position that PNC's ownership interest in BlackRock, which is approximately 22%, causes BlackRock to be treated as a nonbank subsidiary of PNC for the purpose of the Bank Holding Company Act and that BlackRock is subject to banking regulation. Based on this interpretation of the Bank Holding Company Act, the Federal Reserve could initiate a process to formally determine that PNC controls BlackRock under the terms of the Bank Holding Company Act. Any such determination, if successful, would subject BlackRock to current and future regulatory requirements under the Bank Holding Company Act, including the Volcker Rule. Conformance with the Volcker Rule may require BlackRock to remove its name from the names of its covered funds, and to sell certain seed and co-investments that it holds in those funds, which may occur at a discount to existing carrying value depending on market conditions.
- *Revised Department of Labor ("DOL") Fiduciary Rule*: In April 2016, the DoL published a new regulation defining the term "fiduciary" for purposes of the fiduciary responsibility provisions of Title I of the Employee Retirement Income Security Act of 1974 and the prohibited transaction excise tax provisions of the Internal Revenue Code. The substantive provisions of the rule began to apply in June 2017. However, the applicability date of many conditions of the prohibited transaction exemptions accompanying the rule has been delayed until July 2019, while the DoL continues its re-examination of the rule and the prohibited transaction exemptions. If the DoL does not repeal or revise the rule or revise the prohibited transaction exemptions, the rule could require BlackRock to revise a number of its distribution relationships, create compliance and operational challenges for BlackRock's distribution partners and may limit BlackRock's ability to provide certain useful services and education to its clients.

Regulatory reforms in the United States could require BlackRock to alter its future business or operating activities, which could be costly, impede the Company's growth and cause its AUM, revenue and earnings to decline. Regulatory reform may also impact BlackRock's banking, insurance company and pension fund clients, which could cause them to change their investment strategies or allocations in manners that may be adverse to BlackRock.

International regulatory reforms expose BlackRock and its clients to increasing regulatory scrutiny, as well as regulatory uncertainty.

BlackRock's business and operating activities are subject to increasing regulatory oversight outside of the United States and the Company may be affected by a number of pending regulatory reform initiatives in EMEA and the Asia-Pacific region, as well as volatility associated with international regulatory uncertainty, including:

- *British Exit from the European Union:* Following the June 2016 vote to exit the European Union ("EU"), the United Kingdom served notice under Article 50 of the Treaty on European Union on March 29, 2017 to initiate the process of exiting from the EU, commonly referred to as "Brexit". The outcome of the negotiations between the United Kingdom and the EU in connection with Brexit is highly uncertain and information regarding the long-term consequences is expected to become clearer over time as negotiations progress. The Company continues to prepare for a range of potential outcomes in connection with Brexit.
- *Designation as a systemically important financial institution:* The Financial Stability Board ("FSB") working with the International Organization of Securities Commissions ("IOSCO") is considering potential systemic risk related to asset management; statements made by these organizations have generally indicated that they are, at this time, focused on a products and activities, rather than designation, approach in their review of asset managers. The FSB has indicated that it may develop criteria for designation of nonbank non-insurers in the future to address "residual risks". Any measures applied in relation to a G-SIFI designation from the FSB would need to be implemented through existing regulatory processes and procedures by relevant national authorities.
- *Reform of EU investment markets:* The European Commission has revised the Directive governing the provision of investment services in Europe ("MiFID") and introduced an associated Regulation (together with certain secondary regulation, "MiFID II"). The Regulation's requirements apply consistently across the EU, whereas there may be some variation in the application of MiFID as between EU Member States. The MiFID II reforms, which came into force in January 2018, are substantive, materially changing market transparency requirements and enhancing protections afforded to investors. New disclosure and reporting obligations have been introduced, together with restrictions on how research may be funded and the nature of payments that may be provided to distributors. MiFID II, together with other market structure reforms, will additionally force more derivatives to be traded on-exchange and introduce new commodity derivatives position limits. The broad nature of the MiFID II reforms may impact BlackRock's product development, client servicing and distribution models. In particular, additional disclosures are required in respect of costs and fees BlackRock charges to certain of its clients. MiFID II may also impact the ability of certain of BlackRock's distribution partners to accept commissions. Market structure reforms may also impact the way that the Company executes investment decisions for client portfolios and reports on such transactions and could have an impact on general market liquidity.

- *Revised EU capital requirements:* EU regulators are considering how to design an appropriate capital regime for non-systemically important investment firms as the current regime is based on banking requirements and has not been modified for asset managers. In December 2017, the European Commission published a legislative proposal addressed to the European Parliament and Council for a new Directive and new Regulation on prudential requirements for MiFID investment firms. The new legislative package is currently expected to come into effect in 2020 following agreement between the European Council and Parliament. Once implemented, any new requirements could result in significant changes to the methodology used to determine the amount of regulatory capital that BlackRock is required to hold in the EU.
- *EU market access:* The European Commission and certain EU Member States have recently advanced a more restrictive approach to the need for "equivalence", which is the process by which the legal, regulatory and/or supervisory system in non-EU Member States is recognized by the European Commission as comparably effective to that in the EU, thereby allowing such non-EU Member States access to the EU single market in financial services. Additionally, in September 2017, the European Commission issued a proposal to enhance the European Supervisory Authorities' powers by requiring that all third-country outsourcing, delegation and risk transfer arrangements be assessed by the European Securities and Markets Authority ("ESMA"). If enacted, the proposal would transfer to ESMA the ability of EU Member States to authorize the outsourcing of asset management activities beyond the EU's borders. The proposal could have a significant impact on asset management firms with operations based outside of the EU, including BlackRock, and it may affect the Company's ability to delegate fund management and/or costs associated with such delegation.
- *EU money market fund reform:* In November 2016, the EU council announced political agreement with the European Parliament on certain money market funds reforms that are intended to reduce perceived risks associated with these products. The final text was published in the Official Journal of the EU in June 2017, starting an 18-month transition period for existing funds to comply. The reforms will limit the use of constant net asset value money market funds to those holding only government debt, and introduce a new category of "low volatility net asset value" money market funds, with both categories of money market funds being subject to reinforced liquidity requirements as well as safeguards such as liquidity fees and redemption gates. They may also reduce the attractiveness of certain money market funds to investors. BlackRock is evaluating the reforms and potential impact to its existing constant net asset value money market funds.
- *New disclosures to retail consumers:* EU legislators have introduced a new "Key Information Document" ("KID"), which is applicable where a retail consumer is sold Packaged Retail and Insurance-based Investment Products ("PRIIPs") and which came into effect in January 2018. The KID must include specific information on costs, risks and performance. BlackRock is required to produce a KID for each fund in scope, as

well as to make information available to distribution partners who sell these funds in the EU.

- **Increased international regulatory scrutiny:** BlackRock and its subsidiaries are subject to the authority of numerous governmental and regulatory bodies outside of the United States. These regulators have imposed numerous regulations, guidelines and standards on the activities of BlackRock and its subsidiaries covering a variety of areas, including capital resources requirements, marketing activities, client and investor protections, senior management arrangements, and system and control requirements. In the event that BlackRock or any of its subsidiaries fail to comply with these often complex guidelines, regulations and standards, the regulators have broad powers to suspend or revoke any licenses they may have granted and/or to impose fines and/or sanctions.

International regulatory reforms could require BlackRock to alter its future business or operating activities, which could be time-consuming and costly, impede the Company's growth and cause its AUM, revenue and earnings to decline. Regulatory reform may also impact BlackRock's internationally-based clients, which could cause them to change their investment strategies or allocations in manners that may be adverse to BlackRock.

Legal proceedings may cause the Company's AUM, revenue and earnings to decline.

BlackRock is subject to a number of sources of potential legal liability and the Company, certain of the investment funds it manages and certain of its subsidiaries and employees have been named as defendants in various legal actions, including arbitrations, class actions and other litigation arising in connection with BlackRock's activities. Certain of BlackRock's subsidiaries and employees are also subject to periodic examination, special inquiries and potential proceedings by regulatory authorities, including the Securities Exchange Commission, Office of the Comptroller of the Currency ("OCC"), DoL, Commodity Futures Trading Commission, Financial Conduct Authority and Federal Reserve. Similarly, from time to time, BlackRock receives subpoenas or other requests for information from various U.S. and non-U.S. governmental and regulatory authorities in connection with certain industry-wide, company-specific or other investigations or proceedings. These examinations, inquiries and proceedings have in the past and could in the future, if compliance failures or other violations are found, cause the relevant regulator to institute proceedings and impose sanctions for violations. Any such action may also result in litigation by investors in BlackRock's funds, other BlackRock clients or BlackRock's shareholders, which could harm the Company's reputation and may cause its AUM, revenue and earnings to decline, potentially harm the investment returns of the applicable fund, or result in the Company being liable for damages.

In addition, when clients retain BlackRock to manage their assets or provide them with products or services, they typically specify contractual requirements or guidelines that BlackRock must observe in the provision of its services. A failure to comply with these guidelines or requirements could expose BlackRock to lawsuits, harm its reputation or cause clients to withdraw assets or terminate contracts.

As BlackRock's business continues to grow, the Company must routinely address conflicts of interest, as well as the

perception of conflicts of interest, between itself and its clients, employees or vendors. In addition, the SEC and other regulators have increased their scrutiny of potential conflicts. BlackRock has procedures and controls in place that are designed to detect and address these issues. However, appropriately dealing with conflicts of interest is complex and if the Company fails, or appears to fail, to deal appropriately with any conflict of interest, it may face reputational damage, litigation, regulatory proceedings, or penalties, fines and/or sanctions, any of which may cause BlackRock's AUM, revenue and earnings to decline.

BlackRock is subject to U.S. banking regulations that may limit its business activities.

BlackRock's trust bank subsidiary, which is a national banking association chartered by the OCC, is subject to OCC regulation and capital requirements. The OCC has broad supervisory and enforcement authority over BlackRock's trust bank. Being subject to banking regulation may put BlackRock at a competitive disadvantage because certain of its competitors are not subject to these limitations. In addition, as described in "Item 1-Business-Regulation", PNC owns approximately 22% of BlackRock's capital stock, which may subject BlackRock to banking regulation as a nonbank subsidiary of PNC. The Bank Holding Company Act by its terms does not currently apply to BlackRock. The Federal Reserve currently takes the position that this ownership interest causes BlackRock to be treated as a nonbank subsidiary of PNC for the purpose of the Bank Holding Company Act and that BlackRock is subject to banking regulation. Based on this interpretation of the Bank Holding Company Act, the Federal Reserve could initiate a process to formally determine that PNC controls BlackRock under the terms of the Bank Holding Company Act. Any such determination, if successful, would subject BlackRock to current and future regulatory requirements under the Bank Holding Company Act, including the Volcker Rule, that are more restrictive than those the Company is subject to under other applicable laws, as well as the enforcement authority of the Federal Reserve, which includes the power to impose substantial fines and other penalties for violations. Any effort by BlackRock to contest a control determination by the Federal Reserve may be costly and complex and may not result in a reversal of such determination.

Failure to comply with ownership reporting requirements could result in harm to BlackRock's reputation and may cause its AUM, revenue and earnings to decline.

Of note among the various international regulations to which BlackRock is subject are the extensive and increasingly stringent regulatory reporting requirements that necessitate the monitoring and reporting of issuer exposure levels (thresholds) across the holdings of managed funds and accounts and those of the Company. The specific triggers and the reporting methods that these threshold filings entail vary significantly by regulator and across jurisdictions. BlackRock continues to invest in technology, training and its employees to further enhance its monitoring and reporting functions. Despite these investments, the complexity of the various threshold reporting requirements combined with the breadth of the assets managed by the Company and high volume of securities trading have caused errors and omissions to occur in the past, and pose a risk that errors or omissions may occur in the future. Any such errors may expose BlackRock to monetary penalties, which could have

an adverse effect on BlackRock's reputation and may cause its AUM, revenue and earnings to decline.

BlackRock has been the subject of third-party commentary citing concerns about index investing and common ownership.

As a leader in the index investing and asset management industry, BlackRock has been the subject of third-party commentary citing concerns about the growth of index investing, as well as perceived competition issues associated with asset managers managing stakes in multiple companies within certain industries, known as "common ownership". The commentators argue that index funds have the potential to distort investment flows, create stock price bubbles, or conversely, exacerbate a decline in market prices. Additional commentary focuses on competition issues associated with common ownership and purports to link aggregated equity positions in certain concentrated industries managed by asset managers with higher consumer prices and escalating executive compensation, among other things. Although there is substantial literature highlighting the benefits of index investing, as well as casting doubt on the assumptions, methodology and conclusions associated with common ownership arguments, some commentators have proposed policy measures in connection with the discourse in this area, including limits on stakes managed by asset managers. If the conclusions advanced by such commentators were to gain traction or result in the enactment of policy measures that place limits on asset managers, BlackRock's business operations, reputation or financial condition may be adversely affected.

New tax legislation or changes to existing U.S. and non-U.S. tax laws, treaties and regulations or challenges to BlackRock's historical taxation practices may adversely affect BlackRock's effective tax rate, business and overall financial condition.

BlackRock's businesses may be directly or indirectly affected by tax legislation and regulation, or the modification of existing tax laws, by U.S. or non-U.S. authorities. On December 22, 2017, the Tax Cuts and Jobs Act (the "2017 Tax Act") was enacted. Over the next few months, as the Company finalizes the impact of tax reform and clarifies the potential for future investment opportunities, BlackRock intends to reassess its capital management plans for the balance of 2018.

In addition, certain EU Member States have enacted financial transaction taxes ("FTTs"), which impose taxation on a broad range of financial instrument and derivatives transactions, and the European Commission has proposed legislation to harmonize these taxes and provide for the adoption of EU-level legislation applicable to some (but not all) EU Member States. If introduced as proposed, FTTs could have an adverse effect on BlackRock's financial results and on clients' performance results.

The application of complex tax regulations involves numerous uncertainties, and in the normal course of business U.S. and non-U.S. tax authorities may review and challenge tax positions adopted by BlackRock. These challenges may result in adjustments to, or impact the timing or amount of, taxable income, deductions or other tax allocations, which may adversely affect BlackRock's effective tax rate and overall financial condition.

RISKS RELATED TO BLACKROCK'S SIGNIFICANT SHAREHOLDER

PNC owns 22% of BlackRock's capital stock. Future sales or distributions of BlackRock's common stock in the public market by the Company or PNC could adversely affect the trading price of BlackRock's common stock.

As of December 31, 2017, PNC owned 22% of the Company's capital stock. Sales or distributions of a substantial number of shares of BlackRock's common stock in the public market, or the perception that these sales or distributions might occur, may cause the market price of BlackRock's common stock to decline.

PNC has agreed to vote as a stockholder in accordance with the recommendation of BlackRock's Board of Directors, and certain actions will require special board approval or the prior approval of PNC.

As discussed in BlackRock's proxy statement, PNC has agreed to vote all of its voting shares in accordance with the recommendation of BlackRock's Board of Directors in accordance with the provisions of its stockholder agreement with BlackRock. As a consequence, if the shares held by PNC constitute a substantial portion of the outstanding voting shares, matters submitted to a stockholder vote that require a majority or a plurality of votes for approval, including elections of directors, will have a substantial number of shares voted in accordance with the determination of the BlackRock Board of Directors. This arrangement has the effect of concentrating a significant block of voting control over BlackRock in its Board of Directors, whether or not stockholders agree with any particular determination of the Board.

As discussed in BlackRock's proxy statement, pursuant to BlackRock's stockholder agreement with PNC, the following may not be done without prior approval of all of the independent directors, or at least two-thirds of the directors, then in office:

- appointment of a new Chief Executive Officer of BlackRock;
- any merger, issuance of shares or similar transaction in which beneficial ownership of a majority of the total voting power of BlackRock capital stock would be held by persons different than the persons holding such majority of the total voting power prior to the occurrence of any such merger, issuance of shares or similar transaction, or any sale of all or substantially all assets of BlackRock;
- any acquisition of any person or business which has a consolidated net income after taxes for its preceding fiscal year that equals or exceeds 20% of BlackRock's consolidated net income after taxes for its preceding fiscal year if such acquisition involves the current or potential issuance of BlackRock capital stock constituting more than 10% of the total voting power of BlackRock capital stock issued and outstanding immediately after completion of such acquisition;
- any acquisition of any person or business constituting a line of business that is materially different from the lines of business BlackRock and its controlled affiliates are engaged in at that time if such acquisition involves consideration in excess of 10% of the total assets of BlackRock on a consolidated basis;

- except for repurchases otherwise permitted under the stockholder agreement, any repurchase by BlackRock or any subsidiary of shares of BlackRock capital stock such that after giving effect to such repurchase BlackRock and its subsidiaries shall have repurchased more than 10% of the total voting power of BlackRock capital stock within the 12-month period ending on the date of such repurchase;
- any amendment to BlackRock's certificate of incorporation or bylaws; or
- any matter requiring stockholder approval pursuant to the rules of the New York Stock Exchange.

Additionally, BlackRock may not enter into any of the following transactions without the prior approval of PNC:

- any sale of any subsidiary of BlackRock, the annualized revenue of which, together with the annualized revenue of any other subsidiaries disposed of within the same year, are more than 20% of the annualized revenue of BlackRock for the preceding fiscal year on a consolidated basis;
- for so long as BlackRock is deemed a subsidiary of PNC for purposes of the Bank Holding Company Act, entering into any business or activity that is prohibited for any such subsidiary under the Bank Holding Company Act;
- any amendment of any provision of a stockholder agreement between BlackRock and any stockholder beneficially owning greater than 20% of BlackRock capital stock that would be viewed by a reasonable person as being adverse to PNC or materially more favorable to the rights of any stockholder beneficially owning greater than 20% of BlackRock capital stock than to PNC;
- any amendment, modification, repeal or waiver of BlackRock's certificate of incorporation or bylaws that would be viewed by a reasonable person as being adverse to the rights of PNC or more favorable to the rights of any stockholder beneficially owning greater than 20% of BlackRock capital stock, or any settlement or consent in a regulatory enforcement matter that would be reasonably likely to cause PNC or any of its affiliates to suffer regulatory disqualification, suspension of registration or license or other material adverse regulatory consequences; or
- a voluntary bankruptcy or similar filing by BlackRock.

Item 1B. Unresolved Staff Comments

The Company has no unresolved comments from the SEC staff relating to BlackRock's periodic or current reports filed with the SEC pursuant to the Exchange Act.

Item 2. Properties

BlackRock's principal office, which is leased, is located at 55 East 52nd Street, New York, New York. BlackRock leases additional office space in New York City at 40 East 52nd Street and 49 East 52nd Street, and throughout the world, including Boston, Chicago, Edinburgh, Gurgaon (India), Hong Kong, London, Melbourne (Australia), Munich, Princeton (New Jersey), San Francisco, Seattle, Singapore,

Sydney, Taipei and Tokyo. The Company also owns an 84,500 square foot office building in Wilmington (Delaware) and a 43,000 square foot data center in Amherst (New York).

Item 3. Legal Proceedings

From time to time, BlackRock receives subpoenas or other requests for information from various U.S. federal, state governmental and regulatory authorities and international regulatory authorities in connection with industry-wide or other investigations or proceedings. It is BlackRock's policy to cooperate fully with such inquiries. The Company and certain of its subsidiaries have been named as defendants in various legal actions, including arbitrations and other litigation arising in connection with BlackRock's activities. Additionally, BlackRock-advised investment portfolios may be subject to lawsuits, any of which potentially could harm the investment returns of the applicable portfolio or result in the Company being liable to the portfolios for any resulting damages.

On May 27, 2014, certain investors in the BlackRock Global Allocation Fund, Inc. and the BlackRock Equity Dividend Fund (collectively, the "Funds") filed a consolidated complaint (the "Consolidated Complaint") in the U.S. District Court for the District of New Jersey against BlackRock Advisors, LLC, BlackRock Investment Management, LLC and BlackRock International Limited under the caption *In re BlackRock Mutual Funds Advisory Fee Litigation*. The Consolidated Complaint, which purports to be brought derivatively on behalf of the Funds, alleges that the defendants violated Section 36(b) of the Investment Company Act by receiving allegedly excessive investment advisory fees from the Funds. On February 24, 2015, the same plaintiffs filed another complaint in the same court against BlackRock Investment Management, LLC and BlackRock Advisors, LLC. Both complaints seek, among other things, to recover on behalf of the Funds all allegedly excessive advisory fees received by defendants in the twelve month period preceding the start of each lawsuit, along with purported lost investment returns on those amounts, plus interest. The defendants believe the claims in both lawsuits are without merit and are vigorously defending the actions. On September 25, 2017, the defendants filed a motion for summary judgment to dismiss the lawsuit, which is pending.

In November 2015, BlackRock, Inc., BlackRock Realty Advisors, Inc. ("BRA"), BlackRock US Core Property Fund, Inc. (formerly known as BlackRock Granite Property Fund, Inc.) ("Granite Fund"), and certain other Granite Fund related entities (collectively, the "BlackRock Parties") were named as defendants in thirteen lawsuits filed in the Superior Court of the State of California for the County of Alameda arising out of the June 16, 2015 collapse of a balcony at the Library Gardens apartment complex in Berkeley, California (the "Property"). The Property is indirectly owned by the Granite Fund, which is managed by BRA. The plaintiffs also named as defendants in the lawsuits Greystar, which manages the Property, and certain other non-BlackRock related entities, including the developer of the Property, building contractors and building materials suppliers. The plaintiffs alleged, among other things, that the BlackRock Parties were negligent in their ownership, control and maintenance of the Property's balcony, and sought monetary, including punitive, damages. Additionally, on March 16, 2016, three former tenants of the Library Gardens apartment unit who were not physically injured but experienced the balcony collapse sued

the BlackRock Parties for emotional damages. In November 2017, the BlackRock Parties settled all of the lawsuits relating to Library Gardens.

On June 16, 2016, *iShares* Trust, BlackRock, Inc. and certain of its advisory affiliates, and the directors and certain officers of the *iShares* ETFs were named as defendants in a purported class action lawsuit filed in California state court. The lawsuit was filed by investors in certain *iShares* ETFs (the "ETFs"), and alleges the defendants violated the federal securities laws, purportedly by failing to adequately disclose in prospectuses issued by the ETFs the risks to the ETFs' shareholders in the event of a "flash crash." Plaintiffs seek unspecified monetary damages. The plaintiffs' complaint was dismissed in December 2016 and on January 6, 2017, plaintiffs filed an amended complaint. The defendants filed a motion for judgment on the pleadings dismissing that complaint. On September 18, 2017, the court dismissed the lawsuit. On December 1, 2017, the plaintiffs appealed the dismissal of their lawsuit.

On April 5, 2017, BlackRock, Inc., BlackRock Institutional Trust Company, N.A. ("BTC"), the BlackRock, Inc. Retirement Committee and various sub-committees, and a BlackRock employee were named as defendants in a purported class action lawsuit brought in the U.S. District Court for the Northern District of California by a former employee on behalf of all BlackRock employee 401(k) Plan (the "Plan") participants and beneficiaries in the Plan from April 5, 2011, to the present. The lawsuit generally alleges that the defendants breached their duties towards Plan participants in violation of the Employee Retirement Income Security Act of 1974 by, among other things, offering investment options that were overly expensive, underperformed peer funds, focused disproportionately on active versus passive strategies, and were unduly concentrated with investment

options managed by BlackRock. While the complaint does not contain any specific amount in alleged damages, it claims that the purported underperformance and hidden fees cost Plan participants more than \$60 million. On October 10, 2017, the plaintiffs filed an Amended Complaint, which, among other things, adds as defendants certain current and former members of the BlackRock Retirement and Investment Committees. The Amended Complaint also includes a new purported class claim on behalf of investors in certain Collective Trust Funds ("CTFs") managed by BTC. Specifically, the plaintiffs allege that BTC, as fiduciary to the CTFs, engaged in self-dealing by, most significantly, selecting itself as the lending agent on terms that plaintiffs claim were excessive. The defendants believe the claims in this lawsuit are without merit and is vigorously defending the action. BlackRock moved to dismiss the Amended Complaint on November 8, 2017.

Management, after consultation with legal counsel, currently does not anticipate that the aggregate liability arising out of regulatory matters or lawsuits will have a material effect on BlackRock's results of operations, financial position, or cash flows. However, there is no assurance as to whether any such pending or threatened matters will have a material effect on BlackRock's results of operations, financial position or cash flows in any future reporting period. Due to uncertainties surrounding the outcome of these matters, management cannot reasonably estimate the possible loss or range of loss that may arise from these matters.

Item 4. Mine Safety Disclosures

Not applicable.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

BlackRock's common stock is listed on the NYSE and is traded under the symbol "BLK". At the close of business on January 31, 2018, there were 247 common stockholders of record. Common stockholders include institutional or omnibus accounts that hold common stock for many underlying investors.

The following table sets forth for the periods indicated the high and low reported sale prices, period-end closing prices for the common stock and dividends declared per share for the common stock as reported on the NYSE:

	Common Stock Price Ranges		Closing Price	Cash Dividend Declared
	High	Low		
2017				
First Quarter	\$ 397.81	\$ 371.64	\$ 383.51	\$ 2.50
Second Quarter	\$ 428.38	\$ 377.10	\$ 422.41	\$ 2.50
Third Quarter	\$ 447.09	\$ 412.19	\$ 447.09	\$ 2.50
Fourth Quarter	\$ 518.86	\$ 449.95	\$ 513.71	\$ 2.50
2016				
First Quarter	\$ 342.56	\$ 289.72	\$ 340.57	\$ 2.29
Second Quarter	\$ 367.47	\$ 319.54	\$ 342.53	\$ 2.29
Third Quarter	\$ 376.00	\$ 335.11	\$ 362.46	\$ 2.29
Fourth Quarter	\$ 398.45	\$ 338.61	\$ 380.54	\$ 2.29

BlackRock's closing common stock price as of February 27, 2018 was \$552.77.

DIVIDENDS

On January 11, 2018, the Board of Directors approved BlackRock's quarterly dividend of \$2.88 to be paid on March 22, 2018 to stockholders of record at the close of business on March 7, 2018.

PNC receives dividends on shares of nonvoting participating preferred stock, which are equivalent to the dividends received by common stockholders.

ISSUER PURCHASES OF EQUITY SECURITIES

During the three months ended December 31, 2017, the Company made the following purchases of its common stock, which is registered pursuant to Section 12(b) of the Exchange Act.

	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares That May Yet Be Purchased Under the Plans or Programs
October 1, 2017 through October 31, 2017	228,894	\$ 474.49	218,859	6,723,797
November 1, 2017 through November 30, 2017	327,922	\$ 477.02	327,228	6,396,569
December 1, 2017 through December 31, 2017	44,772	\$ 508.97	29,396	6,367,173
Total	601,588	\$ 478.43	575,483	

(1) Includes purchases made by the Company primarily to satisfy income tax withholding obligations of employees and members of the Company's Board of Directors related to the vesting of certain restricted stock or restricted stock unit awards and purchases made by the Company as part of the publicly announced share repurchase program.

Item 6. Selected Financial Data

The selected financial data presented below have been derived in part from, and should be read in conjunction with, the consolidated financial statements of BlackRock and Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations* included in this Form 10-K.

(1) BlackRock's related party revenue includes fees for services provided to registered investment companies that it manages, which include mutual funds and exchange-traded funds, as a result of the Company's advisory relationship. In addition, equity method investments are considered related parties due to the Company's influence over the financial and operating policies of the investee. See Note 16, *Related Party Transactions*, to the consolidated financial statements for more information.

(2) Income tax expense for 2017 reflects \$1.2 billion of net tax benefit related to the 2017 Tax Cuts and Jobs Act. See Note 21, *Income Taxes*, to the consolidated financial statements for more information.

(3) Participating preferred stock is considered to be a common stock equivalent for purposes of earnings per share calculations.

(4) Book value amounts for 2017, 2016 and 2015 reflect Total BlackRock stockholders' equity divided by total common and preferred shares outstanding at December 31 of the respective year-end. Book value amounts for 2014 and 2013 reflect Total BlackRock stockholders' equity, excluding appropriated retained deficit of \$19 million for 2014 and appropriated retained earnings of \$22 million for 2013, divided by total common and preferred shares outstanding at December 31 of the respective year-end.

(1) Includes separate account assets that are segregated funds held for purposes of funding individual and group pension contracts and collateral held under securities lending agreements related to these assets that have equal and offsetting amounts recorded in liabilities and ultimately do not impact BlackRock's stockholders' equity or cash flows.

(2) Equal and offsetting amounts, related to separate account assets and collateral held under securities lending agreements, are recorded in liabilities.

(3) Amounts include assets held by consolidated sponsored investment products. During 2015, the Company adopted new accounting guidance on consolidations effective January 1, 2015 using the modified retrospective method. As a result of the adoption, the Company's balance sheet at December 31, 2015 reflects the deconsolidation of the Company's previously consolidated collateralized loan obligations.

(4) Amounts include commodity *iShares* ETFs.

(5) Advisory AUM represents long-term portfolio liquidation assignments.

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

FORWARD-LOOKING STATEMENTS

This report, and other statements that BlackRock may make, may contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act, with respect to BlackRock’s future financial or business performance, strategies or expectations. Forward-looking statements are typically identified by words or phrases such as “trend,” “potential,” “opportunity,” “pipeline,” “believe,” “comfortable,” “expect,” “anticipate,” “current,” “intention,” “estimate,” “position,” “assume,” “outlook,” “continue,” “remain,” “maintain,” “sustain,” “seek,” “achieve,” and similar expressions, or future or conditional verbs such as “will,” “would,” “should,” “could,” “may” and similar expressions.

BlackRock cautions that forward-looking statements are subject to numerous assumptions, risks and uncertainties, which change over time. Forward-looking statements speak only as of the date they are made, and BlackRock assumes no duty to and does not undertake to update forward-looking statements. Actual results could differ materially from those anticipated in forward-looking statements and future results could differ materially from historical performance.

BlackRock has previously disclosed risk factors in its Securities and Exchange Commission (“SEC”) reports. These risk factors and those identified elsewhere in this report, among others, could cause actual results to differ materially from forward-looking statements or historical performance and include: (1) the introduction, withdrawal, success and timing of business initiatives and strategies; (2) changes and volatility in political, economic or industry conditions, the interest rate environment, foreign exchange rates or financial and capital markets, which could result in changes in demand for products or services or in the value of assets under management (“AUM”); (3) the relative and absolute investment performance of BlackRock’s investment products; (4) the impact of increased competition; (5) the impact of future acquisitions or divestitures; (6) the unfavorable resolution of legal proceedings; (7) the extent and timing of any share repurchases; (8) the impact, extent and timing of technological changes and the adequacy of intellectual property, information and cyber security protection; (9) the potential for human error in connection with BlackRock’s operational systems; (10) the impact of legislative and regulatory actions and reforms and regulatory, supervisory or enforcement actions of government agencies relating to BlackRock or The PNC Financial Services Group, Inc. (“PNC”); (11) changes in law and policy and uncertainty pending any such changes; (12) terrorist activities, international hostilities and natural disasters, which may adversely affect the general economy, domestic and local financial and capital markets, specific industries or BlackRock; (13) the ability to attract and retain highly talented professionals; (14) fluctuations in the carrying value of BlackRock’s economic investments; (15) the impact of changes to tax legislation, including income, payroll and transaction taxes, and taxation on products or transactions, which could affect the value proposition to clients and, generally, the tax position of the Company; (16) BlackRock’s success in negotiating distribution arrangements and maintaining distribution

channels for its products; (17) the failure by a key vendor of BlackRock to fulfill its obligations to the Company; (18) any disruption to the operations of third parties whose functions are integral to BlackRock’s exchange-traded funds (“ETF”) platform; (19) the impact of BlackRock electing to provide support to its products from time to time and any potential liabilities related to securities lending or other indemnification obligations; and (20) the impact of problems at other financial institutions or the failure or negative performance of products at other financial institutions.

OVERVIEW

BlackRock, Inc. (together, with its subsidiaries, unless the context otherwise indicates, “BlackRock” or the “Company”) is a leading publicly traded investment management firm with \$6.288 trillion of AUM at December 31, 2017. With approximately 13,900 employees in more than 30 countries, BlackRock provides a broad range of investment, risk management and technology services to institutional and retail clients worldwide.

For further information see *Business*, in Part I, Item 1 and Note 1, *Introduction and Basis of Presentation*, in the notes to the consolidated financial statements contained in Part II, Item 8.

Acquisitions

In June 2017, the Company completed the acquisition of the equity infrastructure franchise of First Reserve (“First Reserve Transaction”), expanding the Company’s energy and power infrastructure platform. In July 2017, the Company completed the acquisition of Cachematrix (“Cachematrix Transaction”), a leading provider of financial technology which simplifies the cash management process for banks and their corporate clients in a streamlined, open-architecture platform. In November 2017, the Company acquired a minority investment in Scalable Capital, a digital investment manager in Europe.

In November 2017, the Company announced that it had entered an agreement to acquire the asset management business of Citibanamex, a subsidiary of Citigroup Inc. This transaction involves approximately \$31 billion in AUM across local fixed income, equity and multi-asset products. The transaction is expected to close in the second half of 2018, subject to customary regulatory approvals and closing conditions. Consideration for the transaction will include an upfront cash payment and contingent consideration.

United Kingdom Exit from European Union

Following the June 2016 vote to exit the European Union (“EU”), the United Kingdom served notice under Article 50 of the Treaty on European Union on March 29, 2017 to initiate the process of exiting from the EU, commonly referred to as “Brexit”. The outcome of the negotiations between the United Kingdom and the EU in connection with Brexit is highly uncertain and information regarding the long-term consequences is expected to become clearer over time as negotiations progress. The Company continues to prepare for a range of potential outcomes in connection with Brexit.

Business Outlook

BlackRock’s framework for long-term value creation is predicated on generating differentiated organic growth,

leveraging scale to increase operating margins over time, and returning capital to shareholders on a consistent basis. BlackRock's diversified platform, in terms of style, product, client and geography, enables it to generate more stable cash flows through market cycles, positioning BlackRock to invest for the long-term by striking an appropriate balance between investing for future growth and prudent discretionary expense management.

BlackRock's highly diversified multi-product platform was created to meet the needs of its clients in all market environments. BlackRock is positioned to provide alpha-seeking active and index investment solutions across asset classes and geographies. In addition, BlackRock leverages its world-class risk management, analytics and technology capabilities, including the *Aladdin* platform, on behalf of clients. BlackRock serves a diverse mix of institutional and retail clients across the globe, including investors in *iShares* ETFs, maintaining differentiated client relationships and a fiduciary focus.

BlackRock's retail strategy is focused on an outcome-oriented approach to creating client solutions, including alpha-seeking active, index and alternative products, enhanced distribution and technology offerings. In the United States, BlackRock is leveraging its integrated wholesaler force to further penetrate distribution platforms and gain share among registered investment advisors. Internationally, BlackRock continues to diversify the range of investment solutions available to clients, penetrate new distribution channels and position effectively for regulatory change.

iShares growth strategy is centered on increasing global *iShares* market share and driving global market expansion. BlackRock intends to achieve these goals by pursuing global growth themes in client and product segments including core investments, fixed income, smart beta, financial instruments and precision exposures.

BlackRock believes Institutional results will be driven by enhancing BlackRock's solutions-oriented approach; deepening client relationships through product diversification and higher value-add capabilities; and leveraging *Aladdin*'s analytical and risk management expertise.

BlackRock continues to invest in technology and risk management offerings, which enhance the ability to generate alpha, effectively serve clients and operate efficiently. BlackRock's technology portfolio includes *Aladdin* and *Aladdin Risk for Wealth Management*, *FutureAdvisor*, *Cachematrix*, as well as minority investments in *Scalable Capital* and *iCapital*.

U.S. Tax Reform

On December 22, 2017, The Tax Cuts and Jobs Act (the "2017 Tax Act") was enacted. The 2017 Tax Act significantly revises the U.S. tax code, including, but not limited to, (1) reducing the U.S. federal corporate tax rate from 35 percent to 21 percent, (2) requiring companies to pay a one-time tax on certain unrepatriated earnings of foreign subsidiaries, (3) generally eliminating U.S. federal income taxes on dividends from foreign subsidiaries, (4) creating new taxes on certain earnings of controlled foreign corporations, and (5) creating a new limitation on deductible net interest expense. BlackRock's results in 2017 included a \$1.2 billion net tax benefit related to the 2017 Tax Act comprised of the following amounts:

- \$106 million tax expense related to the revaluation of certain deferred income tax assets;
- \$1,758 million noncash tax benefit related to the revaluation of certain deferred income tax liabilities (which was excluded from as adjusted results); and
- \$477 million tax expense related to the mandatory deemed repatriation of undistributed foreign earnings and profits (which was excluded from as adjusted results) and is payable over eight years.

These amounts may require further adjustments as additional guidance from the U.S. Department of the Treasury is provided, as changes in the Company's assumptions occur, and as further information and interpretations become available.

For further information on the 2017 Tax Act, see Note 21, *Income Taxes*, in the consolidated financial statements included in Part II, Item 8 of this filing.

EXECUTIVE SUMMARY

(in millions, except shares and per share data)

	2017	2016	2015
GAAP basis:

(1) As adjusted items are described in more detail in *Non-GAAP Financial Measures*.

(2) Nonvoting participating preferred shares are considered to be common stock equivalents for purposes of determining basic and diluted earnings per share calculations.

(3) Total BlackRock stockholders' equity, divided by total common and preferred shares outstanding at December 31 of the respective year-end.

2017 COMPARED WITH 2016

GAAP. Operating income of \$5,272 million increased \$702 million and operating margin of 42.2% increased 120 bps from 2016. Operating income and operating margin growth primarily reflected higher base fees, performance fees, and technology and risk management revenue, partially offset by higher compensation and benefits, higher volume-related expense, and higher general and administration expense. Operating income for 2017 also included approximately \$22 million of expense associated with the strategic repositioning of the active equity platform. Operating income for 2016 included a restructuring charge of \$76 million in connection with a project to streamline and simplify the organization. Nonoperating income (expense), less net income (loss) attributable to noncontrolling interests ("NCI"), increased \$76 million from 2016 driven by higher net gains on investments.

Income tax expense for 2017 included the previously mentioned \$1.2 billion net tax benefit related to the 2017 Tax Act, \$173 million of discrete tax benefits, primarily related to stock-based compensation awards, including a \$151 million discrete tax benefit reflecting the adoption of new stock-based compensation accounting guidance, and a \$16 million noncash tax expense associated with the revaluation of certain deferred income tax liabilities. Income tax expense for 2016 included a \$30 million net noncash benefit associated with the revaluation of certain deferred income tax liabilities, including the effect of tax legislation enacted

in the United Kingdom, and state and local income tax changes. Income tax expense for 2016 also included nonrecurring tax benefits of \$65 million. See *Income Tax Expense* within *Discussion of Financial Results* for more information.

Diluted earnings per common share increased \$11.19, or 59%, compared with 2016, reflecting the net tax benefit from the 2017 Tax Act and higher operating income, partially offset by the benefit of share repurchases.

As Adjusted. Operating income of \$5,287 million increased \$613 million and operating margin of 44.1% increased 40 bps from 2016. The pre-tax restructuring charge of \$76 million described above was excluded from as adjusted results for 2016. Income tax expense for 2017 excluded the previously described \$1,758 million noncash tax benefit and \$477 million deemed repatriation tax expense related to the 2017 Tax Act, and the previously described noncash expense of \$16 million. Income tax expense for 2016 excluded the previously mentioned net noncash benefit of \$30 million. Diluted earnings per common share increased \$3.31, or 17%, from 2016.

2016 COMPARED WITH 2015

GAAP. Operating income of \$4,570 million decreased \$94 million from 2015. Operating income was impacted by lower performance fees, partially offset by expense discipline and growth in technology and risk management

revenue. Operating income also reflected a restructuring charge of \$76 million recorded in the first quarter of 2016 in connection with a project to streamline and simplify the organization. Operating margin of 41% increased 10 bps from 2015 driven by continued expense discipline. Nonoperating income (expense), less NCI, decreased \$39 million from 2015 due to lower net gains on investments, partially offset by higher interest and dividend income during 2016. Net gains on investments in 2015 included a \$40 million noncash gain related to the BlackRock Kelso Capital Advisors LLC (“BKCA”) transaction and a \$35 million unrealized gain on a private equity investment.

Income tax expense for 2016 included a \$30 million net noncash tax benefit associated with the revaluation of certain deferred income tax liabilities, including the effect of tax legislation enacted in the United Kingdom, and state and local income tax changes. Income tax expense for 2016 also included nonrecurring tax benefits of \$65 million. Income tax expense for 2015 included a \$54 million net noncash benefit associated with the revaluation of certain deferred income tax liabilities and nonrecurring tax benefits of \$75 million.

Diluted earnings per common share decreased \$0.75, or 4%, compared with 2015, reflecting lower nonoperating income and a higher tax rate in 2016, partially offset by the benefit of share repurchases.

As *Adjusted*. Operating income of \$4,674 million decreased \$21 million, and operating margin of 43.7% increased 80 bps, from 2015. The pre-tax restructuring charge of \$76 million described above was excluded from as adjusted results. Income tax expense for 2016 and 2015 excluded the previously described net noncash benefits of \$30 million and \$54 million, respectively. Diluted earnings per common share decreased \$0.31, or 2%, from 2015.

See *Non-GAAP Financial Measures* for further information on as adjusted items.

For further discussion of BlackRock’s revenue, expense, nonoperating results and income tax expense, see *Discussion of Financial Results* herein.

NON-GAAP FINANCIAL MEASURES

BlackRock reports its financial results in accordance with accounting principles generally accepted in the United States (“GAAP”); however, management believes evaluating the Company’s ongoing operating results may be enhanced if investors have additional non-GAAP financial measures. Management reviews non-GAAP financial measures to assess ongoing operations and considers them to be helpful, for both management and investors, in evaluating BlackRock’s financial performance over time. Management also uses non-GAAP financial measures as a benchmark to compare its performance with other companies and to enhance the comparability of this information for the reporting periods presented. Non-GAAP measures may pose limitations because they do not include all of BlackRock’s revenue and expense. BlackRock’s management does not advocate that investors consider such non-GAAP financial measures in isolation from, or as a substitute for, financial information prepared in accordance with GAAP. Non-GAAP measures may not be comparable to other similarly titled measures of other companies.

Management uses both GAAP and non-GAAP financial measures in evaluating BlackRock’s financial performance. Adjustments to GAAP financial measures (“non-GAAP adjustments”) include certain items management deems nonrecurring or that occur infrequently, transactions that ultimately will not impact BlackRock’s book value or certain tax items that do not impact cash flow.

Computations for all periods are derived from the consolidated statements of income as follows:

(1) Operating income, as adjusted, and operating margin, as adjusted:

Management believes operating income, as adjusted, and operating margin, as adjusted, are effective indicators of BlackRock’s financial performance over time and, therefore, provide useful disclosure to investors.

<i>(in millions)</i>	2017	2016	2015
Operating income, GAAP basis	\$ 5,272	\$ 4,570	\$ 4,664
Non-GAAP expense adjustments:			
Restructuring charge	—	76	—
PNC LTIP funding obligation	15	28	30
Compensation expense related to appreciation (depreciation) on deferred compensation plans	—	—	1
Operating income, as adjusted	5,287	4,674	4,695
Product launch costs and commissions	—	—	5
Operating income used for operating margin measurement	\$ 5,287	\$ 4,674	\$ 4,700
Revenue, GAAP basis	\$ 12,491	\$ 11,155	\$ 11,401
Non-GAAP adjustments:			
Distribution and servicing costs	(492)	(429)	(409)
Amortization of deferred sales commissions	(17)	(34)	(48)
Revenue used for operating margin measurement	\$ 11,982	\$ 10,692	\$ 10,944
Operating margin, GAAP basis	42.2%	41.0%	40.9%
Operating margin, as adjusted	44.1%	43.7%	42.9%

- **Operating income, as adjusted**, includes non-GAAP expense adjustments. The portion of compensation expense associated with certain long-term incentive plans ("LTIP") funded, or to be funded, through share distributions to participants of BlackRock stock held by PNC has been excluded because it ultimately does not impact BlackRock's book value. In 2016, a restructuring charge primarily comprised of severance and accelerated amortization expense of previously granted deferred compensation awards has been excluded to provide an analysis of BlackRock's ongoing operations and to ensure comparability among periods presented. In 2015, compensation expense associated with appreciation (depreciation) on investments related to certain BlackRock deferred compensation plans has been excluded, as returns on investments set aside for these plans, which substantially offset this expense, are reported in nonoperating income (expense).
- Operating income used for measuring operating margin, as adjusted, is equal to operating income, as adjusted, excluding the impact of product launch costs (e.g. closed-end fund launch costs) and related commissions. Management believes the exclusion of such costs and related commissions is useful because

these costs can fluctuate considerably and revenue associated with the expenditure of these costs will not fully impact BlackRock's results until future periods.

Revenue used for operating margin, as adjusted, excludes distribution and servicing costs paid to related parties and other third parties. Management believes such costs represent a benchmark for the amount of revenue passed through to external parties who distribute the Company's products. In addition, management believes the exclusion of such costs is useful because it creates consistency in the treatment for certain contracts for similar services, which due to the terms of the contracts, are accounted for under GAAP on a net basis within investment advisory, administration fees and securities lending revenue. Amortization of deferred sales commissions is excluded from revenue used for operating margin measurement, as adjusted, because such costs, over time, substantially offset distribution fee revenue the Company earns. For each of these items, BlackRock excludes from revenue used for operating margin, as adjusted, the costs related to each of these items as a proxy for such offsetting revenue.

(2) Net income attributable to BlackRock, Inc., as adjusted:

(in millions, except per share data)

	2017	2016	2015
Net income attributable to BlackRock, Inc., GAAP basis	\$ 4,970	\$ 3,172	\$ 3,345
Non-GAAP adjustments:			
Restructuring charge (including \$23 tax benefit)	—	53	—
PNC LTIP funding obligation, net of tax	11	19	22
The 2017 Tax Act:			
Deferred tax revaluation (noncash)	(1,758)	—	—
Deemed repatriation tax	477	—	—
Other income tax matters	16	(30)	(54)
Net income attributable to BlackRock, Inc., as adjusted	\$ 3,716	\$ 3,214	\$ 3,313
Diluted weighted-average common shares outstanding ⁽³⁾	164.4	166.6	169.0
Diluted earnings per common share, GAAP basis⁽³⁾	\$ 30.23	\$ 19.04	\$ 19.79
Diluted earnings per common share, as adjusted⁽³⁾	\$ 22.60	\$ 19.29	\$ 19.60

Management believes net income attributable to BlackRock, Inc., as adjusted, and diluted earnings per common share, as adjusted, are useful measures of BlackRock's profitability and financial performance. Net income attributable to BlackRock, Inc., as adjusted, equals net income attributable to BlackRock, Inc., GAAP basis, adjusted for significant nonrecurring items, charges that ultimately will not impact BlackRock's book value or certain tax items that do not impact cash flow.

See aforementioned discussion regarding operating income, as adjusted, and operating margin, as adjusted, for information on the PNC LTIP funding obligation and the restructuring charge.

For each period presented, the non-GAAP adjustment related to the restructuring charge and PNC LTIP funding obligation was tax effected at the respective blended rates applicable to the adjustments. The noncash deferred tax

revaluation benefit of \$1,758 million and the other income tax matters were primarily associated with the revaluation of certain deferred tax liabilities related to intangible assets and goodwill. These amounts have been excluded from the as adjusted results as these items will not have a cash flow impact and to ensure comparability among periods presented. A deemed repatriation tax expense of \$477 million has been excluded from the 2017 as adjusted results due to the one-time nature and to ensure comparability among periods presented.

Per share amounts reflect net income attributable to BlackRock, Inc., as adjusted divided by diluted weighted average common shares outstanding.

(3) Nonvoting participating preferred stock is considered to be a common stock equivalent for purposes of determining basic and diluted earnings per share calculations.

Assets Under Management

AUM for reporting purposes generally is based upon how investment advisory and administration fees are calculated for each portfolio. Net asset values, total assets, committed assets or other measures may be used to determine portfolio AUM.

(1) Advisory AUM represents long-term portfolio liquidation assignments.

(2) Amounts include commodity iShares ETFs.

The following table presents the component changes in BlackRock's AUM for 2017, 2016 and 2015.

(in millions)	2017	2016	2015
Beginning AUM	\$ 5,147,852	\$ 4,645,412	\$ 4,651,895
Net inflows (outflows)			
Long-term	330,240	180,564	152,014
Cash management	38,259	29,228	7,510
Advisory ⁽¹⁾	(1,245)	(7,601)	(9,629)
Total net inflows (outflows)	367,254	202,191	149,895
Acquisitions ⁽²⁾	3,264	80,635	2,219
Market change	628,901	326,364	(57,495)
FX impact ⁽³⁾	140,924	(106,750)	(101,102)
Total change	1,140,343	502,440	(6,483)
Ending AUM	\$ 6,288,195	\$ 5,147,852	\$ 4,645,412

(1) Advisory AUM represents long-term portfolio liquidation assignments.

(2) Amount for 2017 represents \$3.3 billion of AUM acquired in the First Reserve Infrastructure business transaction in June 2017 ("First Reserve Transaction"). Amount for 2016 represents \$80.6 billion of AUM acquired in the BofA Global Capital Management transaction in April 2016. Amounts for 2015 represent \$1.3 billion of AUM acquired in the acquisition of certain assets of BKCA in March 2015, \$560 million of AUM acquired in the Infraestructura Institucional acquisition in October 2015 and \$366 million of AUM acquired in the FutureAdvisor acquisition in October 2015. The FutureAdvisor acquisition amount does not include AUM that was held in iShares holdings.

(3) Foreign exchange reflects the impact of translating non-U.S. dollar denominated AUM into U.S. dollars for reporting purposes.

BlackRock has historically grown AUM through organic growth and acquisitions. Management believes that the Company will be able to continue to grow AUM organically by focusing on strong investment performance, efficient delivery of beta for index products, client service, developing new products and optimizing distribution capabilities.

Component Changes in AUM for 2017

The following table presents the component changes in AUM by client type and product type for 2017.

(1) Amount represents AUM acquired in the First Reserve Transaction.

(2) Foreign exchange reflects the impact of translating non-U.S. dollar denominated AUM into U.S. dollars for reporting purposes.

(3) Average AUM is calculated as the average of the month-end spot AUM amounts for the trailing thirteen months.

(4) Advisory AUM represents long-term portfolio liquidation assignments.

(5) Amounts include commodity *iShares* ETFs.

AUM increased \$1.1 trillion to \$6.3 trillion at December 31, 2017 from \$5.1 trillion at December 31, 2016 driven by net market appreciation, positive net inflows, the impact of foreign exchange movements and AUM acquired in the First Reserve Transaction.

Net market appreciation of \$628.9 billion was primarily driven by higher U.S. and global equity markets.

AUM increased \$140.9 billion due to the impact of foreign exchange movements, primarily resulting from the weakening of the U.S. dollar against the Euro and the British pound.

For further discussion on AUM, see “Part I, Item 1 — Business — Assets Under Management”.

(3) Average AUM is calculated as the average of the month-end spot AUM amounts for the trailing thirteen months.

(4) Advisory AUM represents long-term portfolio liquidation assignments.

(5) Amounts include commodity iShares ETFs.

AUM increased \$502.4 billion to \$5.1 trillion at December 31, 2016 from \$4.6 trillion at December 31, 2015 driven by net market appreciation, positive net inflows and AUM acquired in the BofA Global Capital Management transaction, partially offset by the impact of foreign exchange movements.

AUM decreased \$106.8 billion due to the impact of foreign exchange movements, primarily resulting from the strengthening of the U.S. dollar, largely against the British pound and the Euro.

Net market appreciation of \$326.4 billion was driven by \$219.0 billion from equity products, \$82.8 billion from fixed income products and \$22.5 billion from multi-asset products across the majority of strategies.

DISCUSSION OF FINANCIAL RESULTS

Introduction

BlackRock derives a substantial portion of its revenue from investment advisory and administration fees, which are recognized as the services are performed. Such fees are primarily based on predetermined percentages of the market value of AUM or percentages of committed capital during investment periods of certain alternative products and are affected by changes in AUM, including market appreciation or depreciation, foreign exchange translation and net inflows or outflows. Net inflows or outflows represent the sum of new client assets, additional fundings from existing clients (including dividend reinvestment), withdrawals of assets from, and termination of, client accounts and distributions to investors representing return of capital and return on investments to investors. Market appreciation or depreciation includes current income earned on, and changes in the fair value of, securities held in client accounts. Foreign exchange translation reflects the impact of translating non-U.S. dollar denominated AUM into U.S. dollars for reporting purposes.

BlackRock also earns revenue by lending securities on behalf of clients to highly rated banks and broker-dealers. The securities loaned are secured by collateral in the form of cash or securities, with minimum collateral generally ranging from approximately 102% to 112% of the value of the loaned securities. Generally, the revenue earned is shared between BlackRock and the funds or accounts managed by the Company from which the securities are borrowed. Historically, securities lending revenue in the second quarter exceeds revenue in the other quarters during the year driven by higher seasonal demand.

Investment advisory agreements for certain separate accounts and investment funds provide for performance fees based upon relative and/or absolute investment performance, in addition to base fees based on AUM. Investment advisory performance fees generally are earned after a given period of time and when investment performance exceeds a contractual threshold. As such, the timing of recognition of performance fees may increase the volatility of BlackRock's revenue and earnings. The magnitude of performance fees can fluctuate quarterly due to the timing of carried interest recognition on alternative products; however, the third and fourth quarters have a greater number of nonalternative products with performance measurement periods that end on either September 30 or December 31.

BlackRock offers investment management technology systems, risk management services, wealth management and digital distribution tools on a fee basis. Clients include banks, insurance companies, official institutions, pension funds, asset managers, retail distributors and other investors. Fees earned for technology and risk management revenue are recorded as services are performed and are generally determined using the value of positions on the *Aladdin* platform or on a fixed-rate basis.

BlackRock advises global financial institutions, regulators, and government entities across a range of risk, regulatory, capital markets and strategic services. Fees earned for advisory services, which are included in advisory and other revenue, are determined using fixed-rate fees and recorded upon delivery.

The Company earns fees for transition management services primarily comprised of commissions recognized in connection with buying and selling securities on behalf of its customers. Commissions related to transition management services are recorded on a trade-date basis as securities transactions occur.

The Company also earns revenue related to certain strategic investments accounted for as equity method investments.

Operating expense reflects employee compensation and benefits, distribution and servicing costs, amortization of deferred sales commissions, direct fund expense, general and administration expense and amortization of finite-lived intangible assets.

- Employee compensation and benefits expense includes salaries, commissions, temporary help, deferred and incentive compensation, employer payroll taxes, severance and related benefit costs.
- Distribution and servicing costs, which are primarily AUM driven, include payments made to third parties, primarily associated with obtaining and retaining client investments in certain BlackRock products.
- Direct fund expense primarily consists of third-party nonadvisory expense incurred by BlackRock related to certain funds for the use of index trademarks, reference data for indices, custodial services, fund administration, fund accounting, transfer agent services, shareholder reporting services, legal expense, and audit and tax services as well as other fund-related expense directly attributable to the nonadvisory operations of the fund. These expenses may vary over time with fluctuations in AUM, number of shareholder accounts, or other attributes directly related to volume of business.

General and administration expense includes marketing and promotional, occupancy and office-related costs, portfolio services (including clearing expense related to transition management services), technology, professional services, communications, product launch costs and other general and administration expense, including the impact of foreign currency remeasurement. Foreign currency remeasurement (gains) losses were \$5 million, \$(6) million and \$(8) million for 2017, 2016 and 2015, respectively.

Approximately 75% of the Company's revenue is generated in U.S. dollars. The Company's revenue and expense generated in foreign currencies (primarily the Euro and British pound) are impacted by foreign exchange rates. Any effect of foreign exchange rate change on revenue is partially offset by a change in expense driven by the Company's considerable non-dollar expense base related to its operations outside the United States.

Nonoperating income (expense) includes the effect of changes in the valuations on investments (excluding available-for-sale investments) and earnings on equity method investments as well as interest and dividend income and interest expense. Other comprehensive income includes changes in valuations related to available-for-sale investments. BlackRock primarily holds seed and co-investments in sponsored investment products that invest in a variety of asset classes, including private equity, hedge funds and real assets. Investments generally are made for co-investment purposes, to establish a performance track record or for regulatory purposes,

including Federal Reserve Bank stock. BlackRock does not engage in proprietary trading activities that could conflict with the interests of its clients.

In addition, nonoperating income (expense) includes the impact of changes in the valuations of consolidated

sponsored investment funds. The portion of nonoperating income (expense) not attributable to BlackRock is allocated to NCI on the consolidated statements of income.

Cash management	5%	5%	3%	7%	7%	6%
Total excluding Advisory AUM	100%	100%	100%	100%	100%	100%

(1) Average AUM is calculated as the average of the month-end spot AUM amounts for the trailing thirteen months.

2017 Compared with 2016

Revenue increased \$1,336 million, or 12%, from 2016, driven by growth in base fees, performance fees, and technology and risk management revenue.

Investment advisory, administration fees and securities lending revenue of \$10,893 million in 2017 increased \$1,013 million from \$9,880 million in 2016 reflecting the impact of higher markets and organic growth on average AUM, and the effect of AUM acquired in the BofA Global Capital Management transaction, partially offset by pricing changes to select investment products. Securities lending revenue of \$597 million in 2017 compared with \$579 million in 2016.

Investment advisory performance fees were \$594 million in 2017 compared with \$295 million in 2016. The increase primarily reflected improved performance in hedge fund and long-only equity products.

Technology and risk management revenue of \$677 million for 2017 increased \$82 million from \$595 million in 2016 reflecting ongoing demand for *Aladdin*.

Advisory and other revenue of \$303 million decreased \$41 million from \$344 million in 2016, reflecting lower earnings from a strategic minority investment and lower fees for distributing certain exchange-traded products.

2016 Compared with 2015

Revenue decreased \$246 million, or 2%, from 2015, driven by lower performance fees, partially offset by higher technology and risk management revenue.

Investment advisory, administration fees and securities lending revenue of \$9,880 million for 2016 increased \$40 million from \$9,840 million in 2015 reflecting the impact of organic growth and higher markets on average AUM, the effect of AUM acquired in the BofA Global Capital Management transaction and lower yield-related fee waivers on certain money market funds, partially offset by the impact of divergent beta and mix shift, and the impact of foreign exchange movements. Securities lending revenue increased \$66 million from 2015 to \$579 million in 2016, primarily reflecting an increase in average balances of securities on loan and higher spreads.

Investment advisory performance fees were \$295 million in 2016 compared with \$621 million in 2015. The decrease was primarily driven by lower fees from equity and alternative products, including the impact of the strong performance from a single hedge fund with an annual performance measurement period that ended in the third quarter of 2015.

Technology and risk management revenue of \$595 million for 2016 increased \$67 million from \$528 million in 2015 reflecting ongoing demand for *Aladdin*.

Expense

(1) See Non-GAAP Financial Measures for further information on non-GAAP expense adjustments.

2017 Compared with 2016

GAAP. Expense increased \$634 million, or 10%, from 2016, driven primarily by higher employee compensation and benefits expense, higher volume-related expense, and higher general and administration expense, partially offset by a restructuring charge recorded in 2016.

Employee compensation and benefits expense increased \$375 million, or 10%, to \$4,255 million in 2017 from \$3,880 million in 2016, reflecting higher incentive compensation, higher headcount, and approximately \$20 million of severance and accelerated compensation expense associated with the repositioning of the active equity platform. Employees at December 31, 2017 totaled approximately 13,900 compared with approximately 13,000 at December 31, 2016.

Distribution and servicing costs totaled \$492 million in 2017 compared with \$429 million in 2016 reflecting higher

average AUM and the effect of AUM acquired in the BofA Global Capital Management transaction.

Direct fund expense increased \$138 million from 2016, reflecting higher *iShares* ETFs average AUM.

General and administration expense increased \$161 million from 2016, reflecting higher portfolio services, professional services fees (associated with strategic transactions, MiFID implementation, and tax reform), technology expense, operating errors, contingent consideration fair value adjustments and the impact of foreign exchange remeasurement expense.

As Adjusted. Expense, as adjusted, increased \$723 million, or 11%, to \$7,204 million in 2017 from \$6,481 million in 2016. The increase in total expense, as adjusted, is driven primarily by higher employee compensation and benefit expense, higher volume-related expense and higher general and administration expense. The restructuring charge recorded in 2016 has been excluded from the as adjusted results.

2016 Compared with 2015

GAAP. Expense decreased \$152 million, or 2%, from 2015, reflecting lower compensation and benefits expense, expense discipline and lower amortization of intangible assets, partially offset by a restructuring charge recorded in 2016.

Employee compensation and benefits expense decreased \$125 million, or 3%, to \$3,880 million in 2016 from \$4,005 million in 2015, reflecting lower incentive compensation, primarily driven by lower performance fees.

Distribution and servicing costs totaled \$429 million in 2016 compared with \$409 million in 2015.

General and administration expense decreased \$79 million from 2015, reflecting expense discipline and the impact of higher transaction-related expense recorded in 2015.

Restructuring charge of \$76 million, primarily comprised of severance and accelerated amortization expense of previously granted deferred compensation awards, was recorded in 2016 in connection with a project to streamline and simplify the organization.

Amortization of intangible assets expense decreased \$29 million, or 23%, to \$99 million in 2016 from \$128 million in 2015, primarily reflecting certain finite-lived intangible assets becoming fully amortized.

As Adjusted. Expense, as adjusted, decreased \$225 million, or 3%, to \$6,481 million in 2016 from \$6,706 million in 2015. The decrease in total expense, as adjusted, is primarily

attributable to lower employee compensation and benefits expense, expense discipline and lower amortization of intangible assets. The restructuring charge has been excluded from the as adjusted results.

NONOPERATING RESULTS

The summary and reconciliation of U.S. GAAP nonoperating income (expense) to nonoperating income (expense), as adjusted for 2017, 2016 and 2015 was as follows:

<i>(in millions)</i>	2017	2016	2015
Nonoperating income (expense), GAAP basis ⁽¹⁾	\$ 5	\$ (110)	\$ (62)
Less: Net income (loss) attributable to NCI	37	(2)	7
Nonoperating income (expense) ⁽²⁾	(32)	(108)	(69)
Compensation expense related to (appreciation) depreciation on deferred compensation plans	—	—	(1)
Nonoperating income (expense), as adjusted ⁽²⁾⁽³⁾	\$ (32)	\$ (108)	\$ (70)

(1) Amounts included gains of \$118 million, \$16 million and \$58 million attributable to consolidated variable interest entities ("VIEs") for 2017, 2016 and 2015, respectively.

(2) Net of net income (loss) attributable to NCI.

(3) Management believes nonoperating income (expense), as adjusted, is an effective measure for reviewing BlackRock's nonoperating contribution to results. See Non-GAAP Financial Measures for further information on non-GAAP financial measures for 2017, 2016 and 2015.

The components of nonoperating income (expense), less net income (loss) attributable to NCI for 2017, 2016 and 2015 were as follows:

<i>(in millions)</i>	2017	2016	2015
Net gain (loss) on investments ⁽¹⁾⁽²⁾			
Private equity	\$ 21	\$ 6	\$ 71
Real assets	17	8	12
Other alternatives ⁽³⁾	38	21	(2)
Other investments ⁽⁴⁾	43	22	(18)
Subtotal	119	57	63
Other gains ⁽⁵⁾	5	—	46
Total net gain (loss) on investments ⁽¹⁾⁽²⁾	124	57	109
Interest and dividend income	49	40	26
Interest expense	(205)	(205)	(204)
Net interest expense	(156)	(165)	(178)
Total nonoperating income (expense) ⁽¹⁾	(32)	(108)	(69)
Compensation expense related to (appreciation) depreciation on deferred compensation plans	—	—	(1)
Nonoperating income (expense), as adjusted ⁽¹⁾⁽²⁾	\$ (32)	\$ (108)	\$ (70)

(1) Net of net income (loss) attributable to NCI. Amounts also include net gain (loss) on consolidated VIEs.

(2) Management believes nonoperating income (expense), as adjusted, is an effective measure for reviewing BlackRock's nonoperating contribution to results. See Non-GAAP Financial Measures for further information on non-GAAP financial measures for 2017, 2016 and 2015.

(3) Amounts primarily include net gains (losses) related to direct hedge fund strategies and hedge fund solutions. The prior year periods also included net gains related to opportunistic credit strategies.

(4) Amounts primarily include net gains (losses) related to equity and fixed income investments.

(5) The amount for 2015 primarily includes a \$40 million gain related to the acquisition of certain assets of BKCA.

Income Tax Expense

(in millions)	GAAP			As adjusted		
	2017	2016	2015	2017	2016	2015
Operating income ⁽¹⁾	\$ 5,272	\$ 4,570	\$ 4,664	\$ 5,287	\$ 4,674	\$ 4,695
Total nonoperating income (expense) ⁽¹⁾⁽²⁾	(32)	(108)	(69)	(32)	(108)	(70)
Income before income taxes ⁽²⁾	\$ 5,240	\$ 4,462	\$ 4,595	\$ 5,255	\$ 4,566	\$ 4,625
Income tax expense ⁽³⁾	\$ 270	\$ 1,290	\$ 1,250	\$ 1,539	\$ 1,352	\$ 1,312
Effective tax rate ⁽³⁾	5.2%	28.9%	27.2%	29.3%	29.6%	28.4%

(1) See Non-GAAP Financial Measures for further information on and reconciliation of as adjusted items.

(2) Net of net income (loss) attributable to NCI.

(3) GAAP income tax expense and effective tax rate for 2017 reflects \$1.2 billion of a net tax benefit related to the 2017 Tax Act.

The Company's tax rate is affected by tax rates in foreign jurisdictions and the relative amount of income earned in those jurisdictions, which the Company expects to be fairly consistent in the near term. The significant foreign jurisdictions that have lower statutory tax rates than the U.S. federal statutory rate of 35% include the United Kingdom, Channel Islands, Ireland and Netherlands.

2017. Income tax expense (GAAP) reflected:

- the following amounts related to the 2017 Tax Act:
 - \$106 million tax expense related to the revaluation of certain deferred income tax assets;
 - \$1,758 million noncash tax benefit related to the revaluation of certain deferred income tax liabilities; and
 - \$477 million tax expense related to the mandatory deemed repatriation of undistributed foreign earnings and profits.
- a noncash expense of \$16 million, primarily associated with the revaluation of certain deferred income tax liabilities as a result of domestic state and local tax changes; and
- \$173 million discrete tax benefits, primarily related to stock-based compensation awards, including \$151 million related to the adoption of new accounting guidance related to stock-based compensation awards. See Note 2, *Significant Accounting Policies*, for further information.

The as adjusted effective tax rate of 29.3% for 2017 excluded the noncash deferred tax revaluation benefit of \$1,758 million and noncash expense of \$16 million mentioned above as it will not have a cash flow impact and to ensure comparability among periods presented. In addition, the deemed repatriation tax expense of \$477 million has been excluded from the as adjusted results due to the one-time nature and to ensure comparability among periods presented.

2016. Income tax expense (GAAP) reflected:

- a net noncash benefit of \$30 million, primarily associated with the revaluation of certain deferred income tax liabilities; and
- a benefit from \$65 million of nonrecurring items, including the resolution of certain outstanding tax matters.

The as adjusted effective tax rate of 29.6% for 2016 excluded the net noncash benefit of \$30 million mentioned

above as it will not have a cash flow impact and to ensure comparability among periods presented.

2015. Income tax expense (GAAP) reflected:

- a net noncash benefit of \$54 million, primarily associated with the revaluation of certain deferred income tax liabilities; and
- a benefit from \$75 million of nonrecurring items, primarily due to the realization of losses from changes in the Company's organizational tax structure and the resolution of certain outstanding tax matters.

The as adjusted effective tax rate of 28.4% for 2015 excluded the net noncash benefit of \$54 million mentioned above, as it will not have a cash flow impact and to ensure comparability among periods presented.

BALANCE SHEET OVERVIEW

As Adjusted Balance Sheet

The following table presents a reconciliation of the consolidated statement of financial condition presented on a GAAP basis to the consolidated statement of financial condition, excluding the impact of separate account assets and separate account collateral held under securities lending agreements (directly related to lending separate account securities) and separate account liabilities and separate account collateral liabilities under securities lending agreements and consolidated sponsored investment funds, including consolidated VIEs.

The Company presents the as adjusted balance sheet as additional information to enable investors to exclude certain assets that have equal and offsetting liabilities or noncontrolling interests that ultimately do not have an impact on stockholders' equity or cash flows. Management views the as adjusted balance sheet, which contains non-GAAP financial measures, as an economic presentation of the Company's total assets and liabilities; however, it does not advocate that investors consider such non-GAAP financial measures in isolation from, or as a substitute for, financial information prepared in accordance with GAAP.

Separate Account Assets and Liabilities and Separate Account Collateral Held under Securities Lending Agreements

Separate account assets are maintained by BlackRock Life Limited, a wholly owned subsidiary of the Company that is a registered life insurance company in the United Kingdom, and represent segregated assets held for purposes of funding individual and group pension contracts. The

Company records equal and offsetting separate account liabilities. The separate account assets are not available to creditors of the Company and the holders of the pension contracts have no recourse to the Company's assets. The net investment income attributable to separate account assets accrues directly to the contract owners and is not reported on the consolidated statements of income. While BlackRock has no economic interest in these assets or liabilities, BlackRock earns an investment advisory fee for the service of managing these assets on behalf of its clients.

In addition, the Company records on its consolidated statements of financial condition the separate account collateral received under BlackRock Life Limited securities lending arrangements as its own asset in addition to an equal and offsetting separate account collateral liability for the obligation to return the collateral. The collateral is not available to creditors of the Company, and the borrowers

under the securities lending arrangements have no recourse to the Company's assets.

Consolidated Sponsored Investment Funds

The Company consolidates certain sponsored investment funds accounted for as voting rights entities ("VREs") and VIEs, (collectively, "Consolidated Sponsored Investment Funds"). See Note 2, *Significant Accounting Policies*, in the notes to the consolidated financial statements contained in Part II, Item 8 of this filing for more information on the Company's consolidation policy.

The Company cannot readily access cash and cash equivalents or other assets held by Consolidated Sponsored Investment Funds to use in its operating activities. In addition, the Company cannot readily sell investments held by Consolidated Sponsored Investment Funds in order to obtain cash for use in the Company's operations.

	December 31, 2017			
	GAAP Basis	Separate Account Assets/ Collateral ⁽¹⁾	Consolidated Sponsored Investment Funds ⁽²⁾	As Adjusted

Total liabilities and equity	\$ 220,217	\$ 174,127	\$ 580	\$ 45,510

(1) Amounts represent segregated client assets generating advisory fees in which BlackRock has no economic interest or liability.

(2) Amounts represent the portion of assets and liabilities of Consolidated Sponsored Investment Funds attributable to NCI.

(3) Amounts include property and equipment and other assets.

(4) Amount includes approximately \$3.9 billion of deferred income tax liabilities related to goodwill and intangibles. See Note 21, *Income Taxes*, in the notes to the consolidated financial statements contained in Part II, Item 8 of this filing for more information.

The following discussion summarizes the significant changes in assets and liabilities on a GAAP basis. Please see the consolidated statements of financial condition as of December 31, 2017 and 2016 contained in Part II, Item 8 of this filing. The discussion does not include changes related to assets and liabilities that are equal and offsetting and have no impact on BlackRock's stockholders' equity.

Assets. Cash and cash equivalents at December 31, 2017 and 2016 included \$63 million and \$53 million, respectively, of cash held by consolidated VREs (see *Liquidity and Capital Resources* for details on the change in cash and cash equivalents during 2017).

Accounts receivable at December 31, 2017 increased \$584 million from December 31, 2016 primarily due to higher BlackRock mutual funds, *iShares* ETFs and performance fee receivables. Investments were \$1,981 million at December 31, 2017 (for more information see *Investments* herein). Goodwill and intangible assets increased \$128 million from December 31, 2016, primarily due to the First Reserve and Cachematrix Transactions, partially offset by \$89 million of amortization of intangible assets. Other assets (including property and equipment) increased \$345 million from December 31, 2016, primarily related to an increase in unit trust receivables (substantially offset by an increase in unit trust payables recorded within other liabilities), earnings from certain strategic investments, and other assets, partially offset by a decrease in current taxes receivable.

Liabilities. Accrued compensation and benefits at December 31, 2017 increased \$273 million from December 31, 2016, primarily due to higher 2017 incentive compensation accruals. Accounts payable and accrued liabilities at December 31, 2017 increased \$281 million from December 31, 2016 due to higher current income taxes payables and increased accruals.

Net deferred income tax liabilities at December 31, 2017 decreased \$1.3 billion, primarily as a result of revaluation of deferred income tax liabilities due to the 2017 Tax Act. Other liabilities increased \$343 million from December 31, 2016, primarily related to an increase in unit trust payables

(substantially offset by an increase in unit trust receivables recorded within other assets) and contingent liabilities related to the First Reserve Transaction and uncertain tax positions, partially offset by a decrease in other operating liabilities.

Investments and Investments of Consolidated VIEs

The Company's investments and investments of consolidated VIEs (collectively, "Total Investments") were \$1,981 million and \$1,493 million, respectively, at December 31, 2017. Total Investments include consolidated investments held by sponsored investment funds accounted for as VREs and VIEs. Management reviews BlackRock's Total Investments on an "economic" basis, which eliminates the portion of Total Investments that does not impact BlackRock's book value or net income attributable to BlackRock. BlackRock's management does not advocate that investors consider such non-GAAP financial measures in isolation from, or as a substitute for, financial information prepared in accordance with GAAP.

The Company presents Total Investments, as adjusted, to enable investors to understand the portion of Total Investments that is owned by the Company, net of NCI, as a gauge to measure the impact of changes in net nonoperating income (expense) on investments to net income (loss) attributable to BlackRock.

The Company further presents net "economic" investment exposure, net of deferred compensation investments and hedged investments, to reflect another helpful measure for investors. The economic impact of Total Investments held pursuant to deferred compensation arrangements is offset by a change in compensation expense. The impact of certain investments is substantially mitigated by swap hedges. Carried interest capital allocations are excluded as there is no impact to BlackRock's stockholders' equity until such amounts are realized as performance fees. Finally, the Company's regulatory investment in Federal Reserve Bank stock, which is not subject to market or interest rate risk, is excluded from the Company's net economic investment exposure.

<i>(in millions)</i>	December 31, 2017	December 31, 2016
Investments, GAAP	\$ 1,981	\$ 1,595
Investments held by consolidated VIEs, GAAP	1,493	1,008
Total Investments	3,474	2,603
Investments held by consolidated VIEs	(1,493)	(1,008)
Investments held by consolidated VREs	(512)	(465)
Net interest in consolidated VREs	460	444
Net interest in consolidated VIEs ⁽¹⁾	1,225	840
Total Investments, as adjusted	3,154	2,414
Federal Reserve Bank stock	(91)	(89)
Deferred compensation investments	(56)	(66)
Hedged investments	(587)	(614)
Carried interest (VIEs/VREs)	(298)	(126)
Total "economic" investment exposure	\$ 2,122	\$ 1,519

(1) Amount includes \$266 million and \$108 million of carried interest (VIEs) as of December 31, 2017 and 2016, respectively, which has no impact on the Company's "economic" investment exposure.

The following table represents the carrying value of the Company's economic investment exposure, by asset type, at December 31, 2017 and 2016:

<i>(in millions)</i>	December 31, 2017	December 31, 2016
Private equity	\$ 331	\$ 334
Real assets	313	94
Other alternatives ⁽¹⁾	236	245
Other investments ⁽²⁾	1,242	846
Total "economic" investment exposure	\$ 2,122	\$ 1,519

(1) Other alternatives primarily include hedge funds/funds of hedge funds.

(2) Other investments primarily include seed investments in fixed income, equity and multi-asset mutual funds/strategies as well as U.K. government securities, primarily held for regulatory purposes.

As adjusted investment activity for 2017 and 2016 was as follows:

<i>(in millions)</i>	2017	2016
Total Investments, as adjusted, beginning balance	\$ 2,414	\$ 2,227
Purchases/capital contributions	1,082	1,234
Sales/maturities	(696)	(976)
Distributions ⁽¹⁾	(102)	(134)
Market appreciation(depreciation)/earnings from equity method investments	240	82
Carried interest capital allocations/(distributions)/acquired	172	26
Other	44	(45)
Total Investments, as adjusted, ending balance	\$ 3,154	\$ 2,414

(1) Amount includes distributions representing return of capital and return on investments.

LIQUIDITY AND CAPITAL RESOURCES

BlackRock Cash Flows Excluding the Impact of Consolidated Sponsored Investment Funds

The consolidated statements of cash flows include the cash flows of the Consolidated Sponsored Investment Funds. The Company uses an adjusted cash flow statement, which excludes the impact of Consolidated Sponsored Investment Funds, as a supplemental non-GAAP measure to assess

liquidity and capital requirements. The Company believes that its cash flows, excluding the impact of the Consolidated Sponsored Investment Funds, provide investors with useful information on the cash flows of BlackRock relating to its ability to fund additional operating, investing and financing activities. BlackRock's management does not advocate that investors consider such non-GAAP measures in isolation from, or as a substitute for, its cash flows presented in accordance with GAAP.

The following table presents a reconciliation of the consolidated statements of cash flows presented on a GAAP basis to the consolidated statements of cash flows, excluding the impact of the cash flows of Consolidated Sponsored Investment Funds:

<i>(in millions)</i>	GAAP Basis	Impact on Cash Flows of Consolidated Sponsored Investment Funds	Cash Flows Excluding Impact of Consolidated Sponsored Investment Funds
Cash and cash equivalents, December 31, 2015	\$ 6,083	\$ 100	\$ 5,983
Cash flows from operating activities	2,154	(1,063)	3,217
Cash flows from investing activities	(188)	(130)	(58)
Cash flows from financing activities	(1,685)	1,146	(2,831)
Effect of exchange rate changes on cash and cash equivalents	(273)	—	(273)
Net change in cash and cash equivalents	8	(47)	55
Cash and cash equivalents, December 31, 2016	\$ 6,091	\$ 53	\$ 6,038
Cash flows from operating activities	3,828	(384)	4,212
Cash flows from investing activities	(587)	(70)	(517)
Cash flows from financing activities	(2,630)	464	(3,094)
Effect of exchange rate changes on cash and cash equivalents	192	—	192
Net change in cash and cash equivalents	803	10	793
Cash and cash equivalents, December 31, 2017	\$ 6,894	\$ 63	\$ 6,831

Sources of BlackRock's operating cash primarily include investment advisory, administration fees and securities lending revenue, performance fees, revenue from technology and risk management services, advisory and other revenue and distribution fees. BlackRock uses its cash to pay all operating expense, interest and principal on borrowings, income taxes, dividends on BlackRock's capital stock, repurchases of the Company's stock, capital expenditures and purchases of co-investments and seed investments.

For details of the Company's GAAP cash flows from operating, investing and financing activities, see the Consolidated Statements of Cash Flows contained in Part II, Item 8 of this filing.

Cash flows from operating activities, excluding the impact of Consolidated Sponsored Investment Funds, primarily include the receipt of investment advisory and administration fees, securities lending revenue and performance fees offset by the payment of operating expenses incurred in the normal course of business, including year-end incentive compensation accrued for in the prior year.

Cash outflows from investing activities, excluding the impact of Consolidated Sponsored Investment Funds, for 2017 were \$517 million and primarily reflected \$497 million of investment purchases, \$155 million of purchases of property and equipment, \$73 million related to the First Reserve Transaction and \$29 million related to the Cachematrix Transaction, partially offset by \$205 million of net proceeds from sales and maturities of certain investments.

Cash outflows from financing activities, excluding the impact of Consolidated Sponsored Investment Funds, for 2017 were \$3,094 million, primarily resulting from \$1.4 billion of share repurchases, including \$1.1 billion in open market-transactions and \$321 million of employee tax withholdings related to employee stock transactions, \$1.7 billion of cash dividend payments and \$700 million of repayments of long-term borrowings, partially offset by \$697 million of proceeds from issuance of long-term borrowings.

The Company manages its financial condition and funding to maintain appropriate liquidity for the business. Liquidity resources at December 31, 2017 and 2016 were as follows:

<i>(in millions)</i>	December 31, 2017	December 31, 2016
Cash and cash equivalents ⁽¹⁾	\$ 6,894	\$ 6,091
Cash and cash equivalents held by consolidated VREs ⁽²⁾	(63)	(53)
Subtotal	6,831	6,038
Credit facility — undrawn	4,000	4,000
Total liquidity resources ⁽³⁾	\$ 10,831	\$ 10,038

(1) The percentage of cash and cash equivalents held by the Company's U.S. subsidiaries was approximately 40% and 50% at December 31, 2017 and 2016, respectively. See *Net Capital Requirements* herein for more information on net capital requirements in certain regulated subsidiaries.

(2) The Company cannot readily access such cash to use in its operating activities.

(3) Amounts do not reflect a reduction for year-end incentive compensation accruals of approximately \$1.5 billion and \$1.3 billion for 2017 and 2016, respectively, which are paid in the first quarter of the following year.

Total liquidity resources increased \$793 million during 2017, primarily reflecting cash flows from operating activities, partially offset by cash payments of 2016 year-end incentive awards, share repurchases of \$1.4 billion and cash dividend payments of \$1.7 billion.

A significant portion of the Company's \$3,154 million of Total Investments, as adjusted, is illiquid in nature and, as such, cannot be readily convertible to cash.

Share Repurchases. The Company repurchased 2.6 million common shares in open market transactions under the share repurchase program for approximately \$1.1 billion during 2017. At December 31, 2017, there were 6.4 million shares still authorized to be repurchased.

Net Capital Requirements. The Company is required to maintain net capital in certain regulated subsidiaries within a number of jurisdictions, which is partially maintained by retaining cash and cash equivalent investments in those subsidiaries or jurisdictions. As a result, such subsidiaries of the Company may be restricted in their ability to transfer cash between different jurisdictions and to their parents. Additionally, transfers of cash between international jurisdictions may have adverse tax consequences that could discourage such transfers.

BlackRock Institutional Trust Company, N.A. ("BTC") is chartered as a national bank that does not accept client deposits and whose powers are limited to trust and other fiduciary activities. BTC provides investment management services, including investment advisory and securities lending agency services, to institutional clients. BTC is subject to regulatory capital and liquid asset requirements administered by the Office of the Comptroller of the Currency.

At December 31, 2017 and 2016, the Company was required to maintain approximately \$1.8 billion and \$1.4 billion, respectively, in net capital in certain regulated subsidiaries, including BTC, entities regulated by the Financial Conduct Authority and Prudential Regulation Authority in the United Kingdom, and the Company's broker-dealers. The Company was in compliance with all applicable regulatory net capital requirements.

Undistributed Earnings of Foreign Subsidiaries. As a result of the 2017 Tax Act and the one-time mandatory deemed repatriation tax on untaxed accumulated foreign earnings, a provisional amount of U.S. income taxes was provided on the undistributed foreign earnings. The financial statement basis in excess of tax basis of its foreign subsidiaries remains indefinitely reinvested in foreign operations. The Company will continue to evaluate its capital management plans throughout 2018.

Short-Term Borrowings

2017 Revolving Credit Facility. The Company's credit facility has an aggregate commitment amount of \$4.0 billion and was amended in April 2017 to extend the maturity date to April 2022 (the "2017 credit facility"). The 2017 credit facility permits the Company to request up to an additional \$1.0 billion of borrowing capacity, subject to lender credit approval, increasing the overall size of the 2017 credit facility to an aggregate principal amount not to exceed \$5.0 billion. Interest on borrowings outstanding accrues at a rate based on the applicable London Interbank Offered Rate plus a spread. The 2017 credit facility requires the Company

not to exceed a maximum leverage ratio (ratio of net debt to earnings before interest, taxes, depreciation and amortization, where net debt equals total debt less unrestricted cash) of 3 to 1, which was satisfied with a ratio of less than 1 to 1 at December 31, 2017. The 2017 credit facility provides back-up liquidity to fund ongoing working capital for general corporate purposes and various investment opportunities. At December 31, 2017, the Company had no amount outstanding under the 2017 credit facility.

Commercial Paper Program. The Company can issue unsecured commercial paper notes (the "CP Notes") on a private-placement basis up to a maximum aggregate amount outstanding at any time of \$4.0 billion. The commercial paper program is currently supported by the 2017 credit facility. At December 31, 2017, BlackRock had no CP Notes outstanding.

Long-Term Borrowings

The carrying value of long-term borrowings at December 31, 2017 included the following:

<i>(in millions)</i>	Maturity Amount	Carrying Value	Maturity
5.00% Notes	\$ 1,000	\$ 999	December 2019
4.25% Notes	750	747	May 2021
3.375% Notes	750	746	June 2022
3.50% Notes	1,000	994	March 2024
1.25% Notes ⁽¹⁾	841	835	May 2025
3.20% Notes	700	693	March 2027
Total Long-term Borrowings	\$ 5,041	\$ 5,014	

(1) The carrying value of the 1.25% Notes estimated using foreign exchange rate as of December 31, 2017.

For more information on Company's borrowings, see Note 12, *Borrowings*, in the notes to the consolidated financial statements contained in Part II, Item 8 of this filing.

Contractual Obligations, Commitments and Contingencies

The following table sets forth contractual obligations, commitments and contingencies by year of payment at December 31, 2017:

<i>(in millions)</i>	2018	2019	2020	2021	2022	Thereafter⁽¹⁾	Total
Contractual obligations and commitments⁽¹⁾:							
Long-term borrowings ⁽²⁾ :							
Principal	\$ —	\$ 1,000	\$ —	\$ 750	\$ 750	\$ 2,541	\$ 5,041
Interest	175	175	125	109	81	185	850
Operating leases	141	132	126	118	109	1,580	2,206
Purchase obligations	128	101	29	22	19	28	327
Investment commitments	298	—	—	—	—	—	298
Total contractual obligations and commitments	742	1,408	280	999	959	4,334	8,722
Contingent obligations:							
Contingent payments related to business acquisitions ⁽³⁾	33	179	39	34	—	—	285
Total contractual obligations, commitments and contingent obligations⁽⁴⁾	\$ 775	\$ 1,587	\$ 319	\$ 1,033	\$ 959	\$ 4,334	\$ 9,007

(1) Amounts do not include \$350 million of cash payment consideration and contingent consideration related to the Company's agreement to acquire the asset management business of Citibanamex.

(2) The amount of principal and interest payments for the 2025 Notes (issued in Euros) represents the expected payment amounts using foreign exchange rates as of December 31, 2017.

(3) The amount of contingent payments reflected for any year represents the expected payments using foreign currency exchange rates as of December 31, 2017. The fair value of the remaining aggregate contingent payments at December 31, 2017 totaled \$236 million and is included in other liabilities on the consolidated statements of financial condition.

(4) At December 31, 2017, the Company had approximately \$365 million of net unrecognized tax benefits. Due to the uncertainty of timing and amounts that will ultimately be paid, this amount has been excluded from the table above.

Operating Leases. The Company leases its primary office locations under agreements that expire on varying dates through 2043. In connection with certain lease agreements, the Company is responsible for escalation payments. The contractual obligations table above includes only guaranteed minimum lease payments for such leases and does not project potential escalation or other lease-related payments. These leases are classified as operating leases

and, as such, are not recorded as liabilities on the consolidated statements of financial condition.

In May 2017, the Company entered into an agreement with 50 HYMC Owner LLC, for the lease of approximately 847,000 square feet of office space located at 50 Hudson Yards, New York, New York. The term of the lease is twenty years from the date that rental payments begin, expected to occur in

May 2023, with the option to renew for a specified term. The lease requires annual base rental payments of approximately \$51 million per year during the first five years of the lease term, increasing every five years to \$58 million, \$66 million and \$74 million per year (or approximately \$1.2 billion in base rent over its twenty-year term). This lease is classified as an operating lease and, as such, is not recorded as a liability on the consolidated statements of financial condition.

Purchase Obligations. In the ordinary course of business, BlackRock enters into contracts or purchase obligations with third parties whereby the third parties provide services to or on behalf of BlackRock. Purchase obligations included in the contractual obligations table above represent executory contracts, which are either noncancelable or cancelable with a penalty. At December 31, 2017, the Company's obligations primarily reflected standard service contracts for portfolio services, market data, office-related services and third-party marketing and promotional services, and obligations for equipment. Purchase obligations are recorded on the consolidated financial statements when services are provided and, as such, obligations for services and equipment not received are not included in the consolidated statement of financial condition at December 31, 2017.

Investment Commitments. At December 31, 2017, the Company had \$298 million of various capital commitments to fund sponsored investment funds, including consolidated VIEs. These funds include private equity funds, real assets funds and opportunistic funds. This amount excludes additional commitments made by consolidated funds of funds to underlying third-party funds as third-party noncontrolling interest holders have the legal obligation to fund the respective commitments of such funds of funds. Generally, the timing of the funding of these commitments is unknown and the commitments are callable on demand at any time prior to the expiration of the commitment. These unfunded commitments are not recorded on the consolidated statements of financial condition. These commitments do not include potential future commitments approved by the Company that are not yet legally binding. The Company intends to make additional capital commitments from time to time to fund additional investment products for, and with, its clients.

Contingent Payments Related to Business Acquisitions. In connection with certain acquisitions, BlackRock is required to make contingent payments, subject to achieving specified performance targets, which may include revenue related to acquired contracts or new capital commitments for certain products. The fair value of the remaining aggregate contingent payments at December 31, 2017 totaled \$236 million, including \$128 million related to the First Reserve Transaction, and is included in other liabilities on the consolidated statements of financial condition.

The following items have not been included in the contractual obligations, commitments and contingencies table:

Carried Interest Clawback. As a general partner in certain investment funds, including private equity partnerships and certain hedge funds, the Company may receive carried interest cash distributions from the partnerships in accordance with distribution provisions of the partnership agreements. The Company may, from time to time, be required to return all or a portion of such distributions to the limited partners in the event the limited partners do not

achieve a return as specified in the various partnership agreements. Therefore, BlackRock records carried interest subject to such clawback provisions in Total Investments, or cash/cash of consolidated VIEs to the extent that it is distributed, and as a deferred carried interest liability/other liabilities of consolidated VIEs on its consolidated statements of financial condition. Carried interest is recorded as performance fees on consolidated statements of income upon the earlier of the termination of the investment fund or when the likelihood of clawback is considered mathematically improbable.

Indemnifications. In the ordinary course of business or in connection with certain acquisition agreements, BlackRock enters into contracts pursuant to which it may agree to indemnify third parties in certain circumstances. The terms of these indemnities vary from contract to contract and the amount of indemnification liability, if any, cannot be determined or the likelihood of any liability is considered remote and, therefore, has not been included in the table above or recorded in the consolidated statement of financial condition at December 31, 2017. See further discussion in Note 13, *Commitments and Contingencies*, in the notes to the consolidated financial statements contained in Part II, Item 8 of this filing.

On behalf of certain clients, the Company lends securities to highly rated banks and broker-dealers. In these securities lending transactions, the borrower is required to provide and maintain collateral at or above regulatory minimums. Securities on loan are marked to market daily to determine if the borrower is required to pledge additional collateral. BlackRock has issued certain indemnifications to certain securities lending clients against potential loss resulting from a borrower's failure to fulfill its obligations under the securities lending agreement should the value of the collateral pledged by the borrower at the time of default be insufficient to cover the borrower's obligation under the securities lending agreement. At December 31, 2017, the Company indemnified certain of its clients for their securities lending loan balances of approximately \$200 billion. The Company held, as agent, cash and securities totaling \$214 billion as collateral for indemnified securities on loan at December 31, 2017. The fair value of these indemnifications was not material at December 31, 2017.

While the collateral pledged by a borrower is intended to be sufficient to offset the borrower's obligations to return securities borrowed and any other amounts owing to the lender under the relevant securities lending agreement, in the event of a borrower default, the Company can give no assurance that the collateral pledged by the borrower will be sufficient to fulfill such obligations. If the amount of such pledged collateral is not sufficient to fulfill such obligations to a client for whom the Company has provided indemnification, BlackRock would be responsible for the amount of the shortfall. These indemnifications cover only the collateral shortfall described above, and do not in any way guarantee, assume or otherwise insure the investment performance or return of any cash collateral vehicle into which securities lending cash collateral is invested.

Compensation and Benefit Obligations. The Company has various compensation and benefit obligations, including bonuses, commissions and incentive payments payable, defined contribution plan matching contribution obligations, and deferred compensation arrangements, that are

excluded from the contractual obligations and commitments table above. Accrued compensation and benefits at December 31, 2017 totaled \$2,153 million and included incentive compensation of \$1,499 million, deferred compensation of \$350 million and other compensation and benefits related obligations of \$304 million. Substantially all of the incentive compensation liability was paid in the first quarter of 2018, while the deferred compensation obligations are generally payable over periods of up to three years.

CRITICAL ACCOUNTING POLICIES

The preparation of consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenue and expense during the reporting periods. Actual results could differ significantly from those estimates. Management considers the following critical accounting policies important to understanding the consolidated financial statements. For a summary of these and additional accounting policies see Note 2, *Significant Accounting Policies*, in the consolidated financial statements included in Part II, Item 8 of this filing.

Consolidation

In the normal course of business, the Company is the manager of various types of sponsored investment vehicles. The Company performs an analysis for investment products to determine if the product is a VIE or a VRE. Assessing whether an entity is a VIE or a VRE involves judgment and analysis. Factors considered in this assessment include the entity's legal organization, the entity's capital structure and equity ownership, and any related party or de facto agent implications of the Company's involvement with the entity. Investments that are determined to be VREs are consolidated if the Company can exert control over the financial and operating policies of the investee, which generally exists if there is greater than 50% voting interest. See Note 4, *Consolidated Voting Rights Entities*, in the notes to the consolidated financial statements contained in Part II, Item 8 of this filing for more information. Investments that are determined to be VIEs are consolidated if the Company is the primary beneficiary ("PB") of the entity.

At December 31, 2017, BlackRock was determined to be the PB for certain investment funds that were determined to be VIEs, which required BlackRock to consolidate them. BlackRock was deemed to be the PB because it has the power to direct the activities that most significantly impact the entities' economic performance and has the obligation to absorb losses or the right to receive benefits that potentially could be significant to the VIE. The Company generally consolidates VIEs in which it holds an equity ownership interest of 10% or greater and deconsolidates such VIEs once equity ownership falls below 10%. See Note 5, *Variable Interest Entities*, in the notes to the consolidated financial statements contained in Part II, Item 8 of this filing for more information.

Investments

Equity Method Investments. For equity investments where BlackRock does not control the investee, and where it is not

the PB of a VIE, but can exert significant influence over the financial and operating policies of the investee, the Company follows the equity method of accounting. The evaluation of whether the Company exerts control or significant influence over the financial and operational policies of its investees requires significant judgment based on the facts and circumstances surrounding each individual investment. Factors considered in these evaluations may include the type of investment, the legal structure of the investee, the terms and structure of the investment agreement, including investor voting or other rights, the terms of BlackRock's advisory agreement or other agreements with the investee, any influence BlackRock may have on the governing board of the investee, the legal rights of other investors in the entity pursuant to the fund's operating documents and the relationship between BlackRock and other investors in the entity.

BlackRock's equity method investees that are investment companies record their underlying investments at fair value. Therefore, under the equity method of accounting, BlackRock's share of the investee's underlying net income predominantly represents fair value adjustments in the investments held by the equity method investees. BlackRock's share of the investee's underlying net income or loss is based upon the most currently available information and is recorded as nonoperating income (expense) for investments in investment companies, or as advisory and other revenue for certain strategic investments, which are recorded in other assets, since such investees are considered to be an extension of BlackRock's core business.

At December 31, 2017, the Company had \$816 million and \$468 million of equity method investments, included in investments and other assets, respectively, and at December 31, 2016, the Company had \$730 million and \$348 million of equity method investments included in investments and other assets, respectively.

Impairments of Investments. Management periodically assesses equity method, available-for-sale, held-to-maturity and cost investments for other-than-temporary impairment ("OTTI"). If an OTTI exists, an impairment charge is recorded in nonoperating income (expense) on the consolidated statements of income.

For equity method, held-to-maturity and cost method investments, if circumstances indicate that an OTTI may exist, the investments are evaluated using market values, where available, or the expected future cash flows of the investment. If the Company determines an OTTI exists, an impairment charge is recognized for the excess of the carrying amount of the investment over its estimated fair value.

For available-for-sale securities, when the fair value is lower than cost, the Company considers, among other factors, the length of time the security has been in a loss position, the extent to which the security's fair value is less than cost, the financial condition and near-term prospects of the security's issuer and the Company's ability and intent to hold the security for a length of time sufficient to allow for recovery of such unrealized losses. For equity securities, if the impairment is considered other-than-temporary, an impairment charge is recognized for the excess of the carrying amount of the investment over its fair value. For debt securities, the Company considers whether: (1) it has the intent to sell the security; (2) it is more likely than not that it will be required to sell the security before recovery; or

(3) it expects to recover the entire amortized cost basis of the security. If the Company intends to sell the security or it is more likely than not that it will be required to sell the security, the entire difference between the amortized cost and fair value must be recognized in earnings. If the Company does not intend to sell a security and it is not more likely than not that it will be required to sell the security but the security has suffered an impairment related to credit, the credit loss will be bifurcated from the total decline in value and recorded in earnings with the remaining portion recorded in accumulated other comprehensive income.

For the Company's investments in CLOs, the Company reviews cash flow estimates over the life of each CLO investment. On a quarterly basis, if the present value of the estimated future cash flows is lower than the carrying value of the investment and there is an adverse change in estimated cash flows, an impairment is considered to be other-than-temporary. An impairment charge is recognized for the excess of the carrying amount of the investment over its estimated fair value.

Evaluation of impairments involves significant assumptions and management judgments, which could differ from actual results, and these differences could have a material impact on the consolidated statements of income.

Fair Value Measurements

The Company's assessment of the significance of a particular input to the fair value measurement according to the fair value hierarchy (i.e., Level 1, 2 and 3 inputs, as defined) in its entirety requires judgment and considers factors specific to the financial instrument. See Note 2, *Significant Accounting Policies*, in the consolidated financial statements contained in Part II, Item 8 of this filing for more information on fair value measurements.

Changes in Valuation. Changes in value on \$2,878 million of Total Investments will impact the Company's nonoperating income (expense), \$103 million will impact accumulated other comprehensive income, \$195 million are held at cost or amortized cost and the remaining \$298 million relates to carried interest, which will not impact nonoperating income (expense). At December 31, 2017, changes in fair value of approximately \$1,739 million of consolidated VIEs/VREs will impact BlackRock's net income (loss) attributable to noncontrolling interests on the consolidated statements of income. BlackRock's net exposure to changes in fair value of consolidated VIEs/VREs was \$1,419 million.

Goodwill and Intangible Assets

The value of advisory contracts acquired in business acquisitions to manage AUM in proprietary open-end investment funds as well as collective trust funds without a specified termination date are classified as indefinite-lived intangible assets. The assignment of indefinite lives to such investment fund contracts is based upon the assumption there is no foreseeable limit on the contract period to manage these funds due to the likelihood of continued renewal at little or no cost. In addition, trade names/trademarks are considered indefinite-lived intangibles as they are expected to generate cash flows indefinitely. Goodwill represents the cost of a business acquisition in excess of the fair value of the net assets acquired. Indefinite-lived intangible assets and goodwill are not amortized. Finite-lived management contracts and investor/customer relationships, which relate to acquired separate

accounts and funds with a specified termination date, are amortized over their remaining expected useful lives, which, at December 31, 2017, ranged from 1 to 11 years with a weighted-average remaining estimated useful life of 6.5 years.

Goodwill. The Company assesses its goodwill for impairment at least annually, considering such factors as the book value and the market capitalization of the Company. The impairment assessment performed as of July 31, 2017 indicated no impairment charge was required. The Company continues to monitor its book value per share compared with closing prices of its common stock for potential indicators of impairment. At December 31, 2017, the Company's common stock closed at \$513.71, which exceeded its book value of approximately \$197.61 per share.

Indefinite-lived and finite-lived intangibles. The Company performs assessments to determine if any intangible assets are impaired and whether the indefinite-life and finite-life classifications are still appropriate.

In evaluating whether it is more likely than not that the fair value of indefinite-lived intangibles is less than carrying value, BlackRock performed certain quantitative assessments and assessed various significant qualitative factors including AUM, revenue basis points, projected AUM growth rates, operating margins, tax rates and discount rates. In addition, the Company considered other factors including: (i) macroeconomic conditions such as a deterioration in general economic conditions, limitations on accessing capital, fluctuations in foreign exchange rates, or other developments in equity and credit markets; (ii) industry and market considerations such as a deterioration in the environment in which an entity operates, an increased competitive environment, a decline in market-dependent multiples or metrics, a change in the market for an entity's services, or regulatory, legal or political developments; and (iii) entity-specific events, such as a change in management or key personnel, overall financial performance and litigation that could affect significant inputs used to determine the fair value of the indefinite-lived intangible asset. If an indefinite-lived intangible is determined to be more likely than not impaired, then the fair value of the asset is compared with its carrying value and any excess of the carrying value over the fair value would be recognized as an expense in the period in which the impairment occurs.

For finite-lived intangible assets, if potential impairment circumstances are considered to exist, the Company will perform a recoverability test, using an undiscounted cash flow analysis. Actual results could differ from these cash flow estimates, which could materially impact the impairment conclusion. If the carrying value of the asset is determined not to be recoverable based on the undiscounted cash flow test, the difference between the book value of the asset and its current fair value would be recognized as an expense in the period in which the impairment occurs.

In addition, management judgment is required to estimate the period over which finite-lived intangible assets will contribute to the Company's cash flows and the pattern in which these assets will be consumed. A change in the remaining useful life of any of these assets, or the reclassification of an indefinite-lived intangible asset to a finite-lived intangible asset, could have a significant impact on the Company's amortization expense, which was \$89 million, \$99 million and \$128 million for 2017, 2016 and 2015, respectively.

In 2017, 2016 and 2015, the Company performed impairment tests, including evaluating various qualitative factors and performing certain quantitative assessments. The Company determined that no impairment charges were required, the classification of indefinite-lived versus finite-lived intangibles was still appropriate and no changes to the expected lives of the finite-lived intangibles were required. The Company continuously monitors various factors, including AUM, for potential indicators of impairment.

Income Taxes

Deferred income tax assets and liabilities are recognized for future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases using currently enacted tax rates in effect for the year in which the differences are expected to reverse. The effect of a change in tax rates on deferred tax assets and liabilities is recognized in income in the period that includes the enactment date.

Significant management judgment is required in estimating the ranges of possible outcomes and determining the probability of favorable or unfavorable tax outcomes and potential interest and penalties related to such unfavorable outcomes. Actual future tax consequences relating to uncertain tax positions may be materially different than the Company's current estimates. At December 31, 2017, BlackRock had \$629 million of gross unrecognized tax benefits, of which \$316 million, if recognized, would affect the effective tax rate.

Management is required to estimate the timing of the recognition of deferred tax assets and liabilities, make assumptions about the future deductibility of deferred income tax assets and assess deferred income tax liabilities based on enacted tax rates for the appropriate tax jurisdictions to determine the amount of such deferred income tax assets and liabilities. At December 31, 2017, the Company had deferred tax assets of \$19 million and net deferred tax liabilities of approximately \$3,538 million on the consolidated statement of financial condition. Changes in deferred tax assets and liabilities may occur in certain circumstances, including statutory income tax rate changes, statutory tax law changes, changes in the anticipated timing of recognition of deferred tax assets and liabilities or changes in the structure or tax status of the Company.

The Company assesses whether a valuation allowance should be established against its deferred income tax assets based on consideration of all available evidence, both positive and negative, using a more likely than not standard. The assessment considers, among other matters, the nature, frequency and severity of recent losses, forecast of future profitability, the duration of statutory carry back and carry forward periods, the Company's experience with tax attributes expiring unused, and tax planning alternatives.

The Company records income taxes based upon its estimated income tax liability or benefit. The Company's actual tax liability or benefit may differ from the estimated income tax liability or benefit. The Company had current income taxes receivables of approximately \$142 million and current income taxes payables of \$256 million at December 31, 2017.

For further information on the 2017 Tax Act, see Note 21, *Income Taxes*, in the consolidated financial statements included in Part II, Item 8 of this filing.

Revenue Recognition

Investment advisory and administration fees are recognized as the services are performed. Such fees are primarily based on agreed-upon percentages of the net asset value of AUM or committed capital. Investment advisory and administration fees are affected by changes in AUM, including market appreciation or depreciation, foreign exchange translation and net inflows or outflows. Investment advisory and administration fees for investment funds are shown net of fees waived pursuant to contractual expense limitations of the funds or voluntary waivers.

The Company contracts with third parties and related parties for various fund distribution and shareholder servicing to be performed on behalf of certain funds the Company manages. Such arrangements generally are priced as a portion of the fee paid by the fund. In certain cases, the fund (primarily international funds) takes on the primary responsibility for payment for services such that the Company bears no credit risk to the third-party. The Company currently records its management fees net of retrocessions. The Company has additional contracts for similar services with third parties, which due to the terms of the contracts, are recorded as distribution and servicing costs and thus not netted on the consolidated statements of income.

The Company earns revenue by lending securities as an agent on behalf of clients, primarily to brokerage institutions. Revenue is accounted for on an accrual basis. The securities loaned are secured by collateral, generally ranging from 102% to 112% of the value of the loaned securities. Generally, the revenue earned is shared between the Company and the funds or other third-party accounts managed by the Company from which the securities are borrowed. For 2017, 2016 and 2015, securities lending revenue earned by the Company totaled \$597 million, \$579 million and \$513 million, respectively, and is recorded in investment advisory, administration fees and securities lending revenue on the consolidated statements of income. Investment advisory, administration fees and securities lending revenue are reported together as the fees for these services often are agreed upon with clients as a bundled fee.

The Company receives investment advisory performance fees or incentive allocations, from certain actively managed investment funds and certain separately managed accounts. These performance fees are dependent upon exceeding specified relative or absolute investment return thresholds. Such fees are recorded upon completion of the measurement period, which varies by product or account, and could be monthly, quarterly, annually or longer.

In addition, the Company is allocated carried interest from certain alternative investment products upon exceeding performance thresholds. BlackRock may be required to reverse/return all, or part, of such carried interest allocations depending upon future performance of these funds. Therefore, BlackRock records carried interest subject to such clawback provisions in Total Investments or cash/cash of consolidated VIEs to the extent that it is distributed, on its consolidated statements of financial condition. Carried interest is recorded as performance fee revenue upon the earlier of the termination of the investment fund or

when the likelihood of clawback is considered mathematically improbable.

The Company records a deferred carried interest liability to the extent it receives cash or capital allocations related to carried interest prior to meeting the revenue recognition criteria. At December 31, 2017 and 2016, the Company had \$219 million and \$152 million, respectively, of deferred carried interest recorded in other liabilities/other liabilities of consolidated VIEs on the consolidated statements of financial condition. A portion of the deferred carried interest liability will be paid to certain employees. The ultimate timing of the recognition of performance fee revenue, if any, for these products is unknown.

The following table presents changes in the deferred carried interest liability (including the portion related to consolidated VIEs) for 2017 and 2016:

(in millions)	2017	2016
Beginning balance	\$ 152	\$ 143
Net increase (decrease) in unrealized allocations	75	37
Performance fee revenue recognized	(21)	(28)
Acquisition	13	—
Ending balance	\$ 219	\$ 152

For 2017, 2016 and 2015, performance fee revenue (which included recognized carried interest) totaled \$594 million, \$295 million and \$621 million, respectively.

Fees earned for technology and risk management revenue are recorded as services are performed and are generally determined using the value of positions on the *Aladdin* platform or on a fixed-rate basis. For 2017, 2016 and 2015, technology and risk management revenue totaled \$677 million, \$595 million and \$528 million, respectively.

Adjustments to revenue arising from initial estimates recorded historically have been immaterial since the majority of BlackRock's investment advisory and administration revenue is calculated based on AUM and since the Company does not record performance fee revenue until performance thresholds have been exceeded and the likelihood of clawback is mathematically improbable.

Accounting Developments

Recent Accounting Pronouncements Not Yet Adopted.

Revenue from Contracts with Customers. In May 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2014-09, *Revenue from Contracts with Customers* ("ASU 2014-09"). ASU 2014-09 outlines a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers and supersedes most current revenue recognition guidance, including industry-specific guidance. The guidance also changes the accounting for certain contract costs and revises the criteria for determining if an entity is acting as a principal or agent in certain arrangements.

The key changes in the standard that impact the Company's revenue recognition relate to the presentation of certain revenue contracts and associated contract costs. The most significant of these changes relates to the presentation of certain distribution costs, which are currently presented net against revenues (contra-revenue) and will be presented as

an expense on a gross basis. The Company adopted ASU 2014-09 effective January 1, 2018 on a full retrospective basis, which will require 2016 and 2017 to be restated in future filings. The cumulative effect adjustment to the 2016 opening retained earnings was not material. The Company currently expects the net gross up to revenue to be approximately \$1 billion with a corresponding gross up to expense for both 2016 and 2017. Consequently, the Company expects its GAAP operating margin to decline upon adoption due to the gross up of revenue. However, no material impact is expected on the Company's as adjusted operating margin.

For accounting pronouncements that the Company adopted during the year ended December 31, 2017 and for additional recent accounting pronouncements not yet adopted, see Note 2, *Significant Accounting Policies*, in the consolidated financial statements contained in Part II, Item 8 of this filing.

Item 7a. Quantitative and Qualitative Disclosures about Market Risk

AUM Market Price Risk. BlackRock's investment advisory and administration fees are primarily comprised of fees based on a percentage of the value of AUM and, in some cases, performance fees expressed as a percentage of the returns realized on AUM. At December 31, 2017, the majority of the Company's investment advisory and administration fees were based on average or period end AUM of the applicable investment funds or separate accounts. Movements in equity market prices, interest rates/credit spreads, foreign exchange rates or all three could cause the value of AUM to decline, which would result in lower investment advisory and administration fees.

Corporate Investments Portfolio Risks. As a leading investment management firm, BlackRock devotes significant resources across all of its operations to identifying, measuring, monitoring, managing and analyzing market and operating risks, including the management and oversight of its own investment portfolio. The Board of Directors of the Company has adopted guidelines for the review of investments to be made by the Company, requiring, among other things, that investments be reviewed by certain senior officers of the Company, and that certain investments may be referred to the Audit Committee or the Board of Directors, depending on the circumstances, for approval.

In the normal course of its business, BlackRock is exposed to equity market price risk, interest rate/credit spread risk and foreign exchange rate risk associated with its corporate investments.

BlackRock has investments primarily in sponsored investment products that invest in a variety of asset classes, including real assets, private equity and hedge funds. Investments generally are made for co-investment purposes, to establish a performance track record, to hedge exposure to certain deferred compensation plans or for regulatory purposes. Currently, the Company has a seed capital hedging program in which it enters into swaps to hedge market and interest rate exposure to certain investments. At December 31, 2017, the Company had outstanding total return swaps with an aggregate notional value of approximately \$587 million. At December 31, 2017, there were no outstanding interest rate swaps.

At December 31, 2017, approximately \$2.0 billion of BlackRock's Total Investments were maintained in consolidated sponsored investment funds accounted for as VREs and VIEs. Excluding the impact of the Federal Reserve Bank stock, carried interest, investments made to hedge exposure to certain deferred compensation plans and certain investments that are hedged via the seed capital hedging program, the Company's economic exposure to its investment portfolio is \$2.1 billion. See *Balance Sheet Overview-Investments and Investments of Consolidated VIEs* in Management's Discussion and Analysis of Financial Condition and Results of Operations for further information on the Company's Total Investments.

Equity Market Price Risk. At December 31, 2017, the Company's net exposure to equity market price risk in its investment portfolio was approximately \$946 million of the Company's total economic investment exposure. Investments subject to market price risk include private equity and real assets investments, hedge funds and funds of funds as well as mutual funds. The Company estimates that a hypothetical 10% adverse change in market prices would result in a decrease of approximately \$94.6 million in the carrying value of such investments.

Interest-Rate/Credit Spread Risk. At December 31, 2017, the Company was exposed to interest rate risk and credit spread risk as a result of approximately \$1,176 million of Total Investments in debt securities and sponsored investment products that invest primarily in debt securities. Management considered a hypothetical 100 basis point fluctuation in interest rates or credit spreads and estimates that the impact of such a fluctuation on these investments, in the aggregate, would result in a decrease, or increase, of approximately \$19 million in the carrying value of such investments.

Foreign Exchange Rate Risk. As discussed above, the Company invests in sponsored investment products that invest in a variety of asset classes. The carrying value of the total economic investment exposure denominated in foreign currencies, primarily the British pound and Euro, was \$483 million at December 31, 2017. A 10% adverse change in the applicable foreign exchange rates would result in approximately a \$48.3 million decline in the carrying value of such investments.

Other Market Risks. The Company executes forward foreign currency exchange contracts to mitigate the risk of certain foreign exchange risk movements. At December 31, 2017, the Company had outstanding forward foreign currency exchange contracts with an aggregate notional value of approximately \$1.5 billion.

Item 8. Financial Statements and Supplemental Data

The report of the independent registered public accounting firm and financial statements listed in the accompanying index are included in Item 15 of this report. See Index to the consolidated financial statements on page F-1 of this Form 10-K.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

There have been no disagreements on accounting and financial disclosure matters. BlackRock has not changed accountants in the two most recent fiscal years.

Item 9a. Controls and Procedures

Disclosure Controls and Procedures. Under the direction of BlackRock's Chief Executive Officer and Chief Financial Officer, BlackRock evaluated the effectiveness of its disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this annual report on Form 10-K. Based on this evaluation, BlackRock's Chief Executive Officer and Chief Financial Officer have concluded that BlackRock's disclosure controls and procedures were effective.

Internal Control over Financial Reporting. There were no changes in our internal control over financial reporting that occurred during the fourth quarter of the fiscal year ending December 31, 2017 that have materially affected or are reasonably likely to materially affect our internal control over financial reporting.

Management's Report on Internal Control Over Financial Reporting

Management of BlackRock, Inc. (the "Company") is responsible for establishing and maintaining effective internal control over financial reporting. Internal control over financial reporting is defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934, as amended, as a process designed by, or under the supervision of, the Company's principal executive and principal financial officers, or persons performing similar functions, and effected by the Company's board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America and includes those policies and procedures that:

- pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States of America, and that receipts and expenditures of the Company are being made only in accordance with the authorizations of management and directors of the Company; and
- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of effectiveness of the internal control over financial reporting to future periods are subject to the risks that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2017 based on the criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this assessment, management concluded that, as of December 31, 2017, the Company's internal control over financial reporting is effective.

The Company's independent registered public accounting firm has issued an attestation report on the effectiveness of the Company's internal control over financial reporting.

February 28, 2018

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of BlackRock, Inc.:

Opinion on Internal Control over Financial Reporting

We have audited the internal control over financial reporting of BlackRock, Inc. and subsidiaries (the “Company”) as of December 31, 2017, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2017, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by COSO.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated statement of financial condition as of December 31, 2017 and the related consolidated statements of income, comprehensive income, changes in equity and cash flows for the year then ended of the Company and our report dated February 28, 2018, expressed an unqualified opinion on those consolidated financial statements.

Basis for Opinion

The Company’s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management’s Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company’s internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control over Financial Reporting

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of BlackRock, Inc.:

Opinion on the Financial Statements

We have audited the accompanying consolidated statements of financial condition of BlackRock, Inc. and subsidiaries (the “Company”) as of December 31, 2017 and 2016, the related consolidated statements of income, comprehensive income, changes in equity, and cash flows for each of the three years in the period ended December 31, 2017, and the related notes (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2017 and 2016, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2017, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company’s internal control over financial reporting as of December 31, 2017, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 28, 2018, expressed an unqualified opinion on the Company’s internal control over financial reporting.

Basis for Opinion

These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on the Company’s financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ Deloitte & Touche LLP

New York, New York
February 28, 2018

We have served as the Company’s auditor since 2002.

BlackRock, Inc.

Notes to the Consolidated Financial Statements

1. Introduction and Basis of Presentation

Business. BlackRock, Inc. (together, with its subsidiaries, unless the context otherwise indicates, “BlackRock” or the “Company”) is a leading publicly traded investment management firm providing a broad range of investment and risk management services to institutional and retail clients worldwide.

BlackRock’s diverse platform of active (alpha) and index (beta) investment strategies across asset classes enables the Company to tailor investment outcomes and asset allocation solutions for clients. Product offerings include single- and multi-asset portfolios investing in equities, fixed income, alternatives and money market instruments. Products are offered directly and through intermediaries in a variety of vehicles, including open-end and closed-end mutual funds, *iShares*® exchange-traded funds (“ETFs”), separate accounts, collective investment trusts and other pooled investment vehicles. BlackRock also offers an investment and risk management platform, *Aladdin*®, risk analytics, advisory and technology services and solutions to a broad base of institutional and wealth management investors.

At December 31, 2017, The PNC Financial Services Group, Inc. (“PNC”) held 21.2% of the Company’s voting common stock and 21.7% of the Company’s capital stock, which includes outstanding common and nonvoting preferred stock.

Basis of Presentation. These consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States (“GAAP”) and include the accounts of the Company and its controlled subsidiaries. Noncontrolling interests on the consolidated statements of financial condition represents the portion of consolidated sponsored investment funds in which the Company does not have direct equity ownership. Accounts and transactions between consolidated entities have been eliminated.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expense during the reporting periods. Actual results could differ from those estimates.

Certain items previously reported have been reclassified to conform to the current year presentation. Beginning with the first quarter of 2017, *Aladdin* revenue previously reported within “*BlackRock Solutions*® and advisory” has been presented within “Technology and risk management revenue” on the consolidated statements of income. The remaining previously reported “*BlackRock Solutions* and advisory” revenue is currently reported as part of “Advisory and other revenue.” The prior period amounts reported for *BlackRock Solutions* and advisory for the year ended December 31, 2016 and 2015 have been reclassified to conform to the current presentation.

2. Significant Accounting Policies

Cash and Cash Equivalents. Cash and cash equivalents primarily consists of cash, money market funds and short-term, highly liquid investments with original maturities of three months or less in which the Company is exposed to market and credit risk. Cash and cash equivalent balances that are legally restricted from use by the Company are recorded in other assets on the consolidated statements of financial condition. Cash balances maintained by consolidated voting rights entities (“VREs”) are not considered legally restricted and are included in cash and cash equivalents on the consolidated statements of financial condition. Cash balances maintained by consolidated variable interest entities (“VIEs”) are included in assets of consolidated variable interest entities on the consolidated statements of financial condition.

Investments. *Investments in Debt and Marketable Equity Securities.* BlackRock classifies debt and marketable equity investments as trading, available-for-sale, or held-to-maturity based on the Company’s intent to sell the security or, for a debt security, the Company’s intent and ability to hold the debt security to maturity.

Trading securities are those investments that are purchased principally for the purpose of selling them in the near term. Trading securities are carried at fair value on the consolidated statements of financial condition with changes in fair value recorded in nonoperating income (expense) on the consolidated statements of income in the period of the change.

Held-to-maturity debt securities are purchased with the positive intent and ability to be held to maturity and are recorded at amortized cost on the consolidated statements of financial condition.

Available-for-sale securities are those securities that are not classified as trading or held-to-maturity. Available-for-sale securities are carried at fair value on the consolidated statements of financial condition with changes in fair value recorded in the accumulated other comprehensive income (loss) component of stockholders’ equity in the period of the change. Upon the disposition of an available-for-sale security, the Company reclassifies the gain or loss on the security from accumulated other comprehensive income (loss) to nonoperating income (expense) on the consolidated statements of income.

Equity Method. For equity investments where BlackRock does not control the investee, and where it is not the primary beneficiary (“PB”) of a VIE, but can exert significant influence over the financial and operating policies of the investee, the Company follows the equity method of accounting. BlackRock’s share of the investee’s underlying net income or loss is recorded as net gain (loss) on investments within nonoperating income (expense) and as other revenue for certain strategic investments since such companies are considered to be an extension of BlackRock’s core business. BlackRock’s share of net income of the investee is recorded based upon the most current information available at the time, which may precede the date of the consolidated statement of financial condition. Distributions received from the investment reduce the Company’s carrying value of the investee and the cost basis if deemed to be a return of capital.

Cost Method. For nonmarketable equity investments where BlackRock neither controls nor has significant influence over

the investee, the investments are accounted for using the cost method of accounting. Dividends received from the investment are recorded as dividend income within nonoperating income (expense).

Impairments of Investments. Management periodically assesses equity method, available-for-sale, held-to-maturity and cost investments for other-than-temporary impairment (“OTTI”). If an OTTI exists, an impairment charge is recorded in nonoperating income (expense) on the consolidated statements of the income.

For equity method, held-to-maturity and cost method investments, if circumstances indicate that an OTTI may exist, the investments are evaluated using market values, where available, or the expected future cash flows of the investment. If the Company determines an OTTI exists, an impairment charge is recognized for the excess of the carrying amount of the investment over its estimated fair value.

For available-for-sale securities, when the fair value is lower than cost, the Company considers, among other factors, the length of time the security has been in a loss position, the extent to which the security’s fair value is less than cost, the financial condition and near-term prospects of the security’s issuer and the Company’s ability and intent to hold the security for a length of time sufficient to allow for recovery of such unrealized losses. For equity securities, if the impairment is considered other-than-temporary, an impairment charge is recognized for the excess of the carrying amount of the investment over its fair value. For debt securities, the Company considers whether: (1) it has the intent to sell the security; (2) it is more likely than not that it will be required to sell the security before recovery; or (3) it expects to recover the entire amortized cost basis of the security. If the Company intends to sell the security or it is more likely than not that it will be required to sell the security, the entire difference between the amortized cost and fair value must be recognized in earnings. If the Company does not intend to sell a security and it is not more likely than not that it will be required to sell the security but the security has suffered an impairment related to credit, the credit loss will be bifurcated from the total decline in value and recorded in earnings with the remaining portion recorded in accumulated other comprehensive income.

For the Company’s investments in collateralized loan obligations (“CLOs”), the Company reviews cash flow estimates over the life of each CLO investment. If the present value of the estimated future cash flows is lower than the carrying value of the investment and there is an adverse change in estimated cash flows, an impairment is considered to be other-than-temporary. An impairment charge is recognized for the excess of the carrying amount of the investment over its estimated fair value.

Consolidation. The Company performs an analysis for investment products to determine if the product is a VIE or a VRE. Assessing whether an entity is a VIE or a VRE involves judgment and analysis. Factors considered in this assessment include the entity’s legal organization, the entity’s capital structure and equity ownership, and any related party or de facto agent implications of the Company’s involvement with the entity. Investments that are determined to be VIEs are consolidated if the Company is the PB of the entity. VREs are typically consolidated if the Company holds the majority voting interest. Upon the occurrence of certain events (such as contributions and

redemptions, either by the Company, or third parties, or amendments to the governing documents of the Company’s investment products), management reviews and reconsiders its previous conclusion regarding the status of an entity as a VIE or a VRE. Additionally, management continually reconsiders whether the Company is deemed to be a VIE’s PB that consolidates such entity.

Consolidation of Variable Interest Entities. Certain investment products for which a controlling financial interest is achieved through arrangements that do not involve or are not directly linked to voting interests are deemed VIEs. BlackRock reviews factors, including whether or not i) the entity has equity that is sufficient to permit the entity to finance its activities without additional subordinated support from other parties and ii) the equity holders at risk have the obligation to absorb losses, the right to receive residual returns, and the right to direct the activities of the entity that most significantly impact the entity’s economic performance, to determine if the investment product is a VIE. BlackRock re-evaluates such factors as facts and circumstances change.

The PB of a VIE is defined as the variable interest holder that has a controlling financial interest in the VIE. A controlling financial interest is defined as (i) the power to direct the activities of the VIE that most significantly impact its economic performance and (ii) the obligation to absorb losses of the entity or the right to receive benefits from the entity that potentially could be significant to the VIE. The Company generally consolidates VIEs in which it holds an equity ownership interest of 10% or greater and deconsolidates such VIEs once equity ownership falls below 10%.

Consolidation of Voting Rights Entities. BlackRock is required to consolidate an investee to the extent that BlackRock can exert control over the financial and operating policies of the investee, which generally exists if there is a greater than 50% voting equity interest.

Retention of Specialized Investment Company Accounting Principles. Upon consolidation of sponsored investment funds, the Company retains the specialized investment company accounting principles of the underlying funds. All of the underlying investments held by such consolidated sponsored investment funds are carried at fair value with corresponding changes in the investments’ fair values reflected in nonoperating income (expense) on the consolidated statements of income. When the Company no longer controls these funds due to reduced ownership percentage or other reasons, the funds are deconsolidated and accounted for as an equity method investment, available-for-sale security or trading investment if the Company still maintains an investment.

Money Market Fee Waivers. The Company is currently voluntarily waiving a portion of its management fees on certain money market funds to ensure that they maintain a targeted level of daily net investment income (the “Yield Support waivers”). During 2017, 2016 and 2015, these waivers resulted in a reduction of management fees of approximately \$6 million, \$56 million and \$137 million, respectively. Approximately 0%, 35% and 50% of Yield Support waivers for 2017, 2016 and 2015, respectively, were offset by a reduction of BlackRock’s distribution and servicing costs paid to a financial intermediary. BlackRock may increase or decrease the level of fee waivers in future periods.

Separate Account Assets and Liabilities. Separate account assets are maintained by BlackRock Life Limited, a wholly owned subsidiary of the Company, which is a registered life insurance company in the United Kingdom, and represent segregated assets held for purposes of funding individual and group pension contracts. The life insurance company does not underwrite any insurance contracts that involve any insurance risk transfer from the insured to the life insurance company. The separate account assets primarily include equity securities, debt securities, money market funds and derivatives. The separate account assets are not subject to general claims of the creditors of BlackRock. These separate account assets and the related equal and offsetting liabilities are recorded as separate account assets and separate account liabilities on the consolidated statements of financial condition.

The net investment income attributable to separate account assets supporting individual and group pension contracts accrues directly to the contract owner and is not reported on the consolidated statements of income. While BlackRock has no economic interest in these separate account assets and liabilities, BlackRock earns policy administration and management fees associated with these products, which are included in investment advisory, administration fees and securities lending revenue on the consolidated statements of income.

Separate Account Collateral Assets Held and Liabilities Under Securities Lending Agreements. The Company facilitates securities lending arrangements whereby securities held by separate accounts maintained by BlackRock Life Limited are lent to third parties under global master securities lending agreements. In exchange, the Company receives legal title to the collateral with minimum values generally ranging from approximately 102% to 112% of the value of the securities lent in order to reduce counterparty risk. The required collateral value is calculated on a daily basis. The global master securities lending agreements provide the Company the right to request additional collateral or, in the event of borrower default, the right to liquidate collateral. The securities lending transactions entered into by the Company are accompanied by an agreement that entitles the Company to request the borrower to return the securities at any time; therefore, these transactions are not reported as sales.

The Company records on the consolidated statements of financial condition the cash and noncash collateral received under these BlackRock Life Limited securities lending arrangements as its own asset in addition to an equal and offsetting collateral liability for the obligation to return the collateral. The securities lending revenue earned from lending securities held by the separate accounts is included in investment advisory, administration fees and securities lending revenue on the consolidated statements of income. During 2017 and 2016, the Company had not resold or repledged any of the collateral received under these arrangements. At December 31, 2017 and 2016, the fair value of loaned securities held by separate accounts was approximately \$22.3 billion and \$25.7 billion, respectively, and the fair value of the collateral held under these securities lending agreements was approximately \$24.2 billion and \$27.8 billion, respectively.

Property and Equipment. Property and equipment are recorded at cost less accumulated depreciation. Depreciation is generally determined by cost less any

estimated residual value using the straight-line method over the estimated useful lives of the various classes of property and equipment. Leasehold improvements are amortized using the straight-line method over the shorter of the estimated useful life or the remaining lease term.

BlackRock develops a variety of risk management, investment analytic and investment system services for internal use, utilizing proprietary software that is hosted and maintained by BlackRock. The Company capitalizes certain costs incurred in connection with developing or obtaining software for internal use. Capitalized software costs are included within property and equipment on the consolidated statements of financial condition and are amortized, beginning when the software project is ready for its intended use, over the estimated useful life of the software of approximately three years.

Goodwill and Intangible Assets. Goodwill represents the cost of a business acquisition in excess of the fair value of the net assets acquired. The Company has determined that it has one reporting unit for goodwill impairment testing purposes, the consolidated BlackRock single operating segment, which is consistent with internal management reporting and management's oversight of operations. In its assessment of goodwill for impairment, the Company considers such factors as the book value and market capitalization of the Company.

On a quarterly basis, the Company considers if triggering events have occurred that may indicate a potential goodwill impairment. If a triggering event has occurred, the Company performs assessments, which may include reviews of significant valuation assumptions, to determine if goodwill may be impaired. The Company performs an impairment assessment of its goodwill at least annually as of July 31st.

Intangible assets are comprised of indefinite-lived intangible assets and finite-lived intangible assets acquired in a business acquisition. The value of contracts to manage assets in proprietary open-end funds and collective trust funds and certain other commingled products without a specified termination date is generally classified as indefinite-lived intangible assets. The assignment of indefinite lives to such contracts primarily is based upon the following: (i) the assumption that there is no foreseeable limit on the contract period to manage these products; (ii) the Company expects to, and has the ability to, continue to operate these products indefinitely; (iii) the products have multiple investors and are not reliant on a single investor or small group of investors for their continued operation; (iv) current competitive factors and economic conditions do not indicate a finite life; and (v) there is a high likelihood of continued renewal based on historical experience. In addition, trade names/trademarks are considered indefinite-lived intangible assets when they are expected to generate cash flows indefinitely.

Indefinite-lived intangible assets and goodwill are not amortized. Finite-lived management contracts, which relate to acquired separate accounts and funds and investor/customer relationships with a specified termination date, are amortized over their remaining useful lives.

The Company performs assessments to determine if any intangible assets are potentially impaired and whether the indefinite-lived and finite-lived classifications are still appropriate. The carrying value of finite-lived assets and their remaining useful lives are reviewed at least annually to

determine if circumstances exist which may indicate a potential impairment or revisions to the amortization period. The Company performs impairment assessments of all of its intangible assets at least annually, as of July 31st.

In evaluating whether it is more likely than not that the fair value of indefinite-lived intangibles is less than its carrying value, BlackRock assesses various significant qualitative factors, including assets under management ("AUM"), revenue basis points, projected AUM growth rates, operating margins, tax rates and discount rates. In addition, the Company considers other factors, including

(i) macroeconomic conditions such as a deterioration in general economic conditions, limitations on accessing capital, fluctuations in foreign exchange rates, or other developments in equity and credit markets; (ii) industry and market considerations such as a deterioration in the environment in which the entity operates, an increased competitive environment, a decline in market-dependent multiples or metrics, a change in the market for an entity's services, or regulatory, legal or political developments; and (iii) entity-specific events, such as a change in management or key personnel, overall financial performance and litigation that could affect significant inputs used to determine the fair value of the indefinite-lived intangible asset. If an indefinite-lived intangible is determined to be more likely than not impaired, then the fair value of the asset is compared with its carrying value and any excess of the carrying value over the fair value would be recognized as an expense in the period in which the impairment occurs.

For finite-lived intangible assets, if potential impairment circumstances are considered to exist, the Company will perform a recoverability test using an undiscounted cash flow analysis. Actual results could differ from these cash flow estimates, which could materially impact the impairment conclusion. If the carrying value of the asset is determined not to be recoverable based on the undiscounted cash flow test, the difference between the carrying value of the asset and its current fair value would be recognized as an expense in the period in which the impairment occurs.

Noncontrolling Interests. The Company reports noncontrolling interests as equity, separate from the parent's equity, on the consolidated statements of financial condition. In addition, the Company's consolidated net income on the consolidated statements of income includes the income (loss) attributable to noncontrolling interest holders of the Company's consolidated investment products. Income (loss) attributable to noncontrolling interests is not adjusted for income taxes for consolidated investment products that are treated as pass-through entities for tax purposes.

Classification and Measurement of Redeemable Securities. The Company includes redeemable noncontrolling interests related to certain consolidated investment products in temporary equity on the consolidated statements of financial condition.

Treasury Stock. The Company records common stock purchased for treasury at cost. At the date of subsequent reissuance, the treasury stock account is reduced by the cost of such stock using the average cost method.

Revenue Recognition

Investment Advisory, Administration Fees and Securities Lending Revenue. Investment advisory and administration

fees are recognized as the services are performed. Such fees are primarily based on agreed-upon percentages of the net asset value of AUM or committed capital. Investment advisory and administration fees are affected by changes in AUM, including market appreciation or depreciation, foreign exchange translation and net inflows or outflows. Investment advisory and administration fees for investment funds are shown net of fees waived pursuant to contractual expense limitations of the funds or voluntary waivers.

The Company contracts with third parties and related parties for various mutual fund distribution and shareholder servicing to be performed on behalf of certain funds the Company manages. Such arrangements generally are priced as a portion of the fee paid by the fund. In certain cases, the fund (primarily international funds) takes on the primary responsibility for payment for services such that the Company bears no credit risk to the third-party. The Company currently records its management fees net of retrocessions.

The Company also earns revenue by lending securities as an agent on behalf of clients, primarily to brokerage institutions. Revenue is accounted for on an accrual basis. Generally, the fees generated from securities lending activities are shared between the Company and the funds or other third-party accounts managed by the Company from which the securities are borrowed.

Investment Advisory Performance Fees / Carried Interest. The Company receives investment advisory performance fees or incentive allocations from certain actively managed investment funds and certain separately managed accounts. These performance fees are dependent upon exceeding specified relative or absolute investment return thresholds. Such fees are recorded upon completion of the measurement period, which varies by product or account, and could be monthly, quarterly, annually or longer.

In addition, the Company is allocated carried interest from certain alternative investment products upon exceeding performance thresholds. BlackRock may be required to reverse/return all, or part, of such carried interest allocations depending upon future performance of these funds. Therefore, BlackRock records carried interest subject to such clawback provisions in investments/investments of consolidated VIEs or cash/cash of consolidated VIEs to the extent that it is distributed, on its consolidated statements of financial condition. Carried interest is recorded as performance fee revenue upon the earlier of the termination of the investment fund or when the likelihood of clawback is considered mathematically improbable.

The Company records a deferred carried interest liability to the extent it receives cash or capital allocations related to carried interest prior to meeting the revenue recognition criteria. At December 31, 2017 and 2016, the Company had \$219 million and \$152 million, respectively, of deferred carried interest recorded in other liabilities/other liabilities of consolidated VIEs on the consolidated statements of financial condition. A portion of the deferred carried interest liability will be paid to certain employees. The ultimate timing of the recognition of performance fee revenue, if any, for these products is unknown.

Technology and risk management revenue. BlackRock offers investment management technology systems, risk management services, wealth management and digital distribution tools on a fee basis. Clients include banks,

insurance companies, official institutions, pension funds, asset managers, retail distributors and other investors. Fees earned for technology and risk management revenue are recorded as services are performed and are generally determined using the value of positions on the *Aladdin* platform or on a fixed-rate basis.

Advisory and other revenue. Advisory and other revenue primarily includes fees earned for advisory services, fees earned for transition management services primarily comprised of commissions recognized in connection with buying and selling securities on behalf of customers, and equity method investment earnings related to certain strategic investments.

Fees earned for advisory services are determined using fixed-rate fees, and recorded upon delivery.

Commissions related to transition management services are recorded on a trade-date basis as securities transactions occur.

Stock-based Compensation. In March 2016, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2016-09, *Improvements to Employee Share-Based Payment Accounting* (“ASU 2016-09”). ASU 2016-09 simplifies accounting for employee share-based payment transactions, including the accounting for income taxes, forfeitures, and statutory tax withholding requirements, as well as classification in the consolidated statements of cash flows. The Company adopted ASU 2016-09 as of January 1, 2017. ASU 2016-09 requires all excess tax benefits and deficiencies to be recognized in income tax expense on the consolidated statements of income. Accordingly, the Company recorded a discrete income tax benefit of \$151 million during 2017 for vested restricted stock units where the grant date stock price was lower than the vesting date stock price. The new guidance will increase the volatility of income tax expense as a result of fluctuations in the Company’s stock price. Upon adoption, the Company elected to account for forfeitures as they occur, which did not have a material impact on the consolidated financial statements. In addition, the Company elected to present excess tax benefits and deficiencies prospectively in operating activities on the consolidated statements of cash flows.

Entities are required to measure the cost of employee services received in exchange for an award of equity instruments based on the grant-date fair value of the award. The compensation cost is recognized over the period during which an employee is required to provide service (usually the vesting period) in exchange for the stock-based award.

The Company measures the grant-date fair value of restricted stock units (“RSUs”) using the Company’s share price on the date of grant. For employee share options and instruments with market conditions, the Company uses pricing models. Stock option awards may have performance, market and/or service conditions. If an equity award is modified after the grant-date, incremental compensation cost is recognized for an amount equal to the excess of the fair value of the modified award over the fair value of the original award immediately before the modification. Awards under the Company’s stock-based compensation plans vest over various periods. Compensation cost is recorded by the Company on a straight-line basis over the requisite service period for each separate vesting portion of the award as if

the award is, in-substance, multiple awards. Compensation cost was reduced by the number of awards forfeited prior to vesting.

The Company amortizes the grant-date fair value of stock-based compensation awards made to retirement-eligible employees over the requisite service period. Upon notification of retirement, the Company accelerates the unamortized portion of the award over the contractually required retirement notification period.

Distribution and Servicing Costs. Distribution and servicing costs include payments to third parties, primarily associated with distribution and servicing of client investments in certain BlackRock products. Distribution and servicing costs are expensed when incurred.

Direct Fund Expense. Direct fund expense, which is expensed as incurred, primarily consists of third-party nonadvisory expense incurred by BlackRock related to certain funds for the use of certain index trademarks, reference data for certain indices, custodial services, fund administration, fund accounting, transfer agent services, shareholder reporting services, audit and tax services as well as other fund-related expense directly attributable to the nonadvisory operations of the fund.

Leases. The Company accounts for its office facilities leases as operating leases, which may include escalation clauses. The Company expenses the lease payments associated with operating leases evenly during the lease term (including rent-free periods) commencing when the Company obtains the right to control the use of the leased property.

Foreign Exchange. Foreign currency transactions are recorded at the exchange rates prevailing on the dates of the transactions. Monetary assets and liabilities that are denominated in foreign currencies are subsequently remeasured into the functional currencies of the Company’s subsidiaries at the rates prevailing at each balance sheet date. Gains and losses arising on remeasurement are included in general and administration expense on the consolidated statements of income. Revenue and expenses are translated at average exchange rates during the period. Gains or losses resulting from translating foreign currency financial statements into U.S. dollars are included in accumulated other comprehensive income, a separate component of stockholders’ equity, on the consolidated statements of financial condition.

Income Taxes. Deferred income tax assets and liabilities are recognized for the future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases using currently enacted tax rates in effect for the year in which the differences are expected to reverse. The effect of a change in tax rates on deferred income tax assets and liabilities is recognized on the consolidated statements of income in the period that includes the enactment date.

Management periodically assesses the recoverability of its deferred income tax assets based upon expected future earnings, taxable income in prior carryback years, future deductibility of the asset, changes in applicable tax laws and other factors. If management determines that it is not more likely than not that the deferred tax asset will be fully recoverable in the future, a valuation allowance will be established for the difference between the asset balance

and the amount expected to be recoverable in the future. This allowance will result in additional income tax expense. Further, the Company records its income taxes receivable and payable based upon its estimated income tax position.

In 2017, excess tax benefits related to stock-based compensation were recognized as an income tax benefit on the consolidated statements of income and are reflected as operating cash flows on the consolidated statements of cash flows. For prior year periods, excess tax benefits were recognized as additional paid-in capital and financing cash flows.

Earnings per Share (“EPS”). Basic EPS is calculated by dividing net income applicable to common shareholders by the weighted-average number of shares outstanding during the period. Diluted EPS includes the determinants of basic EPS and common stock equivalents outstanding during the period. Diluted EPS is computed using the treasury stock method.

Due to the similarities in terms between BlackRock’s nonvoting participating preferred stock and the Company’s common stock, the Company considers its nonvoting participating preferred stock to be a common stock equivalent for purposes of EPS calculations. As such, the Company has included the outstanding nonvoting participating preferred stock in the calculation of average basic and diluted shares outstanding.

Business Segments. The Company’s management directs BlackRock’s operations as one business, the asset management business. The Company utilizes a consolidated approach to assess performance and allocate resources. As such, the Company operates in one business segment as defined in ASC 280-10, *Segment Reporting* (“ASC 280-10”).

Fair Value Measurements

Hierarchy of Fair Value Inputs. The Company uses a fair value hierarchy that prioritizes inputs to valuation approaches used to measure fair value. The fair value hierarchy gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. Assets and liabilities measured and reported at fair value are classified and disclosed in one of the following categories:

Level 1 Inputs:

Quoted prices (unadjusted) in active markets for identical assets or liabilities at the reporting date.

- Level 1 assets may include listed mutual funds, ETFs, listed equities and certain exchange-traded derivatives.

Level 2 Inputs:

Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities that are not active; quotes from pricing services or brokers for which the Company can determine that orderly transactions took place at the quoted price or that the inputs used to arrive at the price are observable; and inputs other than quoted prices that are observable, such as models or other valuation methodologies.

- Level 2 assets may include debt securities, investments in CLOs, short-term floating-rate notes, asset-backed securities, securities held within consolidated hedge funds, restricted public securities valued at a discount,

as well as over-the-counter derivatives, including interest and inflation rate swaps and foreign currency exchange contracts that have inputs to the valuations that generally can be corroborated by observable market data.

Level 3 Inputs:

Unobservable inputs for the valuation of the asset or liability, which may include nonbinding broker quotes. Level 3 assets include investments for which there is little, if any, market activity. These inputs require significant management judgment or estimation.

- Level 3 assets may include direct private equity investments held within consolidated funds and investments in CLOs.
- Level 3 liabilities include contingent liabilities related to acquisitions valued based upon discounted cash flow analyses using unobservable market data.

Significance of Inputs. The Company’s assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the financial instrument.

Valuation Approaches. The fair values of certain Level 3 assets and liabilities were determined using various valuation approaches as appropriate, including third-party pricing vendors, broker quotes and market and income approaches. Such quotes and modeled prices are evaluated for reasonableness through various procedures, including due diligence reviews of third-party pricing vendors, variance analyses, consideration of the current market environment and other analytical procedures.

A significant number of inputs used to value equity, debt securities and investments in CLOs is sourced from third-party pricing vendors. Generally, prices obtained from pricing vendors are categorized as Level 1 inputs for identical securities traded in active markets and as Level 2 for other similar securities if the vendor uses observable inputs in determining the price. Annually, BlackRock’s internal valuation committee or other designated groups review both the valuation approaches, including the general assumptions and methods used to value various asset classes, and operational processes with these vendors. On a quarterly basis, meetings are held with key vendors to identify any significant changes to the vendors’ processes.

In addition, quotes obtained from brokers generally are nonbinding and categorized as Level 3 inputs. However, if the Company is able to determine that market participants have transacted for the asset in an orderly manner near the quoted price or if the Company can determine that the inputs used by the broker are observable, the quote is classified as a Level 2 input.

Investments Measured at Net Asset Values. As a practical expedient, the Company uses net asset value (“NAV”) as the fair value for certain investments. The inputs to value these investments may include BlackRock capital accounts for its partnership interests in various alternative investments, including hedge funds, real assets and private equity funds, which may be adjusted by using the returns of certain market indices. The various partnerships generally are investment companies, which record their underlying investments at fair value based on fair value policies established by management of the underlying fund. Fair

value policies at the underlying fund generally require the fund to utilize pricing/valuation information from third-party sources, including independent appraisals. However, in some instances, current valuation information for illiquid securities or securities in markets that are not active may not be available from any third-party source or fund management may conclude that the valuations that are available from third-party sources are not reliable. In these instances, fund management may perform model-based analytical valuations that could be used as an input to value these investments.

Derivative Instruments and Hedging Activities. The Company does not use derivative financial instruments for trading or speculative purposes. The Company uses derivative financial instruments primarily for purposes of hedging exposures to fluctuations in foreign currency exchange rates of certain assets and liabilities, and market exposures for certain seed investments. However, certain consolidated sponsored investment funds may also utilize derivatives as a part of their investment strategy.

Changes in the fair value of the Company's derivative financial instruments are recognized in earnings and, where applicable, are offset by the corresponding gain or loss on the related foreign-denominated assets or liabilities or hedged investments, on the consolidated statements of income.

The Company may also use financial instruments designated as net investment hedges for accounting purposes to hedge net investments in international subsidiaries whose functional currency is not U.S. dollars. The gain or loss from revaluing accounting hedges of net investments in foreign operations at the spot rate is deferred and reported within accumulated other comprehensive income on the consolidated statements of financial condition. The Company reassesses the effectiveness of its net investment hedge on a quarterly basis.

Recent Accounting Pronouncements Not Yet Adopted in 2017

Revenue from Contracts with Customers. In May 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers* ("ASU 2014-09"). ASU 2014-09 outlines a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers and supersedes most current revenue recognition guidance, including industry-specific guidance. The guidance also changes the accounting for certain contract costs and revises the criteria for determining if an entity is acting as a principal or agent in certain arrangements.

The key changes in the standard that impact the Company's revenue recognition relate to the presentation of certain revenue contracts and associated contract costs. The most significant of these changes relates to the presentation of certain distribution costs, which are currently presented net against revenues (contra-revenue) and will be presented as an expense on a gross basis. The Company adopted ASU 2014-09 effective January 1, 2018 on a full retrospective basis, which will require 2016 and 2017 to be restated in future filings. The cumulative effect adjustment to the 2016 opening retained earnings was not material. The Company currently expects the net gross up to revenue to be approximately \$1 billion with a corresponding gross up to expense for both 2016 and 2017.

Recognition and Measurement of Financial Instruments. In January 2016, the FASB issued ASU 2016-01, *Recognition and Measurement of Financial Assets and Financial Liabilities* ("ASU 2016-01"). ASU 2016-01 amends guidance on the classification and measurement of financial instruments, including significant revisions in accounting related to the classification and measurement of investments in certain equity securities. ASU 2016-01 also amends certain disclosure requirements associated with the fair value of financial instruments. The reclassification of unrealized gains (losses) on equity securities within accumulated other comprehensive income to retained earnings was not material upon adoption effective January 1, 2018.

Leases. In February 2016, the FASB issued ASU 2016-02, *Leases* ("ASU 2016-02"), which requires lessees to recognize assets and liabilities arising from most operating leases on the consolidated statements of financial condition. The Company expects to record assets and liabilities for its current operating leases upon adoption of ASU 2016-02 and does not expect the adoption to have a material impact on its results of operations or cash flows. ASU 2016-02 is effective for the Company on January 1, 2019, and the Company intends to apply the practical expedients allowed by the standard upon transition.

Cash Flow Classification. In August 2016, the FASB issued ASU 2016-15, *Classification of Certain Cash Receipts and Cash Payments* ("ASU 2016-15"), which amends and clarifies the current guidance to reduce diversity in practice of the classification of certain cash receipts and payments in the consolidated statements of cash flows. The Company does not expect the adoption of ASU 2016-15 to have a material impact on its consolidated statement of cash flows. ASU 2016-15 is effective for the Company on January 1, 2018. The Company must apply the guidance retrospectively to all periods presented.

3. Investments

A summary of the carrying value of total investments is as follows:

<i>(in millions)</i>	December 31, 2017	December 31, 2016
Available-for-sale investments	\$ 103	\$ 80
Held-to-maturity investments	102	51
Trading investments:		
Consolidated sponsored investment funds:		
Debt securities	267	246
Equity securities	245	219
Other equity and debt securities	267	101
Deferred compensation plan mutual funds	56	59
Total trading investments	835	625
Other investments:		
Equity method investments ⁽¹⁾	816	730
Cost method investments ⁽²⁾	93	91
Carried interest ⁽³⁾	32	18
Total other investments	941	839
Total investments	\$ 1,981	\$ 1,595

(1) Equity method investments primarily include BlackRock's direct investments in certain BlackRock sponsored investment funds.

- (2) Amounts include nonmarketable securities, primarily Federal Reserve Bank stock, which is held for regulatory purposes and is restricted from sale. At December 31, 2017 and 2016, there were no indicators of impairment on these investments.
- (3) Carried interest of consolidated sponsor investment funds accounted for as voting rights entities ("VREs") represents allocations to BlackRock's general partner capital accounts from certain funds. These balances are subject to change upon cash distributions, additional allocations or reallocations back to limited partners within the respective funds.

Available-for-Sale Investments

At both December 31, 2017 and 2016, available-for-sale investments primarily included certain investments in BlackRock sponsored CLOs and seed investments in BlackRock sponsored mutual funds. The cost of these investments approximated carrying value.

A summary of sale activity of available-for-sale securities during 2017, 2016 and 2015 is shown below.

(in millions)	Year ended December 31,		
	2017	2016	2015
Sales proceeds	\$ —	\$ 40	\$ 36
Net realized gain (loss):			
Gross realized gains	\$ —	\$ 2	\$ 3
Gross realized losses	—	(1)	(1)
Net realized gain (loss)	\$ —	\$ 1	\$ 2

Held-to-Maturity Investments

The carrying value of held-to-maturity investments was \$102 million and \$51 million at December 31, 2017 and 2016, respectively. Held-to-maturity investments included foreign government debt held primarily for regulatory purposes and certain investments in BlackRock sponsored CLOs. The amortized cost (carrying value) of these investments approximated fair value. At December 31, 2017, \$11 million of these investments mature between five years to ten years and \$91 million mature after ten years.

Trading Investments

A summary of the cost and carrying value of trading investments is as follows:

(in millions)	December 31, 2017		December 31, 2016	
	Cost	Carrying Value	Cost	Carrying Value
Trading investments:				
Deferred compensation plan mutual funds	\$ 34	\$ 56	\$ 41	\$ 59
Equity securities/multi-asset mutual funds	446	493	290	308
Debt securities/fixed income mutual funds:				
Corporate debt	152	157	128	128
Government debt	72	73	60	60
Asset/mortgage backed debt	56	56	70	70
Total trading investments	\$ 760	\$ 835	\$ 589	\$ 625

4. Consolidated Voting Rights Entities

The Company consolidates certain sponsored investment funds accounted for as VREs because it is deemed to control such funds. The investments owned by these consolidated VREs are classified as trading investments. The following table presents the balances related to these consolidated VREs that were recorded on the consolidated statements of financial condition, including BlackRock's net interest in these funds:

(in millions)	December 31, 2017	December 31, 2016
Cash and cash equivalents	\$ 63	\$ 53
Investments	512	465
Other assets	13	15
Other liabilities	(37)	(50)
Noncontrolling interests	(91)	(39)
BlackRock's net interests in consolidated VREs	\$ 460	\$ 444

BlackRock's total exposure to consolidated VREs represents the value of its economic ownership interest in these sponsored investment funds. Valuation changes associated with investments held at fair value by these consolidated VREs are reflected in nonoperating income (expense) and partially offset in net income (loss) attributable to noncontrolling interests for the portion not attributable to BlackRock.

The Company cannot readily access cash and cash equivalents held by consolidated VREs to use in its operating activities.

5. Variable Interest Entities

In the normal course of business, the Company is the manager of various types of sponsored investment vehicles, which may be considered VIEs. The Company may from time to time own equity or debt securities or enter into derivatives with the vehicles, each of which are considered variable interests. The Company's involvement in financing the operations of the VIEs is generally limited to its investments in the entity. The Company consolidates entities when it is determined to be the PB. See Note 2, *Significant Accounting Policies*, for further information on the Company's accounting policy on consolidation.

Consolidated VIEs. The Company's consolidated VIEs include certain sponsored investment funds in which BlackRock has an investment and as the investment manager, is deemed to have both the power to direct the most significant activities of the funds and the right to receive benefits (or the obligation to absorb losses) that could potentially be significant to these sponsored investment funds. The assets of these VIEs are not available to creditors of the Company. In addition, the investors in these VIEs have no recourse to the credit of the Company.

Consolidated VIE assets and liabilities are presented after intercompany eliminations at December 31, 2017 and 2016 in the following table:

<i>(in millions)</i>	December 31, 2017	December 31, 2016
Assets of consolidated VIEs:		
Cash and cash equivalents	\$ 144	\$ 84
Investments:		
Trading investments	915	552
Other investments	578	456
Other assets	66	63
Total investments and other assets	1,559	1,071
Liabilities of consolidated VIEs	(369)	(216)
Noncontrolling interests	(375)	(207)
BlackRock's net interests in consolidated VIEs	\$ 959	\$ 732

Net gain (loss) related to consolidated VIEs is presented in the following table:

<i>(in millions)</i>	2017	2016	2015
Nonoperating net gain (loss) on consolidated VIEs	\$ 118	\$ 16	\$ 58
Net gain (loss) attributable to NCI on consolidated VIEs	\$ 33	\$ (2)	\$ 6

Non-Consolidated VIEs. At December 31, 2017 and 2016, the Company's carrying value of assets and liabilities included on the consolidated statements of financial condition pertaining to nonconsolidated VIEs and its maximum risk of loss related to VIEs for which it held a variable interest, but for which it was not the PB, was as follows:

<i>(in millions)</i>	Investments	Advisory Fee Receivables	Other Net Assets (Liabilities)	Maximum Risk of Loss ⁽¹⁾
At December 31, 2017				
Sponsored investment products	\$ 263	\$ 15	\$ (7)	\$ 295
At December 31, 2016				
Sponsored investment products	\$ 171	\$ 9	\$ (8)	\$ 197

(1) At December 31, 2017 and 2016, BlackRock's maximum risk of loss associated with these VIEs primarily related to BlackRock's investments and collecting advisory fee receivables.

The net assets of sponsored investment products that are nonconsolidated VIEs approximated \$5 billion and \$4 billion at December 31, 2017 and 2016, respectively.

6. Fair Value Disclosures

Fair Value Hierarchy

Assets and liabilities measured at fair value on a recurring basis and other assets not held at fair value

December 31, 2017 (in millions)	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Investments Measured at NAV ⁽¹⁾	Other Assets Not Held at Fair Value ⁽²⁾	December 31, 2017

(1) Amounts are comprised of certain investments measured at fair value using NAV (or its equivalent) as a practical expedient.

(2) Amounts are comprised of investments held at cost or amortized cost, carried interest and certain equity method investments, which include sponsored investment funds and other assets, which are not accounted for under a fair value measure. In accordance with GAAP, certain equity method investees do not account for both their financial assets and liabilities under fair value measures; therefore, the Company's investment in such equity method investees may not represent fair value.

(3) Level 3 amounts primarily include direct investments in private equity companies held by private equity funds.

(4) Amounts primarily include contingent liabilities related to certain acquisitions (see Note 13, *Commitments and Contingencies*, for more information).

Other liabilities ⁽⁴⁾	—	7	115	—	—	122
Total	\$ 22,173	\$ 5,626	\$115	\$ —	\$ —	\$ 27,914

(1) Amounts are comprised of certain investments measured at fair value using NAV (or its equivalent) as a practical expedient.

(2) Amounts are comprised of investments held at cost or amortized cost, carried interest and certain equity method investments, which include sponsored investment funds and other assets, which are not accounted for under a fair value measure. In accordance with GAAP, certain equity method investees do not account for both their financial assets and liabilities under fair value measures; therefore, the Company's investment in such equity method investees may not represent fair value.

(3) Level 3 amounts include direct investments in private equity companies held by private equity funds.

(4) Amounts primarily include contingent liabilities related to certain acquisitions (see Note 13, *Commitments and Contingencies*, for more information).

Level 3 Assets. Level 3 investments of consolidated VIEs of \$116 million and \$112 million at December 31, 2017 and 2016, respectively, related to direct investments in private equity companies held by consolidated private equity funds.

Direct investments in private equity companies may be valued using the market approach or the income approach, or a combination thereof, and were valued based on an assessment of each underlying investment, incorporating evaluation of additional significant third-party financing, changes in valuations of comparable peer companies, the business environment of the companies, market indices, assumptions relating to appropriate risk adjustments for nonperformance and legal restrictions on disposition, among other factors. The fair value derived from the methods used is evaluated and weighted, as appropriate, considering the reasonableness of the range of values indicated. Under the market approach, fair value may be determined by reference to multiples of market-comparable companies or transactions, including earnings before interest, taxes, depreciation and amortization (“EBITDA”) multiples. Under the income approach, fair value may be determined by discounting the expected cash flows to a single present value amount using current expectations about those future

amounts. Unobservable inputs used in a discounted cash flow model may include projections of operating performance generally covering a five-year period and a terminal value of the private equity direct investment. For investments utilizing the discounted cash flow valuation technique, a significant increase (decrease) in the discount rate, risk premium or discount for lack of marketability in isolation could result in a significantly lower (higher) fair value measurement. For investments utilizing the market comparable companies valuation technique, a significant increase (decrease) in the EBITDA multiple in isolation could result in a significantly higher (lower) fair value measurement.

Level 3 assets may include investments in CLOs valued based on single-broker nonbinding quotes, and direct private equity investments valued using the market approach or the income approach as described above.

Level 3 Liabilities. Level 3 other liabilities primarily include recorded contingent liabilities related to certain acquisitions, which were valued based upon discounted cash flow analyses using unobservable market data inputs.

Changes in Level 3 Assets and Liabilities Measured at Fair Value on a Recurring Basis for 2017

(in millions)	December 31, 2016	Realized and Unrealized Gains (Losses) in Earnings and OCI	Purchases	Sales and Maturities	Issuances and Other Settlements ⁽¹⁾	Transfers into Level 3	Transfers out of Level 3 ⁽²⁾	December 31, 2017	Total Net Unrealized Gains (Losses) Included in Earnings ⁽³⁾

Liabilities:									
Other liabilities ⁽⁵⁾	\$ 115	\$ (10)	\$ —	\$ —	\$ 111	\$ —	\$ —	236	\$ (10)

(1) Issuance and other settlements amount includes \$120 million and \$9 million of contingent liabilities in connection with the acquisition of the equity infrastructure franchise of First Reserve in June 2017 (“First Reserve Transaction”) and the acquisition of Cachematrix in July 2017 (“Cachematrix Transaction”), respectively, offset by contingent liability payments in connection with certain prior acquisitions.

(2) Amounts include transfers out of Level 3 due to availability of observable market inputs from pricing vendors.

(3) Earnings attributable to the change in unrealized gains (losses) relating to assets and liabilities still held at the reporting date.

(4) Amounts include investments in CLOs.

(5) Other liabilities amount includes contingent liabilities in connection with certain acquisitions.

Changes in Level 3 Assets and Liabilities Measured at Fair Value on a Recurring Basis for 2016

(in millions)	December 31, 2015	Realized and Unrealized Gains (Losses) in Earnings and OCI	Purchases	Sales and Maturities	Issuances and Other Settlements ⁽¹⁾	Transfers into Level 3	Transfers out of Level 3 ⁽²⁾	December 31, 2016	Total Net Unrealized Gains (Losses) Included in Earnings ⁽³⁾
Assets:

Liabilities:									
Other liabilities ⁽⁵⁾	\$ 48	\$ 3	\$ —	\$ —	\$ 70	\$ —	\$ —	115	\$ 3

(1) Issuances and other settlements amount includes a contingent liability related to the BofA® Global Capital Management transaction in April 2016.

(2) Amounts include transfers out of Level 3 due to availability of observable market inputs from pricing vendors.

(3) Earnings attributable to the change in unrealized gains (losses) relating to assets and liabilities still held at the reporting date.

(4) Amounts include investments in CLOs.

(5) Other liabilities amount includes contingent liabilities and payments of contingent liabilities in connection with certain acquisitions.

Realized and Unrealized Gains (Losses) for Level 3 Assets and Liabilities. Realized and unrealized gains (losses) recorded for Level 3 assets and liabilities are reported in nonoperating income (expense) on the consolidated statements of income. A portion of net income (loss) for consolidated sponsored investment funds are allocated to noncontrolling interests to reflect net income (loss) not attributable to the Company.

Transfers in and/or out of Levels. Transfers in and/or out of levels are reflected when significant inputs, including market inputs or performance attributes, used for the fair value measurement become observable/unobservable, or when the carrying value of certain equity method investments no longer represents fair value as determined under valuation methodologies.

Disclosures of Fair Value for Financial Instruments Not Held at Fair Value. At December 31, 2017 and 2016, the fair value of the Company's financial instruments not held at fair value are categorized in the table below.

(in millions)	December 31, 2017		December 31, 2016		Fair Value Hierarchy
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value	
Financial Assets:					
Cash and cash equivalents	\$6,894	\$6,894	\$6,091	\$6,091	Level 1 ⁽¹⁾⁽²⁾
Accounts receivable	2,699	2,699	2,115	2,115	Level 1 ⁽³⁾
Cash and cash equivalents of consolidated VIEs	144	144	84	84	Level 1 ⁽¹⁾⁽²⁾
Other assets	70	70	25	25	Level 1 ⁽¹⁾⁽⁴⁾
Financial Liabilities:					
Accounts payable and accrued liabilities	1,161	1,161	880	880	Level 1 ⁽³⁾
Long-term borrowings	5,014	5,225	4,915	5,165	Level 2 ⁽⁵⁾

(1) Cash and cash equivalents are carried at either cost or amortized cost, which approximates fair value due to their short-term maturities.

(2) At December 31, 2017 and 2016, approximately \$163 million and \$132 million of money market funds were recorded within cash and cash equivalents on the consolidated statements of financial condition. In addition, at December 31, 2017 and 2016, approximately \$14 million and \$13 million, respectively, of money market funds were recorded within cash and cash equivalents of consolidated VIEs. Money market funds are valued based on quoted market prices, or \$1.00 per share, which generally is the NAV of the fund.

(3) The carrying amounts of accounts receivable, accounts payable and accrued liabilities approximate fair value due to their short-term nature.

(4) Other assets primarily include restricted cash.

(5) Long-term borrowings are recorded at amortized cost, net of debt issuance costs. The fair value of the long-term borrowings, including the current portion of long-term borrowings, is estimated using market prices at the end of December 2017 and 2016, respectively. See Note 12, *Borrowings*, for the fair value of each of the Company's long-term borrowings.

Investments in Certain Entities that Calculate Net Asset Value Per Share

As a practical expedient to value certain investments that do not have a readily determinable fair value and have attributes of an investment company, the Company uses NAV as the fair value. The following tables list information regarding all investments that use a fair value measurement to account for both their financial assets and financial liabilities in their calculation of a NAV per share (or equivalent).

December 31, 2017

<i>(in millions)</i>	Ref	Fair Value	Total Unfunded Commitments	Redemption Frequency	Redemption Notice Period
Equity method:⁽¹⁾

Total		\$ 551	\$157		

N/R – not redeemable

- (1) Comprised of equity method investments, which include investment companies, which account for their financial assets and most financial liabilities under fair value measures; therefore, the Company's investment in such equity method investees approximates fair value.
- (a) This category includes hedge funds and funds of hedge funds that invest primarily in equities, fixed income securities, distressed credit, opportunistic and mortgage instruments and other third-party hedge funds. The fair values of the investments have been estimated using the NAV of the Company's ownership interest in partners' capital. It was estimated that the investments in the funds that are not subject to redemption will be liquidated over a weighted-average period of seven years at December 31, 2017 and approximately one year at December 31, 2016.
- (b) This category includes several private equity funds that initially invest in nonmarketable securities of private companies, which ultimately may become public in the future. The fair values of these investments have been estimated using capital accounts representing the Company's ownership interest in the funds as well as other performance inputs. The Company's investment in each fund is not subject to redemption and is normally returned through distributions as a result of the liquidation of the underlying assets of the private equity funds. It was estimated that the investments in these funds will be liquidated over a weighted-average period of approximately six years and five years at December 31, 2017 and 2016, respectively.
- (c) This category includes several real assets funds that invest directly in real estate, real estate related assets and infrastructure. The fair values of the investments have been estimated using capital accounts representing the Company's ownership interest in the funds. The Company's investments that are not subject to redemption or are not currently redeemable are normally returned through distributions as a result of the liquidation of the underlying assets of the funds. It is estimated that the investments in these funds not subject to redemptions will be liquidated over a weighted-average period of approximately eight years and six years at December 31, 2017 and 2016, respectively. The total remaining unfunded commitments to other third-party funds were \$117 million and \$56 million at December 31, 2017 and December 31, 2016, respectively. The Company had contractual obligations to the consolidated funds of \$98 million at December 31, 2017 and \$56 million at December 31, 2016.
- (d) This category includes the underlying third-party private equity funds within consolidated BlackRock sponsored private equity funds of funds. The fair values of the investments in the third-party funds have been estimated using capital accounts representing the Company's ownership interest in each fund in the portfolio as well as other performance inputs. These investments are not subject to redemption; however, for certain funds, the

Company may sell or transfer its interest, which may need approval by the general partner of the underlying funds. Due to the nature of the investments in this category, the Company reduces its investment by distributions that are received through the realization of the underlying assets of the funds. It is estimated that the underlying assets of these funds will be liquidated over a weighted-average period of approximately five years at both December 31, 2017 and 2016. The total remaining unfunded commitments to other third-party funds were \$20 million and \$16 million at December 31, 2017 and 2016, respectively. The Company had contractual obligations to the consolidated funds of \$23 million and \$24 million at December 31, 2017 and 2016, respectively.

7. Derivatives and Hedging

The Company maintains a program to enter into swaps to hedge against market price and interest rate exposures with respect to certain seed investments in sponsored investment products. At December 31, 2017, the Company had outstanding total return swaps with an aggregate notional value of approximately \$587 million. At December 31, 2016, the Company had outstanding total return swaps and interest rate swaps with aggregate notional values of approximately \$572 million and \$42 million, respectively.

Gains (losses) on total return swaps are recorded in nonoperating income (expense) and were \$(118) million, \$(31) million and \$11 million for 2017, 2016 and 2015, respectively.

Gains (losses) on the interest rate swaps are recorded in nonoperating income (expense) and were not material for 2017, 2016 and 2015.

The Company has entered into a derivative, providing credit protection to a counterparty of approximately \$17 million, representing the Company's maximum risk of loss with respect to the provision of credit protection. The Company carries the derivative at fair value based on the expected discounted future cash outflows under the arrangement.

The Company executes forward foreign currency exchange contracts to mitigate the risk of certain foreign exchange movements. At December 31, 2017 and 2016, the Company had outstanding forward foreign currency exchange contracts with aggregate notional values of approximately \$1.5 billion and \$107 million, respectively. Gains (losses) on the forward foreign currency exchange contracts are recorded in other general and administration expense and were \$63 million for 2017. Gains (losses) on the forward foreign currency exchange contracts were not material to the consolidated statements of income for 2016 and 2015.

The Company consolidates certain sponsored investment funds, which may utilize derivative instruments as a part of the funds' investment strategies. The change in fair value of such derivatives, which is recorded in nonoperating income (expense), was not material for 2017, 2016 and 2015.

The fair value of the outstanding derivatives mentioned above were not material to the consolidated statements of financial condition at December 31, 2017 and 2016.

See Note 12, *Borrowings*, for more information on the Company's net investment hedge.

8. Property and Equipment

Property and equipment consists of the following:

(in millions)	Estimated useful life-in years	December 31,	
		2017	2016
Property and equipment:			
Land	N/A	\$ 6	\$ 6
Building	39	33	33
Building improvements	15	29	29
Leasehold improvements	1-15	504	476
Equipment and computer software	3	444	411
Other transportation equipment	10	134	135
Furniture and fixtures	7	67	65
Construction in progress	N/A	33	5
Total		1,250	1,160
Less: accumulated depreciation and amortization		658	601
Property and equipment, net		\$ 592	\$ 559

N/A – Not Applicable

Qualifying software costs of approximately \$60 million, \$50 million and \$48 million have been capitalized within equipment and computer software during 2017, 2016 and 2015, respectively, and are being amortized over an estimated useful life of three years.

Depreciation and amortization expense was \$132 million, \$124 million and \$115 million for 2017, 2016 and 2015, respectively.

9. Goodwill

Goodwill activity during 2017 and 2016 was as follows:

(in millions)	2017	2016
Beginning of year balance	\$13,118	\$13,123
Acquisitions ⁽¹⁾	121	14
Goodwill adjustments related to Quellos ⁽²⁾	(19)	(19)
End of year balance	\$13,220	\$13,118

(1) In 2017, the \$121 million increase includes \$91 million of goodwill related to the First Reserve Transaction, which expanded the Company's energy and power infrastructure platform and \$30 million of goodwill related to the Cachematrix Transaction, which enhanced the Company's technology and cash management capabilities. The total consideration paid for the First Reserve Transaction was approximately \$193 million, including \$120 million of contingent consideration at fair value at time of close. The total consideration paid for the Cachematrix Transaction was approximately \$38 million, including \$9 million of contingent consideration at fair value at time

of close. In 2016, the \$14 million increase represents goodwill from the BofA Global Capital Management transaction in April 2016 that transferred investment management responsibilities of approximately \$80.6 billion of cash assets under management to the Company. Total consideration included \$75 million of contingent consideration at fair value at time of close. BlackRock's platform provides clients with broad access to high quality, global liquidity investment solutions.

- (2) The decrease in goodwill during both 2017 and 2016 resulted from a decline related to tax benefits realized from tax-deductible goodwill in excess of book goodwill from the acquisition of the fund-of-funds business of Quellos Group, LLC in October 2007 (the "Quellos Transaction"). Goodwill related to the Quellos Transaction will continue to be reduced in future periods by the amount of tax benefits realized from tax-deductible goodwill in excess of book goodwill from the Quellos Transaction. The balance of the Quellos

tax-deductible goodwill in excess of book goodwill was approximately \$168 million and \$200 million at December 31, 2017 and 2016, respectively.

BlackRock assessed its goodwill for impairment as of July 31, 2017, 2016 and 2015 and considered such factors as the book value and the market capitalization of the Company. The impairment assessment indicated no impairment charges were required. The Company continues to monitor its book value per share compared with closing prices of its common stock for potential indicators of impairment. At December 31, 2017, the Company's common stock closed at a market price of \$513.71, which exceeded its book value of approximately \$197.61 per share.

10. Intangible Assets

Intangible assets at December 31, 2017 and 2016 consisted of the following:

<i>(in millions)</i>	Remaining Weighted- Average Estimated Useful Life	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
At December 31, 2017				
Indefinite-lived intangible assets:				
Management contracts	N/A	\$ 15,769	\$ —	\$ 15,769
Trade names / trademarks	N/A	1,403	—	1,403
License	N/A	6	—	6
Total indefinite-lived intangible assets		17,178	—	17,178
Finite-lived intangible assets:				
Management contracts	5.3	379	212	167
Investor/customer relationships	11.2	45	2	43
Intellectual property	0.6	6	5	1
Total finite-lived intangible assets	6.5	430	219	211
Total intangible assets		\$ 17,608	\$ 219	\$ 17,389
At December 31, 2016				
Indefinite-lived intangible assets:				
Management contracts	N/A	\$ 15,769	\$ —	\$ 15,769
Trade names / trademarks	N/A	1,403	—	1,403
License	N/A	6	—	6
Total indefinite-lived intangible assets		17,178	—	17,178
Finite-lived intangible assets:				
Management contracts	3.9	1,011	827	184
Intellectual property	1.6	6	5	1
Total finite-lived intangible assets	3.8	1,017	832	185
Total intangible assets		\$ 18,195	\$ 832	\$ 17,363

N/A – Not Applicable

The impairment tests performed for intangible assets as of July 31, 2017, 2016 and 2015 indicated no impairment charges were required.

Estimated amortization expense for finite-lived intangible assets for each of the five succeeding years is as follows:

<i>(in millions)</i>	Amount
Year	
2018	\$ 45
2019	44
2020	29
2021	27
2022	18

In 2017, in connection with the First Reserve Transaction, the Company acquired \$70 million of finite-lived management contracts with a weighted-average estimated life of approximately 7.6 years. In addition, in 2017 in connection with the First Reserve and Cachematrix Transactions, the Company acquired \$40 million and \$5 million, respectively, of investor/customer relationships with a weighted-average estimated life of approximately 12 and 10 years, respectively.

In 2016, in connection with the BofA Global Capital Management transaction, the Company acquired \$70 million of indefinite-lived management contracts and \$20 million of finite-lived management contracts with a weighted-average estimated life of approximately 10 years.

11. Other Assets

The Company accounts for its interest in PennyMac as an equity method investment, which is included in other assets on the consolidated statements of financial condition. The carrying value and fair value of the Company's interest (approximately 20% or 16 million shares and non-public units) was approximately \$342 million and \$348 million, respectively, at December 31, 2017 and approximately \$301 million and \$259 million, respectively, at December 31, 2016. The fair value of the Company's interest reflected the PennyMac stock price at December 31, 2017 and 2016, respectively (a Level 1 input). The fair value of the Company's interest in the non-public units held of PennyMac is based on the stock price of the PennyMac public securities at December 31, 2017 and 2016.

12. Borrowings

Short-Term Borrowings

2017 Revolving Credit Facility. The Company's credit facility has an aggregate commitment amount of \$4.0 billion and was amended in April 2017 to extend the maturity date to April 2022 (the "2017 credit facility"). The 2017 credit facility permits the Company to request up to an additional

\$1.0 billion of borrowing capacity, subject to lender credit approval, increasing the overall size of the 2017 credit facility to an aggregate principal amount not to exceed \$5.0 billion. Interest on borrowings outstanding accrues at a rate based on the applicable London Interbank Offered Rate plus a spread. The 2017 credit facility requires the Company not to exceed a maximum leverage ratio (ratio of net debt to earnings before interest, taxes, depreciation and amortization, where net debt equals total debt less unrestricted cash) of 3 to 1, which was satisfied with a ratio of less than 1 to 1 at December 31, 2017. The 2017 credit facility provides back-up liquidity to fund ongoing working capital for general corporate purposes and various investment opportunities. At December 31, 2017, the Company had no amount outstanding under the 2017 credit facility.

Commercial Paper Program. The Company can issue unsecured commercial paper notes (the "CP Notes") on a private-placement basis up to a maximum aggregate amount outstanding at any time of \$4.0 billion. The commercial paper program is currently supported by the 2017 credit facility. At December 31, 2017, BlackRock had no CP Notes outstanding.

Long-Term Borrowings

The carrying value and fair value of long-term borrowings estimated using market prices and foreign exchange rates at December 31, 2017 included the following:

(in millions)	Unamortized Discount and Debt Issuance			
	Maturity Amount	Costs	Carrying Value	Fair Value
5.00% Notes due 2019	\$ 1,000	\$ (1)	\$ 999	\$ 1,051
4.25% Notes due 2021	750	(3)	747	792
3.375% Notes due 2022	750	(4)	746	774
3.50% Notes due 2024	1,000	(6)	994	1,038
1.25% Notes due 2025	841	(6)	835	864
3.20% Notes due 2027	700	(7)	693	706
Total Long-term Borrowings	\$ 5,041	\$ (27)	\$ 5,014	\$ 5,225

Long-term borrowings at December 31, 2016 had a carrying value of \$4.9 billion and a fair value of \$5.2 billion determined using market prices at the end of December 2016.

2027 Notes. In March 2017, the Company issued \$700 million in aggregate principal amount of 3.20% senior unsecured and unsubordinated notes maturing on March 15, 2027 (the "2027 Notes"). Interest is payable semi-annually on March 15 and September 15 of each year, commencing September 15, 2017, and is approximately \$22 million per year. The 2027 Notes may be redeemed prior to maturity at any time in whole or in part at the option of the Company at a "make-whole" redemption price. The unamortized discount and debt issuance costs are being amortized over the remaining term of the 2027 Notes.

In April 2017, the net proceeds of the 2027 Notes were used to fully repay \$700 million in aggregate principal amount outstanding of 6.25% notes prior to their maturity in September 2017.

2025 Notes. In May 2015, the Company issued €700 million of 1.25% senior unsecured notes maturing on May 6, 2025 (the "2025 Notes"). The notes are listed on the New York

Stock Exchange. The net proceeds of the 2025 Notes were used for general corporate purposes, including refinancing of outstanding indebtedness. Interest of approximately \$9 million per year based on current exchange rates is payable annually on May 6 of each year. The 2025 Notes may be redeemed in whole or in part prior to maturity at any time at the option of the Company at a "make-whole" redemption price. The unamortized discount and debt issuance costs are being amortized over the remaining term of the 2025 Notes.

Upon conversion to U.S. dollars the Company designated the €700 million debt offering as a net investment hedge to offset its currency exposure relating to its net investment in certain euro functional currency operations. A loss of \$64 million (net of a tax benefit of \$38 million), a gain of \$14 million (net of tax of \$8 million), and a gain of \$19 million (net of tax of \$11 million) were recognized in other comprehensive income for 2017, 2016 and 2015, respectively. No hedge ineffectiveness was recognized during 2017, 2016, and 2015.

2024 Notes. In March 2014, the Company issued \$1.0 billion in aggregate principal amount of 3.50% senior unsecured and unsubordinated notes maturing on March 18, 2024 (the "2024 Notes"). The net proceeds of the 2024 Notes were

used to refinance certain indebtedness which matured in the fourth quarter of 2014. Interest is payable semi-annually in arrears on March 18 and September 18 of each year, or approximately \$35 million per year. The 2024 Notes may be redeemed prior to maturity at any time in whole or in part at the option of the Company at a “make-whole” redemption price. The unamortized discount and debt issuance costs are being amortized over the remaining term of the 2024 Notes.

2022 Notes. In May 2012, the Company issued \$1.5 billion in aggregate principal amount of unsecured unsubordinated obligations. These notes were issued as two separate series of senior debt securities, including \$750 million of 1.375% notes, which were repaid in June 2015 at maturity, and \$750 million of 3.375% notes maturing in June 2022 (the “2022 Notes”). Net proceeds were used to fund the repurchase of BlackRock’s common stock and Series B Preferred from Barclays and affiliates and for general corporate purposes. Interest on the 2022 Notes of approximately \$25 million per year is payable semi-annually on June 1 and December 1 of each year. The 2022 Notes may be redeemed prior to maturity at any time in whole or in part at the option of the Company at a “make-whole” redemption price. The “make-whole” redemption price represents a price, subject to the specific terms of the 2022 Notes and related indenture, that is the greater of (a) par value and (b) the present value of future payments that will not be paid because of an early redemption, which is discounted at a fixed spread over a comparable Treasury security. The unamortized discount and debt issuance costs are being amortized over the remaining term of the 2022 Notes.

2021 Notes. In May 2011, the Company issued \$1.5 billion in aggregate principal amount of unsecured unsubordinated obligations. These notes were issued as two separate series of senior debt securities, including \$750 million of 4.25% notes maturing in May 2021 and \$750 million of floating rate notes, which were repaid in May 2013 at maturity. Net proceeds of this offering were used to fund the repurchase of BlackRock’s Series B Preferred from affiliates of Merrill Lynch & Co., Inc. Interest on the 4.25% notes due in 2021 (“2021 Notes”) is payable semi-annually on May 24 and November 24 of each year, and is approximately \$32 million per year. The 2021 Notes may be redeemed prior to maturity at any time in whole or in part at the option of the Company at a “make-whole” redemption price. The unamortized discount and debt issuance costs are being amortized over the remaining term of the 2021 Notes.

2019 Notes. In December 2009, the Company issued \$2.5 billion in aggregate principal amount of unsecured and unsubordinated obligations. These notes were issued as three separate series of senior debt securities including \$0.5 billion of 2.25% notes, which were repaid in December 2012, \$1.0 billion of 3.50% notes, which were repaid in December 2014 at maturity, and \$1.0 billion of 5.0% notes maturing in December 2019 (the “2019 Notes”). Net proceeds of this offering were used to repay borrowings under the CP Program, which was used to finance a portion of the acquisition of Barclays Global Investors from Barclays on December 1, 2009, and for general corporate purposes. Interest on the 2019 Notes of approximately \$50 million per year is payable semi-annually in arrears on June 10 and December 10 of each year. These notes may be redeemed prior to maturity at any time in whole or in part at the option of the Company at a “make-whole” redemption price. The unamortized discount and debt issuance costs are being amortized over the remaining term of the 2019 Notes.

13. Commitments and Contingencies

Operating Lease Commitments

The Company leases its primary office spaces under agreements that expire through 2043. Future minimum commitments under these operating leases are as follows:

Year	Amount
2018	141
2019	132
2020	126
2021	118
2022	109
Thereafter	1,580
Total	\$ 2,206

In May 2017, the Company entered into an agreement with 50 HYMC Owner LLC, for the lease of approximately 847,000 square feet of office space located at 50 Hudson Yards, New York, New York. The term of the lease is twenty years from the date that rental payments begin, expected to occur in May 2023, with the option to renew for a specified term. The lease requires annual base rental payments of approximately \$51 million per year during the first five years of the lease term, increasing every five years to \$58 million, \$66 million and \$74 million per year (or approximately \$1.2 billion in base rent over its twenty-year term). This lease is classified as an operating lease and, as such, is not recorded as a liability on the consolidated statements of financial condition.

Rent expense and certain office equipment expense under lease agreements amounted to \$132 million, \$134 million and \$136 million in 2017, 2016 and 2015, respectively.

Investment Commitments. At December 31, 2017, the Company had \$298 million of various capital commitments to fund sponsored investment funds, including consolidated VIEs. These funds include private equity funds, real assets funds, and opportunistic funds. This amount excludes additional commitments made by consolidated funds of funds to underlying third-party funds as third-party noncontrolling interest holders have the legal obligation to fund the respective commitments of such funds of funds. Generally, the timing of the funding of these commitments is unknown and the commitments are callable on demand at any time prior to the expiration of the commitment. These unfunded commitments are not recorded on the consolidated statements of financial condition. These commitments do not include potential future commitments approved by the Company that are not yet legally binding. The Company intends to make additional capital commitments from time to time to fund additional investment products for, and with, its clients.

Contingencies

Contingent Payments Related to Business Acquisitions. In connection with certain acquisitions, BlackRock is required to make contingent payments, subject to achieving specified performance targets, which may include revenue related to acquired contracts or new capital commitments for certain products. The fair value of the remaining aggregate contingent payments at December 31, 2017 totaled \$236 million, including \$128 million related to the First Reserve Transaction, and is included in other liabilities on the consolidated statements of financial condition.

Other Contingent Payments. The Company acts as the portfolio manager in a series of derivative transactions and has a maximum potential exposure of \$17 million between the Company and counterparty. See Note 7, *Derivatives and Hedging*, for further discussion.

Legal Proceedings. From time to time, BlackRock receives subpoenas or other requests for information from various U.S. federal, state governmental and regulatory authorities and international regulatory authorities in connection with industry-wide or other investigations or proceedings. It is BlackRock's policy to cooperate fully with such inquiries. The Company and certain of its subsidiaries have been named as defendants in various legal actions, including arbitrations and other litigation arising in connection with BlackRock's activities. Additionally, BlackRock-advised investment portfolios may be subject to lawsuits, any of which potentially could harm the investment returns of the applicable portfolio or result in the Company being liable to the portfolios for any resulting damages.

On May 27, 2014, certain investors in the BlackRock Global Allocation Fund, Inc. and the BlackRock Equity Dividend Fund (collectively, the "Funds") filed a consolidated complaint (the "Consolidated Complaint") in the U.S. District Court for the District of New Jersey against BlackRock Advisors, LLC, BlackRock Investment Management, LLC and BlackRock International Limited under the caption *In re BlackRock Mutual Funds Advisory Fee Litigation*. The Consolidated Complaint, which purports to be brought derivatively on behalf of the Funds, alleges that the defendants violated Section 36(b) of the Investment Company Act by receiving allegedly excessive investment advisory fees from the Funds. On February 24, 2015, the same plaintiffs filed another complaint in the same court against BlackRock Investment Management, LLC and BlackRock Advisors, LLC. Both complaints seek, among other things, to recover on behalf of the Funds all allegedly excessive advisory fees received by defendants in the twelve month period preceding the start of each lawsuit, along with purported lost investment returns on those amounts, plus interest. The defendants believe the claims in both lawsuits are without merit and are vigorously defending the actions. On September 25, 2017, the defendants filed a motion for summary judgment to dismiss the lawsuit, which is pending.

In November 2015, BlackRock, Inc., BlackRock Realty Advisors, Inc. ("BRA"), BlackRock US Core Property Fund, Inc. (formerly known as BlackRock Granite Property Fund, Inc.) ("Granite Fund"), and certain other Granite Fund related entities (collectively, the "BlackRock Parties") were named as defendants in thirteen lawsuits filed in the Superior Court of the State of California for the County of Alameda arising out of the June 16, 2015 collapse of a balcony at the Library Gardens apartment complex in Berkeley, California (the "Property"). The Property is indirectly owned by the Granite Fund, which is managed by BRA. The plaintiffs also named as defendants in the lawsuits Greystar, which manages the Property, and certain other non-BlackRock related entities, including the developer of the Property, building contractors and building materials suppliers. The plaintiffs alleged, among other things, that the BlackRock Parties were negligent in their ownership, control and maintenance of the Property's balcony, and sought monetary, including punitive, damages. Additionally, on March 16, 2016, three former tenants of the Library Gardens apartment unit who were not physically injured but experienced the balcony collapse sued the BlackRock Parties for emotional damages. In November

2017, the BlackRock Parties settled all of the lawsuits relating to Library Gardens.

On June 16, 2016, *iShares* Trust, BlackRock, Inc. and certain of its advisory affiliates, and the directors and certain officers of the *iShares* ETFs were named as defendants in a purported class action lawsuit filed in California state court. The lawsuit was filed by investors in certain *iShares* ETFs (the "ETFs"), and alleges the defendants violated the federal securities laws, purportedly by failing to adequately disclose in prospectuses issued by the ETFs the risks to the ETFs' shareholders in the event of a "flash crash." Plaintiffs seek unspecified monetary damages. The plaintiffs' complaint was dismissed in December 2016 and on January 6, 2017, plaintiffs filed an amended complaint. The defendants filed a motion for judgment on the pleadings dismissing that complaint. On September 18, 2017, the court dismissed the lawsuit. On December 1, 2017, the plaintiffs appealed the dismissal of their lawsuit.

On April 5, 2017, BlackRock, Inc., BlackRock Institutional Trust Company, N.A. ("BTC"), the BlackRock, Inc. Retirement Committee and various sub-committees, and a BlackRock employee were named as defendants in a purported class action lawsuit brought in the U.S. District Court for the Northern District of California by a former employee on behalf of all BlackRock employee 401(k) Plan (the "Plan") participants and beneficiaries in the Plan from April 5, 2011, to the present. The lawsuit generally alleges that the defendants breached their duties towards Plan participants in violation of the Employee Retirement Income Security Act of 1974 by, among other things, offering investment options that were overly expensive, underperformed peer funds, focused disproportionately on active versus passive strategies, and were unduly concentrated with investment options managed by BlackRock. While the complaint does not contain any specific amount in alleged damages, it claims that the purported underperformance and hidden fees cost Plan participants more than \$60 million. On October 10, 2017, the plaintiffs filed an Amended Complaint, which, among other things, adds as defendants certain current and former members of the BlackRock Retirement and Investment Committees. The Amended Complaint also includes a new purported class claim on behalf of investors in certain Collective Trust Funds ("CTFs") managed by BTC. Specifically, the plaintiffs allege that BTC, as fiduciary to the CTFs, engaged in self-dealing by, most significantly, selecting itself as the lending agent on terms that plaintiffs claim were excessive. The defendants believe the claims in this lawsuit are without merit and is vigorously defending the action. BlackRock moved to dismiss the Amended Complaint on November 8, 2017.

Management, after consultation with legal counsel, currently does not anticipate that the aggregate liability arising out of regulatory matters or lawsuits will have a material effect on BlackRock's results of operations, financial position, or cash flows. However, there is no assurance as to whether any such pending or threatened matters will have a material effect on BlackRock's results of operations, financial position or cash flows in any future reporting period. Due to uncertainties surrounding the outcome of these matters, management cannot reasonably estimate the possible loss or range of loss that may arise from these matters.

Indemnifications. In the ordinary course of business or in connection with certain acquisition agreements, BlackRock

enters into contracts pursuant to which it may agree to indemnify third parties in certain circumstances. The terms of these indemnities vary from contract to contract and the amount of indemnification liability, if any, cannot be determined or the likelihood of any liability is considered remote. Consequently, no liability has been recorded on the consolidated statements of financial condition.

In connection with securities lending transactions, BlackRock has issued certain indemnifications to certain securities lending clients against potential loss resulting from a borrower's failure to fulfill its obligations under the securities lending agreement should the value of the collateral pledged by the borrower at the time of default be insufficient to cover the borrower's obligation under the securities lending agreement. At December 31, 2017, the Company indemnified certain clients for their securities lending loan balances of approximately \$200 billion. The Company held as agent, cash and securities totaling \$214 billion as collateral for indemnified securities on loan at December 31, 2017. The fair value of these indemnifications was not material at December 31, 2017.

14. Stock-Based Compensation

The components of stock-based compensation expense are as follows:

<i>(in millions)</i>	2017	2016	2015
Stock-based compensation:			
Restricted stock and RSUs	\$ 524	\$ 493	\$ 484
Long-term incentive plans to be funded by PNC	15	28	30
Stock options	3	—	—
Total stock-based compensation	\$ 542	\$ 521	\$ 514

Stock Award and Incentive Plan. Pursuant to the BlackRock, Inc. Second Amended and Restated 1999 Stock Award and Incentive Plan (the "Award Plan"), options to purchase shares of the Company's common stock at an exercise price not less than the market value of BlackRock's common stock on the date of grant in the form of stock options, restricted stock or RSUs may be granted to employees and nonemployee directors. A maximum of 34,500,000 shares of common stock were authorized for issuance under the Award Plan. Of this amount, 2,438,646 shares remain available for future awards at December 31, 2017. Upon exercise of employee stock options, the issuance of restricted stock or the vesting of RSUs, the Company issues shares out of treasury to the extent available.

Restricted Stock and RSUs. Pursuant to the Award Plan, restricted stock grants and RSUs may be granted to certain employees. Substantially all restricted stock and RSUs vest over periods ranging from one to three years and are expensed using the straight-line method over the requisite service period for each separately vesting portion of the award as if the award was, in-substance, multiple awards. Restricted stock and RSUs are not considered participating securities for purposes of calculating EPS as the dividend equivalents are subject to forfeiture prior to vesting of the award.

Restricted stock and RSU activity for 2017 is summarized below.

Outstanding at	Restricted Stock and RSUs	Weighted-Average Grant Date Fair Value
December 31, 2016	2,987,588	\$ 318.04
Granted	1,104,210	\$ 381.62
Converted	(1,424,649)	\$ 321.12
Forfeited	(58,481)	\$ 339.17
December 31, 2017⁽¹⁾	2,608,668	\$ 342.79

(1) At December 31, 2017, approximately 2.3 million awards are expected to vest and 0.3 million awards have vested but have not been converted.

The Company values restricted stock and RSUs at their grant-date fair value as measured by BlackRock's common stock price. The total grant-date fair market value of RSUs/restricted stock granted to employees during 2017, 2016 and 2015 was \$421 million, \$446 million and \$473 million, respectively. The total grant-date fair market value of RSUs/restricted stock converted to common stock during 2017, 2016 and 2015 was \$457 million, \$413 million and \$379 million, respectively.

RSUs/restricted stock granted in connection with annual incentive compensation under the Award Plan primarily related to the following:

	2017	2016	2015
Awards granted that vest ratably over three years from the date of grant	699,991	1,030,964	952,329
Awards granted that cliff vest 100% on:			
January 31, 2018	—	—	303,999
January 31, 2019	—	303,587	—
January 31, 2020	277,313	—	—
	977,304	1,334,551	1,256,328

In addition the Company also granted RSUs of 126,906, 146,574 and 120,935 during 2017, 2016 and 2015, respectively, with varying vesting periods up to three years.

At December 31, 2017, the intrinsic value of outstanding RSUs was \$1.3 billion, reflecting a closing stock price of \$513.71 at December 31, 2017.

At December 31, 2017, there was \$272 million in total unrecognized stock-based compensation expense related to unvested RSUs. The unrecognized compensation cost is expected to be recognized over the remaining weighted-average period of less than one year.

In January 2018, the Company granted under the Award Plan

- 527,337 RSUs or shares of restricted stock to employees as part of annual incentive compensation that vest ratably over three years from the date of grant; and
- 209,201 RSUs or shares of restricted stock to employees that cliff vest 100% on January 31, 2021.

Performance-Based RSUs. Pursuant to the Award Plan, performance-based RSUs may be granted to certain employees. Each performance-based award consists of a "base" number of RSUs granted to the employee. The

number of shares that an employee ultimately receives at vesting will be equal to the base number of performance-based RSUs granted, multiplied by a predetermined percentage determined in accordance with the level of attainment of Company performance measures during the performance period and could be higher or lower than the original RSU grant. The awards are generally forfeited if the employee leaves the Company before the vesting date. Performance-based RSUs are not considered participating securities as the dividend equivalents are subject to forfeiture prior to vesting of the award.

In the first quarter of 2017, 2016 and 2015, the Company granted 294,584, 375,242, and 262,847, respectively, performance-based RSUs to certain employees that cliff vest 100% on January 31, 2020, 2019, and 2018 respectively. These awards are amortized over a service period of three years. The number of shares distributed at vesting could be higher or lower than the original grant based on the level of attainment of predetermined Company performance measures.

Performance-based RSU activity for 2017 is summarized below.

Outstanding at	Performance-Based RSUs	Weighted-Average Grant Date Fair Value
December 31, 2016	610,371	\$ 315.65
Granted	294,584	\$ 375.27
Forfeited	(1,430)	\$ 296.12
December 31, 2017	903,525	\$ 335.12

The Company initially values performance-based RSUs at their grant-date fair value as measured by BlackRock's common stock price. The total grant-date fair market value of performance-based RSUs granted to employees during 2017 was \$111 million.

At December 31, 2017, the intrinsic value of outstanding performance-based RSUs was \$464 million reflecting a closing stock price of \$513.71.

At December 31, 2017, total unrecognized stock-based compensation expense related to unvested performance-based awards was \$117 million. The unrecognized compensation cost is expected to be recognized over the remaining weighted-average period of 1.2 years.

In January 2018, the Company granted 199,068 performance-based RSUs to certain employees that cliff vest 100% on January 31, 2021. These awards are amortized over a service period of three years. The number of shares distributed at vesting could be higher or lower than the original grant based on the level of attainment of predetermined Company performance measures.

Market Performance-based RSUs. Pursuant to the Award Plan, market performance-based RSUs may be granted to certain employees. The market performance-based RSUs require that separate 15%, 25% and 35% share price appreciation targets be achieved during the six-year term of the awards. The awards are split into three tranches and each tranche may vest if the specified target increase in share price is met. Eligible vesting dates for each tranche are January 31 (or, if such date is not a business day, the next following business day) of the year in which the fourth, fifth

or sixth anniversaries of the grant-date occurs. Certain awards are forfeited if the employee leaves BlackRock before the vesting date. These awards are amortized over a service period of four years, which is the longer of the explicit service period or the period in which the market target is expected to be met. Market performance-based RSUs are not considered participating securities as the dividend equivalents are subject to forfeiture prior to vesting of the award. During 2017 and 2016 there were no market performance-based awards granted.

Market performance-based RSU activity for 2017 is summarized below.

Outstanding at	Market Performance-Based RSUs	Weighted-Average Grant Date Fair Value
December 31, 2016	803,474	\$ 151.20
Converted	(517,138)	\$ 126.76
December 31, 2017⁽¹⁾	286,336	\$ 195.33

(1) At December 31, 2017, approximately 0.3 million awards are expected to vest on January 31, 2018.

At December 31, 2017, the intrinsic value of outstanding market performance-based awards was \$147 million reflecting a closing stock price of \$513.71.

At December 31, 2017, total unrecognized stock-based compensation expense related to unvested market performance-based awards was \$1 million. The unrecognized compensation cost will be recognized in 2018.

Long-Term Incentive Plans Funded by PNC. Under a share surrender agreement, PNC committed to provide up to 4 million shares of BlackRock stock, held by PNC, to fund certain BlackRock long-term incentive plans ("LTIP"), including performance-based and market performance-based RSUs. The current share surrender agreement commits PNC to provide BlackRock Series C nonvoting participating preferred stock to fund the remaining committed shares. As of December 31, 2017, 3.8 million shares had been surrendered by PNC, including 517,138 shares which were surrendered by PNC in the first quarter of 2017.

At December 31, 2017, the remaining shares committed by PNC of 0.2 million were available to fund certain future long-term incentive awards.

103,064 shares were surrendered by PNC in the first quarter of 2018.

Performance-based Stock Options. Pursuant to the Award Plan, performance-based stock options may be granted to certain employees. Vesting of the performance-based stock options is contingent upon the achievement of obtaining 125% of BlackRock's grant-date stock price within five years from the grant date and the attainment of Company performance measures during the four-year performance period. If both hurdles are achieved, the award will vest in three equal installments at the end of years five, six and seven. Vested options can then be exercised up to nine years following the grant date. The awards are generally forfeited if the employee leaves the Company before the respective vesting date. The expense for each tranche is amortized over the respective requisite service period. The Company assumes the performance condition will be achieved. If such

condition is not met, no compensation cost is recognized and any recognized compensation cost is reversed. Stock option activity for 2017 is summarized below.

Outstanding at	Shares Under Option	Weighted Average Exercise Price
December 31, 2016	—	\$ —
Granted	2,147,562	\$ 513.50
December 31, 2017	2,147,562	\$ 513.50

The options have a strike price of \$513.50, which was the closing price of the shares on the grant date. The grant-date fair value of the awards issued in 2017 was \$208 million and was estimated using a Monte Carlo simulation with an embedded lattice model using the assumptions included in the following table:

Grant Year	Expected Term (Years)	Expected Stock Volatility	Expected Dividend Yield	Risk-Free Interest Rate
2017	6.56	22.23%	2.16%	2.33%

The expected term was derived using a Monte Carlo simulation with the embedded lattice model and represents the period of time that options granted are expected to be outstanding. The expected stock volatility was based upon an average of historical stock price fluctuations of BlackRock's common stock and an implied volatility at the grant date. The dividend yield was calculated as the most recent quarterly dividend divided by the average three-month stock price as of the grant date. The risk free interest rate is based on the U.S. Treasury Constant Maturities yield curve at date of grant.

At December 31, 2017, total unrecognized stock-based compensation expense related to unvested performance-based stock options was \$205 million. The unrecognized compensation cost is expected to be recognized over the remaining weighted-average period of 5.9 years.

Employee Stock Purchase Plan ("ESPP"). The ESPP allows eligible employees to purchase the Company's common stock at 95% of the fair market value on the last day of each three-month offering period. The Company does not record compensation expense related to employees purchasing shares under the ESPP.

15. Employee Benefit Plans

Deferred Compensation Plans

Voluntary Deferred Compensation Plan. The Company adopted a Voluntary Deferred Compensation Plan ("VDCP") that allows eligible employees in the United States to elect to defer between 1% and 100% of their annual cash incentive compensation. The participants must specify a deferral period of up to 10 years from the year of deferral and additionally, elect to receive distributions in the form of a lump sum or in up to 10 annual installments. The Company may fund the obligation through the rabbi trust on behalf of the plan's participants.

The rabbi trust established for the VDCP, with assets totaling \$56 million and \$59 million at December 31, 2017 and 2016,

respectively, is reflected in investments on the consolidated statements of financial condition. Such investments are classified as trading investments. The liability balance of \$85 million and \$83 million at December 31, 2017 and 2016, respectively, is reflected on the consolidated statements of financial condition as accrued compensation and benefits. Earnings in the rabbi trust, including unrealized appreciation or depreciation, are reflected as nonoperating income (expense) and changes in the liability are reflected as employee compensation and benefits expense on the consolidated statements of income.

Other Deferred Compensation Plans. The Company has additional compensation plans for the purpose of providing deferred compensation and retention incentives to certain employees. For these plans, the final value of the deferred amount to be distributed in cash upon vesting is associated with investment returns of certain investment funds. The liabilities for these plans were \$262 million and \$223 million at December 31, 2017 and 2016, respectively, and are reflected in the consolidated statements of financial condition as accrued compensation and benefits. In January 2018, the Company granted approximately \$143 million of additional deferred compensation that will fluctuate with investment returns and will vest ratably over three years from the date of grant.

Defined Contribution Plans

The Company has several defined contribution plans primarily in the United States and United Kingdom.

Certain of the Company's U.S. employees participate in a defined contribution plan ("U.S. Plan"). Employee contributions of up to 8% of eligible compensation, as defined by the plan and subject to Internal Revenue Code limitations, are matched by the Company at 50% up to a maximum of \$5,000 annually. In addition, the Company makes an annual retirement contribution to eligible participants equal to 3-5% of eligible compensation. In 2017, 2016 and 2015, the Company's contribution expense related to the U.S. Plan was \$78 million, \$75 million and \$72 million, respectively.

Certain U.K. wholly owned subsidiaries of the Company contribute to a defined contribution plan for their employees. The contributions range between 6% and 15% of each employee's eligible compensation. The Company's contribution expense related to this plan was \$29 million in 2017, \$30 million in 2016, and \$33 million in 2015.

In addition, the contribution expense related to defined contribution plans in other regions was \$21 million in 2017, \$20 million in 2016 and \$18 million in 2015.

Defined Benefit Plans. The Company has several defined benefit pension plans primarily in Japan and Germany. All accrued benefits under the Germany defined benefit plan are currently frozen and the plan is closed to new participants. The participant benefits under the Germany plan will not change with salary increases or additional years of service. At December 31, 2017 and 2016, the plan assets for both these plans were approximately \$26 million and \$23 million, respectively. The underfunded obligations at December 31, 2017 and 2016 were not material. Benefit payments for the next five years and in aggregate for the five years thereafter are not expected to be material.

16. Related Party Transactions

Determination of Related Parties

PNC. The Company considers PNC, along with its affiliates, to be related parties based on the level of its ownership of BlackRock capital stock. At December 31, 2017, PNC owned approximately 21.2% of the Company's voting common stock and held approximately 21.7% of the total capital stock. Revenue for services provided by the Company to PNC was not material for 2017, 2016 and 2015.

Registered Investment Companies and Equity Method Investments. The Company considers the registered investment companies that it manages, which include mutual funds and exchange-traded funds, to be related parties as a result of the Company's advisory relationship. In addition, equity method investments are considered related parties, due to the Company's influence over the financial and operating policies of the investee.

Revenue from Related Parties

Revenue for services provided by the Company to these and other related parties are as follows:

(in millions)	2017	2016	2015
Investment advisory, administration fees and securities lending revenue ⁽¹⁾	\$ 7,740	\$ 6,836	\$ 6,875
Investment advisory performance fees	143	125	129
Technology and risk management revenue ⁽²⁾	7	7	7
Advisory and other revenue ⁽³⁾	58	90	73
Total revenue from related parties	\$ 7,948	\$ 7,058	\$ 7,084

(1) Amount primarily includes revenue from registered investment companies/and equity method investees.

(2) Amount primarily includes revenue from PNC and affiliates.

(3) Amount primarily includes revenue from equity method investees.

The Company provides investment advisory and administration services to its open- and closed-end funds and other commingled or pooled funds and separate accounts in which related parties invest. In addition, the Company provides investment advisory and administration services to PNC and its affiliates for fees based on AUM. Further, the Company provides risk management services to PNC.

Expenses for Transactions with Related Parties

Expenses for transactions with related parties are as follows:

(in millions)	2017	2016	2015
General and administration expense:			
Registered investment companies	\$ 60	\$ 61	\$ 60
Other	9	4	18
Total general and administration expense	\$ 69	\$ 65	\$ 78

Certain Agreements and Arrangements with PNC

PNC. On February 27, 2009, BlackRock entered into an amended and restated implementation and stockholder agreement with PNC, and a fourth amendment to the share surrender agreement with PNC.

Receivables and Payables with Related Parties. Due from related parties, which is included within other assets on the consolidated statements of financial condition was \$91 million and \$100 million at December 31, 2017 and 2016, respectively, and primarily represented receivables from certain investment products managed by BlackRock. Accounts receivable at December 31, 2017 and 2016 included \$850 million and \$688 million, respectively, related to receivables from BlackRock mutual funds, including *iShares* ETFs, for investment advisory and administration services.

Due to related parties, which is included within other liabilities on the consolidated statements of financial condition, was \$28 million and \$19 million at December 31, 2017 and 2016, respectively, and primarily represented payables to certain investment products managed by BlackRock.

17. Net Capital Requirements

The Company is required to maintain net capital in certain regulated subsidiaries within a number of jurisdictions, which is partially maintained by retaining cash and cash equivalent investments in those subsidiaries or jurisdictions. As a result, such subsidiaries of the Company may be restricted in their ability to transfer cash between different jurisdictions and to their parents. Additionally, transfers of cash between international jurisdictions may have adverse tax consequences that could discourage such transfers.

Banking Regulatory Requirements. BlackRock Institutional Trust Company, N.A. ("BTC"), a wholly owned subsidiary of the Company is chartered as a national bank whose powers are limited to trust and other fiduciary activities and which is subject to regulatory capital requirements administered by the Office of the Comptroller of the Currency. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the consolidated financial statements. Under the capital adequacy guidelines and the regulatory framework for prompt corrective action, BTC must meet specific capital guidelines that invoke quantitative measures of BTC's assets, liabilities, and certain off-balance sheet items as calculated under the regulatory accounting practices. BTC's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

Quantitative measures established by regulators to ensure capital adequacy require BTC to maintain a minimum Common Equity Tier 1 capital and Tier 1 leverage ratio, as well as Tier 1 and total risk-based capital ratios. Based on BTC's calculations as of December 31, 2017 and 2016, it exceeded the applicable capital adequacy requirements.

(in millions)

December 31, 2017

	Actual		For Capital Adequacy Purposes		To Be Well Capitalized Under Prompt Corrective Action Provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio

Common Equity Tier 1 capital (to risk weighted assets)	\$ 1,211	92.5%	\$ 59	4.5%	\$ 85	6.5%
Tier 1 capital (to risk weighted assets)	\$ 1,211	92.5%	\$ 79	6.0%	\$ 105	8.0%
Tier 1 capital (to average assets)	\$ 1,211	65.3%	\$ 74	4.0%	\$ 93	5.0%

Broker-dealers. BlackRock Investments, LLC and BlackRock Execution Services are registered broker-dealers and wholly owned subsidiaries of BlackRock that are subject to the Uniform Net Capital requirements under the Securities Exchange Act of 1934, which requires maintenance of certain minimum net capital levels.

Capital Requirements. At December 31, 2017 and 2016, the Company was required to maintain approximately \$1.8 billion and \$1.4 billion, respectively, in net capital in certain regulated subsidiaries, including BTC, entities regulated by the Financial Conduct Authority and Prudential Regulation Authority in the United Kingdom, and the Company's broker-dealers. The Company was in compliance with all applicable regulatory net capital requirements.

18. Accumulated Other Comprehensive Income (Loss)

The following table presents changes in accumulated other comprehensive income (loss) ("AOCI") by component for 2017, 2016 and 2015:

(in millions)	Foreign currency translation adjustments ⁽¹⁾	Other ⁽²⁾	Total
December 31, 2014	\$ (279)	\$ 6	\$ (273)
Net other comprehensive income (loss) for 2015	(173)	(2)	(175)
December 31, 2015	\$ (452)	\$ 4	\$ (448)
Net other comprehensive income (loss) for 2016	(269)	1	(268)
December 31, 2016	\$ (721)	\$ 5	\$ (716)
Net other comprehensive income (loss) for 2017	285	(1)	284
December 31, 2017	\$ (436)	\$ 4	\$ (432)

(1) Amount for 2017 includes a loss from a net investment hedge of \$64 million (net of a tax benefit of \$38 million). Amount for 2016 and 2015 include a gain from a net investment hedge of \$14 million (net of tax of \$8 million) and \$19 million (net of tax of \$11 million), respectively.

(2) Other includes amounts related to benefit plans and available-for-sale investments and are presented net of tax. Amounts reclassified to AOCI were not material for 2017, 2016, and 2015.

19. Capital Stock

The Company's authorized common stock and nonvoting participating preferred stock, \$0.01 par value, ("Preferred") consisted of the following:

	December 31, 2017	December 31, 2016
Common Stock	500,000,000	500,000,000
Nonvoting Participating Preferred Stock		
Series A Preferred	20,000,000	20,000,000
Series B Preferred	150,000,000	150,000,000
Series C Preferred	6,000,000	6,000,000
Series D Preferred	20,000,000	20,000,000

PNC Capital Contribution. During 2017 and 2016, PNC surrendered to BlackRock 517,138 and 548,227 shares, respectively, of BlackRock Series C Preferred to fund certain LTIP awards.

Cash Dividends for Common and Preferred Shares / RSUs.

During 2017, 2016 and 2015, the Company paid cash dividends of \$10.00 per share (or \$1,662 million), \$9.16 per share (or \$1,545 million) and \$8.72 per share (or \$1,476 million), respectively.

Share Repurchases. The Company repurchased 2.6 million common shares in open market-transactions under its share repurchase program for \$1.1 billion during 2017. At December 31, 2017, there were 6.4 million shares still authorized to be repurchased.

The Company's common and preferred shares issued and outstanding and related activity consist of the following:

	Shares Issued			Shares Outstanding			
	Common Shares	Treasury Common Shares	Series B Preferred	Series C Preferred	Common Shares	Series B Preferred	Series C Preferred
December 31, 2014	171,252,185	(6,465,397)	823,188	1,311,887	164,786,788	823,188	1,311,887

20. Restructuring Charge

A restructuring charge of \$76 million (\$53 million after-tax), comprised of \$44 million of severance and \$32 million of expense related to the accelerated amortization of previously granted deferred cash and equity compensation awards, was recorded in the first quarter of 2016 in connection with a project to streamline and simplify the organization.

The following table presents a rollforward of the Company's restructuring liability for 2016 and 2017:

<i>(in millions)</i>	
Liability as of December 31, 2015	\$ —
Additions	76
Cash payments	(44)
Accelerated amortization expense of equity-based awards	(28)
Liability as of December 31, 2016	\$ 4
Cash payments	(4)
Liability as of December 31, 2017	\$ —

21. Income Taxes

U.S. Tax Reform

On December 22, 2017, the U.S. government enacted comprehensive tax legislation commonly referred to as the Tax Cuts and Jobs Act (the "2017 Tax Act"). The 2017 Tax Act makes broad and complex changes to the U.S. tax code, including, but not limited to, (1) reducing the U.S. federal corporate tax rate from 35 percent to 21 percent, (2) requiring companies to pay a one-time tax on certain unrepatriated earnings of foreign subsidiaries, (3) generally eliminating U.S. federal income taxes on dividends from foreign subsidiaries, (4) creating new taxes on certain earnings of controlled foreign corporations, and (5) creating a new limitation on deductible net interest expense.

For 2017, the Company recorded a net tax benefit of \$1,175 million, based on a reasonable estimate, related to the impact of the 2017 Tax Act. The tax benefit primarily consists of a \$1,652 million tax benefit related to the revaluation of deferred tax assets and liabilities and \$477 million tax expense related to the mandatory deemed repatriation tax. As of December 31, 2017, the Company has not completed the accounting for the income tax effects of certain elements of the 2017 Tax Act; however, as described below, reasonable estimates of the effects were determined, and therefore, have been recorded as provisional adjustments as follows:

Reduction of U.S. federal corporate tax rate: The 2017 Tax Act reduces the U.S. corporate tax rate to 21 percent. As a result of revaluing deferred tax assets and liabilities based on the rates at which they are expected to reverse in the future, the Company recorded a \$1,652 million tax benefit for the reduction in the net deferred tax liabilities for 2017.

Mandatory deemed repatriation tax: The mandatory deemed repatriation tax is a tax on previously untaxed accumulated

and current earnings and profits of foreign subsidiaries. Based on a reasonable estimate, the Company recorded a tax expense of \$477 million related to the mandatory deemed repatriation tax, which is payable over eight years.

Global intangible low taxed income ("GILTI"): The 2017 Tax Act creates a new requirement that the income (i.e., GILTI) earned by foreign subsidiaries must be included in the taxable income of the entity's U.S. shareholder. The Company has not yet adopted an accounting policy for GILTI, as it is still not clear whether to 1) treat the taxes (if any) resulting from the GILTI inclusion as a current-period expense when incurred or 2) factoring such amounts into the Company's measurement of its deferred taxes is the appropriate accounting.

While the Company was able to make a reasonable estimate of the impact related the 2017 Tax Act, the provisional amounts may require further adjustments as additional guidance from the U.S. Department of the Treasury is provided, as changes in the Company's assumptions occur, and as further information and interpretations become available.

The components of income tax expense for 2017, 2016 and 2015, are as follows:

<i>(in millions)</i>	2017	2016	2015
Current income tax expense:			
Federal	\$ 1,166	\$ 858	\$ 937
State and local	36	61	74
Foreign	289	385	395
Total net current income tax expense	1,491	1,304	1,406
Deferred income tax expense (benefit):			
Federal	(1,382)	31	(13)
State and local	81	14	(19)
Foreign	80	(59)	(124)
Total net deferred income tax expense (benefit)	(1,221)	(14)	(156)
Total income tax expense	\$ 270	\$ 1,290	\$ 1,250

Income tax expense has been based on the following components of income before taxes, less net income (loss) attributable to noncontrolling interests:

<i>(in millions)</i>	2017	2016	2015
Domestic	\$ 3,298	\$ 2,837	\$ 2,840
Foreign	1,942	1,625	1,755
Total	\$ 5,240	\$ 4,462	\$ 4,595

The foreign income before taxes includes countries that have statutory tax rates that are lower than the U.S. federal statutory tax rate of 35%, such as the United Kingdom, Channel Islands, Ireland and Netherlands.

A reconciliation of income tax expense with expected federal income tax expense computed at the applicable federal income tax rate of 35% is as follows:

<i>(in millions)</i>	2017	%	2016	%	2015	%
Statutory income tax expense	\$ 1,834	35%	\$ 1,562	35%	\$ 1,608	35%
Increase (decrease) in income taxes resulting from:						
State and local taxes (net of federal benefit)	60	1	69	2	42	1
Impact of federal, foreign, state, and local tax rate changes on deferred taxes	(1,637)	(31)	(33)	(1)	(45)	(1)
Mandatory deemed repatriation tax	477	9				
Stock-based compensation awards	(159)	(3)				
Effect of foreign tax rates	(337)	(6)	(329)	(7)	(385)	(8)
Other	32	—	21	—	30	—
Income tax expense	\$ 270	5%	\$ 1,290	29%	\$ 1,250	27%

Deferred income taxes are provided for the effects of temporary differences between the tax basis of an asset or liability and its reported amount in the consolidated financial statements. These temporary differences result in taxable or deductible amounts in future years.

The components of deferred income tax assets and liabilities are shown below:

<i>(in millions)</i>	December 31,	
	2017	2016
Deferred income tax assets:		
Compensation and benefits	\$ 187	\$ 399
Unrealized investment losses	28	42
Loss carryforwards	84	85
Foreign tax credit carryforwards	—	118
Other	116	216
Gross deferred tax assets	415	860
Less: deferred tax valuation allowances	(22)	(22)
Deferred tax assets net of valuation allowances	393	838
Deferred income tax liabilities:		
Goodwill and acquired indefinite-lived intangibles	3,810	5,568
Acquired finite-lived intangibles	40	36
Other	62	54
Gross deferred tax liabilities	3,912	5,658
Net deferred tax (liabilities)	\$(3,519)	\$(4,820)

Deferred income tax assets and liabilities are recorded net when related to the same tax jurisdiction. At December 31, 2017, the Company recorded on the consolidated statement of financial condition deferred income tax assets, within other assets, and deferred income tax liabilities of \$19 million and \$3,538 million, respectively. At December 31, 2016, the Company recorded on the consolidated statement of financial condition deferred income tax assets, within other assets, and deferred income tax liabilities of \$20 million and \$4,840 million, respectively.

The 2017 Tax Act resulted in a \$106 million tax expense related to the revaluation of certain deferred income tax assets and \$1,758 million noncash tax benefit related to the revaluation of certain deferred income tax liabilities. In addition, mandatory deemed repatriation of undistributed foreign earnings and profits with respect to the 2017 Tax Act resulted in a \$477 million tax expense.

Income tax expense for 2017 included a \$16 million noncash tax expense related to the revaluation of certain deferred income tax liabilities as a result of domestic state and local tax changes and a \$173 million discrete tax benefit, primarily related to stock-based compensation awards.

During 2016, tax legislation enacted in the United Kingdom and domestic state and local tax changes resulted in a \$30 million net noncash benefit related to the revaluation of certain deferred income tax liabilities.

At December 31, 2017 and 2016, the Company had available state net operating loss carryforwards of \$1.7 billion and \$1.6 billion, respectively, which will begin to expire in 2019. At both December 31, 2017 and 2016, the Company had foreign net operating loss carryforwards of \$90 million of which \$3 million will begin to expire in 2021.

At both December 31, 2017 and 2016, the Company had \$22 million of valuation allowances for deferred income tax assets, respectively, recorded on the consolidated statements of financial condition.

Goodwill recorded in connection with the Quellos Transaction has been reduced during the period by the amount of tax benefit realized from tax-deductible goodwill. See Note 9, *Goodwill*, for further discussion.

Current income taxes are recorded net on the consolidated statements of financial condition when related to the same tax jurisdiction. At December 31, 2017, the Company had current income taxes receivable and payable of \$142 million and \$256 million, respectively, recorded in other assets and accounts payable and accrued liabilities, respectively. At December 31, 2016, the Company had current income taxes receivable and payable of \$247 million and \$75 million, respectively, recorded in other assets and accounts payable and accrued liabilities, respectively.

As a result of the 2017 Tax Act and the one-time mandatory deemed repatriation tax, previously undistributed foreign earnings for which no U.S. deferred tax liability had been recognized have now been subject to U.S. income tax. No additional income or withholding taxes were provided for with respect to the financial statement basis in excess of tax basis of its foreign subsidiaries as these amounts remain indefinitely reinvested in foreign operations. The Company will continue to evaluate its indefinite reinvestment assertion based on additional guidance from the U.S. Department of the Treasury and as further information and interpretations become available.

The following tabular reconciliation presents the total amounts of gross unrecognized tax benefits:

<i>(in millions)</i>	2017	2016	2015
Balance at January 1	\$ 410	\$ 466	\$ 379
Additions for tax positions of prior years	161	3	39
Reductions for tax positions of prior years	(3)	(78)	(25)
Additions based on tax positions related to current year	67	37	75
Lapse of statute of limitations	(6)	—	(2)
Settlements	—	(18)	—
Balance at December 31	\$ 629	\$ 410	\$ 466

Included in the balance of unrecognized tax benefits at December 31, 2017, 2016 and 2015, respectively, are \$316 million, \$284 million and \$320 million of tax benefits that, if recognized, would affect the effective tax rate.

The Company recognizes interest and penalties related to income tax matters as a component of income tax expense. Related to the unrecognized tax benefits noted above, the Company accrued interest and penalties of \$17 million during 2017 and in total, as of December 31, 2017, had recognized a liability for interest and penalties of \$76 million. The Company accrued interest and penalties of \$3 million during 2016 and in total, as of December 31, 2016, had recognized a liability for interest and penalties of \$59 million. The Company accrued interest and penalties of \$12 million during 2015 and in total, as of December 31, 2015, had recognized a liability for interest and penalties of \$56 million.

BlackRock is subject to U.S. federal income tax, state and local income tax, and foreign income tax in multiple jurisdictions. Tax years after 2009 remain open to U.S. federal income tax examination.

In June 2014, the IRS commenced its examination of BlackRock's 2010 through 2012 tax years, and while the impact on the consolidated financial statements is undetermined, it is not expected to be material.

The Company is currently under audit in several state and local jurisdictions. The significant state and local income tax examinations are in New York State and New York City for tax years 2009 through 2011, and California for tax years 2013 through 2014. No state and local income tax audits cover years earlier than 2008. No state and local income tax audits are expected to result in an assessment material to BlackRock's consolidated financial statements.

Upon conclusion of its examination, Her Majesty's Revenue and Customs' ('HMRC') issued a closure notice during 2017 for various U.K. BlackRock subsidiaries for tax years 2009 and years after. The Company made a decision to pursue litigation for the tax matters included on such notice. BlackRock does not expect the ultimate resolution to result in a material impact to the consolidated financial statements.

From time to time, BlackRock may receive or be subject to tax authorities' assessments and challenges related to income taxes. BlackRock does not currently expect the ultimate resolution of any existing matters to be material to the consolidated financial statements.

At December 31, 2017, it is reasonably possible the total amounts of unrecognized tax benefits will change within the next twelve months due to completion of tax authorities' exams or the expiration of statutes of limitations. Management estimates that the existing liability for uncertain tax positions could decrease by approximately \$10 million to \$40 million within the next twelve months.

22. Earnings Per Share

The following table sets forth the computation of basic and diluted EPS for 2017, 2016 and 2015 under the treasury stock method:

<i>(in millions, except shares and per share data)</i>	2017	2016	2015
Net income attributable to BlackRock	\$ 4,970	\$ 3,172	\$ 3,345
Basic weighted-average shares outstanding	162,160,601	164,425,858	166,390,009
Dilutive effect of nonparticipating RSUs and stock options	2,254,434	2,153,894	2,648,562
Total diluted weighted-average shares outstanding	164,415,035	166,579,752	169,038,571
Basic earnings per share	\$ 30.65	\$ 19.29	\$ 20.10
Diluted earnings per share	\$ 30.23	\$ 19.04	\$ 19.79

Anti-dilutive RSUs and stock options for 2017 and 2016 were immaterial. There were no anti-dilutive RSUs and stock options for 2015.

23. Segment Information

The Company's management directs BlackRock's operations as one business, the asset management business. The Company utilizes a consolidated approach to assess performance and allocate resources. As such, the Company operates in one business segment as defined in ASC 280-10.

The following table illustrates investment advisory, administration fees, securities lending revenue and performance fees by product type, technology and risk management revenue, distribution fees, and advisory and other revenue for 2017, 2016 and 2015.

<i>(in millions)</i>	2017	2016	2015
Equity	\$ 5,722	\$ 5,018	\$ 5,345
Fixed income	2,921	2,664	2,428
Multi-asset	1,181	1,157	1,287
Alternatives	1,105	878	1,082
Cash management	558	458	319
Total investment advisory, administration fees, securities lending revenue and performance fees	11,487	10,175	10,461
Technology and risk management revenue	677	595	528
Distribution fees	24	41	55
Advisory and other revenue	303	344	357
Total revenue	\$ 12,491	\$ 11,155	\$ 11,401

The following table illustrates total revenue for 2017, 2016 and 2015 by geographic region. These amounts are aggregated on a legal entity basis and do not necessarily reflect where the customer resides or affiliated services are provided.

<i>(in millions)</i>			
Revenue	2017	2016	2015
Americas	\$ 8,406	\$ 7,530	\$ 7,502
Europe	3,432	3,083	3,356
Asia-Pacific	653	542	543
Total revenue	\$ 12,491	\$ 11,155	\$ 11,401

The following table illustrates long-lived assets that consist of goodwill and property and equipment at December 31, 2017 and 2016 by geographic region. These amounts are aggregated on a legal entity basis and do not necessarily reflect where the asset is physically located.

<i>(in millions)</i>		
Long-lived Assets	2017	2016
Americas	\$ 13,560	\$ 13,424
Europe	168	163
Asia-Pacific	84	90
Total long-lived assets	\$ 13,812	\$ 13,677

Americas primarily is comprised of the United States and Canada, while Europe primarily is comprised of the United Kingdom and Luxembourg. Asia-Pacific primarily is comprised of Hong Kong, Australia, Japan and Singapore.

Close	\$ 383.51	\$ 422.41	\$ 447.09	\$ 513.71
2016				
Revenue	\$ 2,624	\$ 2,804	\$ 2,837	\$ 2,890
Operating income	\$ 963	\$ 1,173	\$ 1,209	\$ 1,225
Net income	\$ 647	\$ 795	\$ 877	\$ 851
Net income attributable to BlackRock, Inc.	\$ 657	\$ 789	\$ 875	\$ 851
Earnings per share attributable to BlackRock, Inc. common stockholders:				
Basic	\$ 3.97	\$ 4.79	\$ 5.33	\$ 5.21
Diluted	\$ 3.92	\$ 4.73	\$ 5.26	\$ 5.13
Weighted-average common shares outstanding:				
Basic	165,388,130	164,758,612	164,129,214	163,441,552
Diluted	167,398,938	166,639,290	166,256,598	165,854,167
Dividend declared per share	\$ 2.29	\$ 2.29	\$ 2.29	\$ 2.29
Common stock price per share:				
High	\$ 342.56	\$ 367.47	\$ 376.00	\$ 398.45
Low	\$ 289.72	\$ 319.54	\$ 335.11	\$ 338.61
Close	\$ 340.57	\$ 342.53	\$ 362.46	\$ 380.54

(1) The first quarter of 2016 included a pre-tax restructuring charge of \$76 million.

(2) The first quarter of 2017 included an \$81 million discrete tax benefit reflecting the adoption of new accounting guidance related to stock-based compensation awards that vested in the first quarter of 2017.

(3) The third quarter of 2016 included a \$26 million net noncash tax benefit, primarily related to the revaluation of certain deferred income tax liabilities as a result of legislation enacted in the United Kingdom, and domestic state and local changes.

(4) The fourth quarter of 2017 included a \$1.2 billion net tax benefit related to the 2017 Tax Act.

25. Subsequent Events

In November 2017, the Company announced that it had entered an agreement to acquire the asset management business of Citibanamex, a subsidiary of Citigroup Inc. This transaction involves approximately \$31 billion in assets under management across local fixed income, equity and multi-asset products. The transaction is expected to close in the second half of 2018, subject to customary regulatory approvals and closing conditions. Consideration for the transaction will include an upfront cash payment and contingent consideration.

On January 11, 2018, the Board of Directors approved BlackRock's quarterly dividend of \$2.88 to be paid on March 22, 2018 to stockholders of record at the close of business on March 7, 2018.

The Company conducted a review for additional subsequent events and determined that no subsequent events had occurred that would require accrual or additional disclosures.
